

# Industry Update

» OCTOBER 2020 ISSUE

## WELCOME

*Welcome to October's newsletter.*

### Annual General Meeting Update

Another external audit of the association's annual accounts has just been completed. We are now working on the annual report for members, and this will be released prior to the AGM, which is to be held on the 26th of November 2020. We will send out an invitation to the AGM to the key contact for each company in the next week or so, and this will be followed by a reminder and a copy of the annual report a few days before the meeting.

This year, our AGM will be a hybrid, with a physical meeting in Auckland for those who wish to attend in person and a webinar component for those who wish to attend virtually. The purpose of the AGM is to update you on the results and achievements of the past year and our plans for the current and future financial years. No elected council or board positions are up for rotation this year as the terms were extended to

three years in the last review of the constitution, so the next elections will be in November 2021.

### Details of the AGM are:

26 November 4:00–5:00 pm  
Royal New Zealand Yacht Squadron,  
181 Westhaven Drive, Westhaven Marina, Auckland

Scott Lawson

### Get it Right Seminars

We had a great response to the "Get it Right NZS 4541 sprinkler seminar" and have had to put on an additional day in Auckland. If you would like anyone to attend this seminar, places are now only available for the new date of 16th November. If you have already booked staff on the 17th and would like to move some of them over to the 16th get in touch ASAP so we can facilitate this. This will be the final time we run this "Get it Right NZS 4541 sprinkler seminar", so don't miss out. Limited spaces are available in Dunedin and Christchurch and Auckland. The registration form is located on page 9.

### NZS4512 Updates

We will be hosting a webinar on the proposed changes to NZS4512 now that public comments are open. This will be held on 4th November 1:30pm. This event will be to raise awareness rather than a discussion session, and we aim to highlight the proposed changes in the document that is out for public comment. Some minor Q&A will be possible at the end via online questions. We still strongly recommend you read this document to assess the changes and whether you wish to submit comments on them. The public comment phase is an important part of standards development, and time is limited, so – if you haven't already – please follow the link below to review the document with your staff and comment if required. We will also be carrying out more in-depth updates and training seminars in the new year once the final document has been completed and approved for release.

## FPANZ PLATINUM MEMBERS

## FireNZ

FireNZ is the most important industry event in New Zealand. In consultation with our partners, the Society of Fire Protection Engineers and the Institute of Fire Engineers, and input from long-term exhibitors, we have decided to push the conference out to October 2021. Many factors led to this decision, including the ongoing COVID situation and risk to the event. However, we are confident that, as it will be a long time between drinks since our last conference in September 2019, FireNZ 2021 will be a real banger of an event, and we are already working on our plans. Anyone who submitted papers for speaking at the next conference will receive an update from the committee to formalize speaking slots early in 2021. Exhibitors will also receive updated communications regarding the exhibition, and those who have already booked a stand will have first option to retain their stand allocation.

## Membership Update

We are currently in the process of reviewing and rebuilding the membership process, criteria, requirements, and membership tier levels. We feel this review is important to ensure we manage our growth and that we are doing the best for our existing membership base.

The association has seen considerable growth in the past few years, and our membership offering has not kept up with the changes in our membership base. The current membership process was launched six years ago, and we need to review and update things to reflect the changes in both our organisation and the fire protection industry as a whole. All new membership applications are now temporarily on hold until this process is complete and formalised.

We hope to begin processing new membership applications in December once we have all the new membership levels, processes, forms, logos, and marketing material completed. Existing members are not required to do anything, as these membership levels remain current and unchanged.

