- Use in a well-ventilated area.
- Avoid contact with skin and eyes.
- When handling, DO NOT eat, drink or smoke.
- Keep containers securely sealed when not in use.
- Avoid physical damage to containers.
- Always wash hands with soap and water after handling.
- **The Manual Handling Operations Regulations** may apply to the handling of containers/packages of this product. In order to calculate the weight of any pack size, multiply the volume in litres by the specific gravity value given in section 9. This will give the net weight of the product in kilograms.

Precautions for Storage:

- Keep containers closed when not in use.
- Never use high pressure to empty. The container is not a pressure vessel.

Section 8 Exposure Controls / Personal Protection

WORKPLACE EXPOSURE STANDARDS (provided for guidance only)

Substance		TWA		STEL	
		ppm	mg/m ³	ppm	mg/m ³
Calcium carbonate	[1317-65-3]	-	10	-	-
Talc	[14807-96-6]	-	2	-	-
Titanium dioxide	[13463-67-7]	-	10	-	-

Workplace Exposure Standard – Time Weighted Average (WES-TWA). The time-weighted average exposure standard designed to protect the worker from the effects of long-term exposure. Workplace Exposure Standard – Short-Term Exposure Limit (WESSTEL). The 15-minute average exposure standard. Applies to any 15- Minute period in the working day and is designed to protect the worker against adverse effects of irritation, chronic or irreversible tissue change, or narcosis that may increase the likelihood of accidents. The WES-STEL is not an alternative to the WES-TWA; both the short-term and time-weighted average exposures apply. Workplace Exposure Standards and Biological Exposure Indices APRIL 2022 13TH EDITION.

Engineering Measures

Provide adequate ventilation during application and drying. Where practicable this should be achieved using local exhaust ventilation. If this is not sufficient to maintain concentration of solvent vapours below the relevant Occupational Exposure Limit, suitable respiratory protection must be worn (see 'Occupational Exposure Controls' below).

Personal Protection Equipment

Eyes	Safety glasses with side shields.
Hands	Wear chemical protective gloves, e.g. PVC, Butyl rubber gloves.
Skin	Cotton or cotton/synthetic overalls are normally suitable. Grossly contaminated clothing should be removed, and the skin washed with soap and water or a recognised skin cleaner. Wear safety footwear or safety gumboots, e.g. Rubber
Respiratory	If exposure to hazardous substances identified in section 8 cannot be controlled by the provision of natural ventilation e.g., work in enclosed areas, exposure should be controlled, where reasonably practicable, by the use of mechanical exhaust ventilation; when this is not reasonably practicable, suitable respiratory protective equipment must be worn. Type AK-P Filter of sufficient capacity. (AS/NZS 1716 & 1715)
General	Always wash your hands before eating, smoking or using the toilet.
