

# THE BRIGHTEST SOLAR ALL-IN-ONE

MISSION-CRITICAL SUSTAINABLE POWER

UP TO  
**4200**  
LUMENS

- **Lowest Lifetime Maintenance Cost**

Eliminate up to 80% of site visits with EaaS (Energy-as-a-Service) and Clear Blue's remote management platform, Illumience.

- **4200 Lumens - Industry's Brightest**

Senti outshines every other solar all-in-one on the market, delivering safe, reliable lighting for pathways, parks, and public spaces.

- **Mission-Critical Reliability**

Advanced forecasting, intelligent load management, and 24/7 support from our team of live energy experts guarantee dependable night-long lighting—even in cloudy or low-sun conditions.

- **Easy Installation & Smart Design**

The world's first rotatable solar turret makes installation faster and guarantees optimal panel alignment regardless of the light's direction.

- **Better than a Warranty**

Energy-as-a-Service provides with proactive monitoring, predictive maintenance, and free replacements of batteries, controllers, and panels for the life of your coverage.

# SENTI Series Features

Reliability That Pays for Itself.

## Solar Only or Grid Backed-Up Flex

Install Senti completely off-grid where trenching is too costly, or use the grid as backup for added resilience. Retrofit projects benefit from lower operating costs and outage protection.

## Fully Managed Battery & Load Management

Clear Blue's engineers continuously monitor charging cycles and system performance, extending battery life and ensuring lights stay on through every season.

## Energy-as-a-Service (EaaS) Advantage

- Proactive monitoring & predictive maintenance keep systems optimized
- Free replacements of batteries, controllers, and panels for the life of coverage
- 24/7 live energy experts ensuring uptime
- One fixed annual fee—no surprise costs

## Choose Your Model

**A.** Higher-capacity model for extended runtimes, low-sunlight environments, or demanding applications requiring extra margin.

**B.** Optimized for parks, pathways, and standard municipal projects in regions with strong solar availability.

## Remote Management & Installation Support

From commissioning to operation, our experts provide live remote support. With Illumience™, up to 80% of site visits are eliminated cutting costs while keeping systems optimized.

## Precision Engineering & Custom Profiles

Every site is unique. Lighting profiles are tailored to your location and usage, ensuring maximum efficiency whether in sunny regions or low-sun climates.

## Turn-Key Solution

Mount on virtually any pole, rotate the solar turret for maximum sun capture, and activate instantly with our installer mobile app. Reliable and simple.