Until next month,

Regards,  
**Scott Lawson**  
Chief Executive Officer, FPANZ

## Use of FPANZ Logo

**Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo.**

This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email [info@fpanz.org](mailto:info@fpanz.org)

**If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.**

## G-Fire One-Bolt Coupling / Figure 579

Single-bolt design means no alternate tightening required

Low-profile spine allows installation of coupling in tighter spaces

360° contact ensures a truly rigid joint

Pre-assembled for fast and easy push-on installation

Center-stop gasket ensures proper positioning on pipe

Pre-lubricated to save time and mess during install

## TECHNICALLY SPEAKING, WE SIMPLIFIED IT.

Introducing the new Grinnell® G-Fire One-Bolt Coupling. It brings you all the benefits of a pre-assembled, push-on coupling but with one key difference. The single-bolt design makes joining grooved pipe faster and easier than ever before. Your time on the job site is valuable – we put the hours in so you don't have to. Learn more at [www.grinnell.com/onebolt](http://www.grinnell.com/onebolt).

## HOFFE SIG Update

› Author **Steve Smith** – HOFFE SIG Chair

Well another busy month has gone by, Labour is back in, a Kiwi won Bathurst again, a Kiwi won the V8 supercars championship and finally the whole country is back at level 1. We even have the luxury of international rugby (although maybe not the result in the first game that we wanted) and daylight savings has arrived for those long awaited summer Barbeques and celebrating the AB's win in the second game at Eden Park!!

I believe that one of the standout opportunities that has arisen out of this year's turmoil and one which we encourage you to take advantage of is the free fees now offered for fire related qualifications. I have been getting regular enquiries from HOFFE Technicians wanting to utilize this opportunity to gain professional qualifications and why wouldn't you??? As mentioned previously having documented qualifications and approvals strengthens not only your own personal credibility, but also our Fire Equipment industry as a whole. I believe that as far as practical we should pursue these opportunities, especially when it's free!!

We have also been receiving reports (again) that some new fire extinguishers which are in circulation have not obtained test certificates as required by the Hazardous Substances (Compressed Gases) Regulations 2017 sections 18 & 19. Sometimes this can be an innocent oversight from circumstances such as an overseas vehicle or item of production plant turning up in New Zealand with a fire extinguisher fitted, but unfortunately sometimes it can also be an intentional act. One of our HOFFE group members has reported that he was recently asked by a client to certify a new 4.5kg dry powder that they had purchased elsewhere - he was suspicious of the fire extinguisher so he took it to a CTLA test station in Auckland only to be told that it's not a compliant model and that the FERN number related to a 1kg ABE and wasn't relevant for that model. Obviously, these could be matters where, if Worksafe was to be involved, the outcome could potentially be quite bad for the companies involved.

We are also progressing with the NZS4503 review and as previously mentioned we have received some good input so far with some consistent points raised by different companies. As with most things the review is important but we will also be mindful of the cost of this project as that money has to be recouped!!

As usual companies or individuals wishing to participate in our HOFFE group regular meetings to either keep up to date or contribute to the discussions can do so either in person or by simply contacting the FPA's office who will make the video link available. This is probably even more topical and important with our group now working on reviewing what is arguably our part of the F.E. industries base document NZS4503.

Have a great month.

Kind regards, **Steve Smith**,  
HOFFE SIG Chair 2020

# Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

Many of us run fire drills on a regular basis, but how many take the time to look at the alarm panel before and after the drill is run? Do you check for defect warning indicators, or isolations displayed on the fire panel? Do you report these back to alarm agents or building owners?

It is critical that we ensure fire alarm panels have returned to their normal function state following drills. Any defects or isolations should also be reported to ensure the building is fully protected. Where isolations are in place, there should also be a procedure making occupants aware of the need to evacuate, where there is no automated life safety system operating.

Don't forget to take the time to read through and comment on the draft alarm standard DZ 4512:2020. There are parts of this that will impact those of us carrying out fire drills and have an input for fire alarm design.

Last month, we saw one of the first drills run in a hospital environment. This was recorded by Massey University and attended by members of FENZ, Auckland Council and private fire engineering companies. The aim of this study is to better understand evacuation times for those being moved between fire cells requiring varying levels of assistance. We hope to receive a further update at our next SIG meeting.

Our SIG meetings will be held on 9th November, time to be confirmed. Don't forget to get in touch if you have any comments or thoughts on how building design impacts on evacuation for the MBIE project or would like to be involved with collecting evacuation data for Massey and Canterbury Universities.

