Energy-as-a-Service Business Model

Source: Technavio

According to Navigant Research, the annual global market for commercial and industrial Energy-as-a-Service is estimated to reach \$221.1 billion by 2026.

"Just like Amazon Web Services transformed the IT industry, we believe Energy-as-a-Service (EaaS) can transform the power industry. EaaS enables organizations to move away from having to operate and manage power systems." Miriam Tuerk, Co-Founder & CEO, Clear Blue

Telecom Market Development

Three key industry initiatives present opportunities for Clear Blue:

- **Rural Telecom** rollout to bring the next 1 billion people onto the Internet, driven by major investments from companies like Facebook
- **Wi-fi/satellite** advancements and investments will see the rollout of thousands of sites globally, driven by Amazon, SpaceX, Hughes, Viasat and others
- **5G** moves telecom from large towers and power, to street level systems every few hundred meters, each requiring power

“With the growing telecom sector globally, the penetration of green telecom tower solutions is expected to increase significantly. In the years to come, the telecom companies are expected to collaborate with solar and wind power companies to reduce their energy costs by 30–40%.”

Forward looking statements

Forward looking statements

- This presentation contains forward-looking statements, which can be identified by the use of forward-looking terminology, such as but not limited to: “may”, “intend”, “expect”, “anticipate”, “estimate”, “seek”, or “continue”, or the negative thereof or other variations thereon or comparable terminology. In particular, any statements, express or implied, concerning trends, future operating results, growth, performance, business prospects and opportunities or the ability to generate revenues, income or cash flow are forward-looking statements. These statements reflect management’s current beliefs, including beliefs as to future financial and operating results, and they are based on information currently available to management.
- Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to known and unknown risks and uncertainties. Such risks include but are not limited to: the impact of general economic conditions, market volatility, fluctuations in costs, and changes to the competitive environments, as well as other risks disclosed in the public filings of Clear Blue and its publicly filed press releases.
- Certain forward looking information should also be considered future-oriented financial information (“FOFI”) as that term is defined in National Instrument 51-102. The purpose of disclosing FOFI is to provide a general overview of management’s expectations regarding anticipated results or market conditions. Readers are cautioned that FOFI may not be appropriate for other purposes.
- These factors should be considered carefully and undue reliance should not be placed on forward-looking statements. Although the forward-looking statements are based upon what management believes to be reasonable estimates and assumptions, Clear Blue cannot ensure that actual results will not be materially different from those expressed or implied by these forward-looking statements.
- Unless specifically required by law, Clear Blue does not assume any obligations to update or revise these forward-looking statements to reflect new events or circumstances. Clear Blue seeks safe harbor.