Regards,

**- Phil Jackson**

Evacuation Consultants SIG Chair 2020

# Passive Fire Protection SIG Update

› Author **Justin McEntyre** – Passive Fire Protection SIG Chair

## Fire & Smoke Stopping Code of Practice Update:

While meetings have been quiet there has been a key development in the background with the development of this Code of Practice whereby ASFP out of the UK have agreed in principle to FPANZ utilising and referencing their recently released “Fire Stopping of Service Penetrations Best Practice in Design and Installation”.

There is positive feedback amongst our working group that theirs is a strong document and will put the wind behind us for development of our Code of Practice. We intend on utilising their format and content where applicable to NZBC and editing to suit our building legislation as applicable.

Joe is frantically burning the middle candle to get ahead on this document and will call a meeting shortly when we can all get together and make this document suit our brief.

Thanks for everybody’s patience.

Kind Regards,

**Justin McEntyre**

Passive Fire Protection SIG Chair 2020

## “Get it Right” Seminar Series (Resumed)

# Sprinkler Systems

### 2020 DATES:

DUNEDIN	Monday 9th November
CHRISTCHURCH	Tuesday 10th November
AUCKLAND	Monday 16th November & Tuesday 17th November (FULL)

### WHO SHOULD ATTEND:

The seminar/workshops are particularly aimed at those involved in design, fabrication, supply, specification, installation and testing of Sprinkler Systems.

Those who should attend include:

- Sprinkler system designers
- Sprinkler system installation supervisors and charge-hands
- Sprinkler system installers/technicians
- Installation inspectors
- Maintenance technicians
- Fire system surveyors
- Insurance risk managers and surveyors
- Sprinkler system component manufacturers and suppliers.
- Designers and estimators
- Council inspectors

### INVESTMENT:

- Members (single) \$300 each\* excl. GST
- Members (multiple) \$250 each\* excl. GST
- Non-Members \$450 each excl. GST

\*Available to FPA NZ Financial Members who are fully paid-up.

**Catering is provided** for this full day seminar.

We resume our Sprinkler Seminar series cut short by lockdown restrictions.

This series is driven by the ongoing changes we face as an industry and the importance of selecting the right products to meet design and standards requirements.

FPANZ is running a series of one day workshops throughout the country - our aim is to ensure that the industry is continuing to get the latest information and support.

### NZS4541:2020

NZS4541:2020 is due to be published on 17 March. This seminar will introduce you to the provisions of the new standard, and will place an emphasis on the new seismic resilience requirements of the standard.

The changes to the seismic provisions are ground-breaking, and will require a new approach to how the designs are carried out, documented, and installed. The day will conclude with a workshop session, to allow designers to have hands-on training in the new provisions.

### EARTHQUAKES

Following recent earthquakes events in NZ (Christchurch, Wellington and Kaikoura) the building industry is facing increasing pressure to design to protect the building and occupants against earthquake damage.

Generally, sprinkler systems have performed admirably in these events, however there has been some criticism of how we are designing our seismic bracing systems. The playing field has changed, and the construction sector is expecting more from the fire industry.

The presenters will outline what will now be expected to ensure that systems can be certified.

### PRESENTERS

- Adam Ellwood\*
- Chris Mak
- Stephen Ridder

PROUDLY SPONSORED BY

\*Adam Ellwood will be presenting at the Auckland session only.

## SEMINAR CONTENT:

The workshop will be presented in a series of parts covering the following timing and topics:

7.30 am	Registration and tea/coffee
8.00 am	Welcome & FPA Updates - <b>Scott Lawson</b>
8:15am	Introduction to 4541 - <b>Chris Mak</b>
9:15am	Documentation - <b>Stephen Ridder</b>
10:15am	Morning Tea
10:45am	Seismic - <b>Chris Mak/Stephen Ridder</b>
12:30pm	Lunch
1:00pm	Seismic Workshop - <b>Adam Ellwood*, Stephen Ridder</b>
3:00pm	NZS4510 Revision
3:15pm	Q&A
3:45pm	Wrap up.

*\*Adam Ellwood will be presenting at the Auckland session only.*

### 2020 DATES:

DUNEDIN	Monday 9th November
CHRISTCHURCH	Tuesday 10th November
AUCKLAND	Monday 16th November & Tuesday 17th November (FULL)

### INVESTMENT:

- Members (single) \$300 each\* excl. GST
- Members (multiple) \$250 each\* excl. GST
- Non-Members \$450 each excl. GST

\*Available to FPANZ Financial Members who are fully paid-up.

**Catering is provided** for this full day seminar.

## PRESENTERS

### Chris Mak

BE FEngNZ, CPEng, PM.SFPE, CPEng, IntPE(NZ), RPEQ

Chris has over 35 years' experience in the fire protection industry in engineering and management positions. He currently manages Aon's Fire Protection business unit, which certifies and inspects fire protection installations.

Previously, he was the engineering manager for the NZ branch of a major global Fire Protection Contracting and Servicing company.

He has been involved in the preparation of numerous fire protection standards, including chairing the committees that drafted the last three revisions of NZS4541 "Automatic Fire Sprinkler Systems".

### Stephen Ridder

Stephen spent nearly twenty years working as a fire systems designer and project manager for a large fire protection company in New Zealand. Stephen is based in the Christchurch office where he inspects and certifies new fire sprinkler and fire alarm systems, undertakes reinspection (surveys) of existing fire sprinkler systems, and certification of new fire sprinkler hardware; he has been in this role for six years now.

Stephen prepares many of Aon's internal and external fire protection directives. He is also responsible for listing of fire sprinkler hardware for us on NZS4541 systems.

## Public consultation: DZ 4512 Fire detection and alarm systems in buildings

NZS 4512: 2010 *Fire detection and alarm systems in buildings* provides a complete specification for the design, manufacture, installation, documentation, and maintenance of building fire detection and alarm systems, whether operated manually or automatically, in the event of fire.

This edition is a full technical revision which, when finalised, will supersede NZS 4512:2010.

The key areas that this revision has addressed are as follows:

- Significantly expanded specifications and guidance for the design and use of visual alerting devices in anticipation of their increased use for alerting the deaf and hard of hearing.
- Specific provisions for wireless-based detection and alarm technology, networked systems, and smoke detectors in ducts.
- New requirements for power supplies to support the full alarm load, earth fault monitoring, and seismic performance.
- New design requirements for the normal indicator, a standard cabinet key, enhanced EMC immunity, and labelling.
- Acceptance of equipment complying with new overseas standards, including short-circuit isolators and input/output devices.
- Changes to installation practice: increased zone sizes, reduced allowance for detector substitution, increased manual call point spacings, increased fault resistance in large alerting systems, and crimp-pin termination and identification of cables.
- Clarification of cable diversity requirements, manual call point locations, requirements for line-type heat and beam-type smoke detectors, requirements for maintenance access, and Type 5 alerting and hush facilities.
- Additional requirements for commissioning and routine testing, including an expanded escalation and resolution process for unresolved system impairments.
- Significantly expanded requirements for system documentation, commissioning, inspection, and certification.
- Numerous other changes and enhancements.

This draft is available for public comment for a period of 8 weeks. All comments submitted during this period are reviewed by the standards development committee before the final standard is balloted on.

You can view or download the New Zealand draft standard on the [Standards New Zealand website](#). The closing date for comments is **3 December 2020**.

Kind regards,

Inge Mautz-Cooreman  
Standards New Zealand

# All fire protection industry qualifications are now free

There has never been a better time to train, or retrain, on-the-job. All fire protection industry qualifications offered by Competenz are free from 01 July 2020 until 31 December 2022 for new and current learners.

There are also government wage subsidies available for employers of apprentices in their first two years of training.

Developed in conjunction with industry experts, our range of fire protection qualifications cover skills in fire detection and alarms, passive fire protection and hand-operated firefighting equipment.

These qualifications take a step-by-step approach. Key benefits of the programmes are:

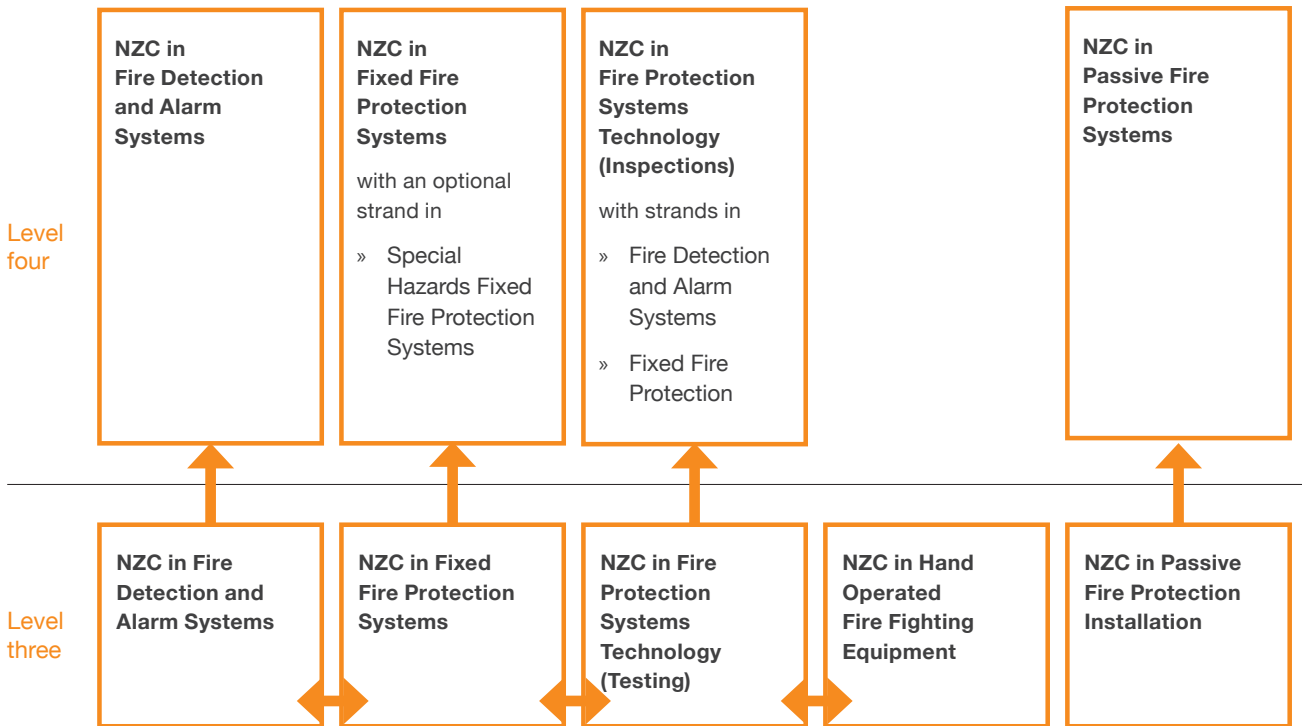

- » A combination of practical and theory to develop both knowledge and skills
- » Interactive learning available online 24/7
- » Covers critical health and safety aspects of your work
- » Competenz training advisor visits to support learners through their training
- » Nationally recognised qualifications registered with the New Zealand Qualifications Authority (NZQA).

## New Zealand Certificates in fire protection

Competenz has created logical pathways for learners to progress, with five New Zealand Certificates at level 3 and six New Zealand Certificates at level 4.

## Training with Competenz

Competenz is the industry training organisation (ITO) for the fire protection industry.

Developing highly skilled employees is critical to staying competitive, productive and safe. To do this Competenz works with industry experts to develop nationally recognised qualifications, mapping the skills needed and registering them with NZQA. Our team also develop training plans to make it easy for you to grow your employee's skills and productivity.

We do this in 37 industries with more than 3,500 businesses, helping over 20,000 people develop their skills on-the-job each year.

To find out more about the fire protection qualifications call our customer services team on 0800 526 1800 or email [info@competenz.org.nz](mailto:info@competenz.org.nz).

[www.competenz.org.nz](http://www.competenz.org.nz)

## What could you be eligible for as an employer or learner?\*

Free  
Apprenticeships  
and Targeted  
Traineeships  
(TTAF)

One of the following\*

Apprenticeship  
Boost

Mana in Mahi  
Extension

Regional  
Apprenticeship  
Fund

Select one from the following:

	Targeted Training and Apprenticeship Fund (TTAF)	Apprenticeship Boost	Mana in Mahi Extension	Regional Apprenticeship Fund
<b>What is it?</b>	Free fees on apprenticeships, plus traineeships in targeted sectors	Wage subsidy	Wage subsidy + additional pastoral care	Wage subsidy + additional business support
<b>How much could an employer get?</b>	All fees that an employer would normally pay to an ITO will now be covered.  This includes resources, block courses, night classes, study groups and e-learning fees.	Apprenticeship Boost will be available from August 2020 and runs for 20 months.  An apprentice who is in the first year of their apprenticeship will be eligible for \$1,000 per month, and an apprentice in their second year is eligible for \$500 per month for a maximum period of 20 months.	The wage subsidy will be increased – up to \$16,000 for a first year participant. Up to \$8,000 for a second year participant.  The fund pays for any training your employee needs before they start.  WINZ will also work with your employee to: <ul style="list-style-type: none"> <li>» Set achievable goals</li> <li>» Provide incentive payments to motivate them to meet their goals</li> <li>» Provide support to start their qualification or apprenticeship</li> <li>» Get their feedback on how things are going.</li> </ul>	The initiative allows for up to \$40,000 of support per apprentice.  This includes a wage subsidy of up to \$16,000 for the first year of training  Up to \$8000 for the second year.  It also includes additional funding to help with other business support and pastoral care so the employer and apprentice can successfully maintain the apprenticeship.
<b>What period does it cover?</b>	1 July 2020 to 31 December 2022 (30 months)	From August 2020 to March 2022 (20 months)	From August 2020, programme support will be extended from 12 up to 24 months.	More information to come
<b>What are the employer's/ apprentice's eligibility criteria?</b>	All apprentices are eligible – new and currently enrolled  All traineeships in targeted areas are eligible – new and currently enrolled, if they are enrolled in a L3-L7 qualification.  This does not currently cover pan-sector skills such as OSH, Sales, Distribution, Leadership, Business Administration.  All learners enrolling into a Competenz qualification must meet the entry requirements, with the aim of completing the full qualification, with the full support of their employer.	Employers of first and second year apprentices who are currently in, or newly enrolled in, a Tertiary Education Commission approved New Zealand Apprenticeship or a Managed Apprenticeship	Need to have a Mana in Mahi candidate through Work and Income employed as a first or second year apprentice, who is in a Tertiary Education Commission approved New Zealand Apprenticeship or a Managed Apprenticeship.  Otherwise need to employ a new apprentice through the Mana in Mahi scheme.	Need to employ a worker displaced by the effects of COVID-19 as well as be a person of Māori or Pacific descent.  More information to come.
<b>What do I do next?</b>	Nothing – Competenz will automatically apply the free fees to invoices for eligible learners, or credit enrolled learners based on their pro-rated fees post 1 July 2020.  Any questions, please email <a href="mailto:freetraining@competenz.org.nz">freetraining@competenz.org.nz</a>	Apply through WINZ <a href="http://workandincome.govt.nz/work/apprentice-support">workandincome.govt.nz/work/apprentice-support</a>	Apply through WINZ <a href="http://workandincome.govt.nz/work/apprentice-support">workandincome.govt.nz/work/apprentice-support</a>	Go to the WINZ website <a href="http://workandincome.govt.nz/work/apprentice-support">workandincome.govt.nz/work/apprentice-support</a>
