

Industry Update

› SEPTEMBER 2020 ISSUE

WELCOME

Welcome to September's newsletter.

This month again sees plenty of progress on the association's objectives; I provide a few snapshots of some below, and the updates from the special interest group (SIG) chairs share more detail on others. The headway we're making with these objectives is pleasing, and everyone involved in them knows how much work goes into each and every one.

Of special note this month, I would like to thank the working group that produced the "Code of Practice for the Specification and Application of Intumescent Coatings for the Fire Protection of Structural Steel." This document has been in development for over a year, with much of work done by a small group of dedicated members and subject matter experts. This document has now gone through the final external review and public comment phases and was approved by the FPANZ board and council for release at this month's council meeting. It will be available to download from our website in the next week or two.

Free Fees on Qualifications Update

It is really pleasing to report that our sector has seen the second largest uptake of learners enrolling since we announced the free fees on fire qualifications. There has also been a great increase in the new level 3 passive fire installer's qualification, with just over 150 learners. Other general enrolments have also jumped to approximately 650 learners. While the numbers are a great improvement on this time last year, it is also important that we keep the momentum going. It is vital that, as an industry, we support our learners and encourage them to keep working once they are enrolled and to complete the qualifications. The future will see increased requirements to be earning credits regularly, and learners who don't will be removed from programmes if they are inactive for three or more months. We have also worked with Competenz to review the level 4 fire alarm installer's qualification to remove some components that have hindered completion for learners living outside the main geographic centres.

Scott Lawson

SIG Meetings

The SIG meetings are really starting to build in both momentum and attendance. This is due to the number of projects we have underway and the interest they have generated. We have also now moved to a blended meeting format that makes it easier for members from around the country to attend. The blended meetings combine face-to-face meetings in a central Auckland location with the option of using Zoom for those not based in Auckland or not wanting to get stuck in the wonderful traffic we are bestowed with here in Auckland. We encourage you to attend the meetings to be part of the changes we are driving for industry and to have a voice in future directions.

NZS4510 Update

I am pleased to announce that the first meeting of the NZS4510 committee took place this month, and we include an update from Chris Mak, the committee Chair, on page 8.

NZS4512 Update

The committee has completed the final work on NZS4512, and the document is now with the editors for final tidy up. At this stage, we anticipate it will be released for public comment around mid-October. If you have an interest in the fire alarm sector, please do download it and review the proposed changes. We will hold several online workshops to facilitate getting comments in and consolidated. Early next year, we will also hold workshops to provide education on the changes to NZS4512 and how they will impact on the sector.

Get it Right Seminars

The next round of sprinkler seminars are now booked for November, with the dates at this stage as follows:

- › **Dunedin** – 9th November 2020
- › **Christchurch** – 10th November 2020
- › **Auckland** – 17th November 2020

We will email out the registration forms for these. Given the current pandemic environment, all seminars are fully refundable or transferable in case we are forced to cancel at short notice. These seminars are not new – they are repeats of those that were cancelled because of COVID-19 – so you do not need to attend if you went to the ones that were held earlier in the year.

Membership Renewal Update

Now the membership renewal process has been completed for the 2020–2021 financial year, we are reviewing the process to become a member of FPANZ. This includes updating the membership criteria, requirements, forms, and branding of the membership types. Changes will come into effect in the next month or so for all new membership applications, so we have placed a temporary hold on new memberships until we have completed these updates.

Until next month,

Regards,
Scott Lawson
Chief Executive Officer, FPANZ

New Corrosion Solutions

Protect it. Extend it.

Safeguard your fire sprinkler system today – extend its life tomorrow.

Corrosion in fire sprinkler systems leads to plugging problems, diminished sprinkler performance, water leak damage and reduced service life. TYCO® corrosion solutions are designed to address these risks to life safety, structural integrity and business continuity. Featuring a range of nitrogen generators, this portfolio of corrosion-fighting solutions gives you the tools to reduce corrosion and extend the life of your fire sprinkler system.

The power behind **your mission**

HOFFE SIG Update

Author **Steve Smith** – HOFFE SIG Chair

Well, another month has passed by and thankfully we are now starting to see an easing of the COVID-19 restrictions that we have all been living under for some time now.

At the time of writing this article we are scheduled to have our HOFFE group meeting & discuss what form the NZS4503 revision will take as well as what items have been proposed to be considered as part of the review. To date the most consistent response has been to please review the definition of a “Competent Person”.

Another development has occurred in the Aero Fire situation - as a result of their continued attempts to procure products and operate an article appeared on Newshub on the 12th September about their activities. Included in this article were interviews with Mr Singh and also with Mark van Dorsten of PSL, discussing how they came to suspect that Mr Singh was operating in spite of the court order preventing them from doing so. Thankfully our FPA member companies are well aware of the background and current situation surrounding this company. The FPA continue to encourage member companies to report any activities to the Commerce Commission. Unfortunately, companies who operate like Aero Fire have been proven to bring our industry into disrepute which harms us all. It can be especially harmful when we are trying as an industry group to gain credibility and support for our members with initiatives like the Codes Of Practice, NZS4503

revision and various training options. Unfortunately bad news travels faster than good so if you have any information please work with the Commerce Commission and/or report any findings to the FPA who will forward it to them.

We are also receiving more reports of our service companies being asked to certify fire extinguishers which have been brought into the country but have not been tested and approved to the standards and ratings they are claiming. It is important to realize that once you certify and charge for your services you take on a liability and are saying that the fire equipment is fit for use. Do not certify the products if they are of dubious origin and may not be fit for purpose.

As previously mentioned, the free training initiative is available through Competenz for those wishing to become qualified HOFFE technicians - this is a great opportunity that is unlikely to be repeated. As you would expect overall enrolments have risen substantially as a result including a substantial increase in those seeking HOFFE qualifications.

Have a great month

Kind regards, **Steve Smith**,
HOFFE SIG Chair 2020

Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

It is great to see that more building owners are taking their responsibility seriously and ensuring maintained evacuation schemes are in place. This has led to extremely high numbers of applications being submitted to the Fire information Unit (FIU) and subsequently caused delays in processing times. Scheme applications are processed in the order that they are received. If you feel your application is urgent this should be communicated in writing for consideration by the FIU. Do not forget that you can also update your training and drill results via the portal, this reduces the administration load of the FIU.

We are seeing some really positive results where evacuation consultants and fire risk management officers have been engaged in new projects from the design stage, this is resulting in better design for

the end user, which is reducing variations and making the building more user friendly.

Our SIG meetings will be held on 25th November, time to be confirmed. Don't forget if you have any comments or thoughts on how building design impacts on evacuation for the MBIE project. Or would like to be involved with collecting evacuation data for Massey and Canterbury Universities to get in touch.

Regards,

- Phil Jackson
Evacuation Consultants SIG Chair 2020

Use of FPANZ Logo

Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo.

This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email info@fpanz.org 

If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.

Passive Fire Protection SIG Update

› Author **Justin McEntyre** – Passive Fire Protection SIG Chair

It is with great excitement that I am able to confirm that the Intumescent Coatings Design & Application Code of Practice has been finally approved by the FPANZ Council and will now be released.

This document has been through strenuous marketing & industry scrutiny including multiple feedback & review sessions as well as MBIE. This process although time consuming has been important to ensure all industry participants are on board with the content and its release.

Despite massive industry request and belief in the document getting it to this stage has not been a breeze and I would like to thank everyone involved with the document especially the original Working Group members who produced the document in good time and also Dave Prosser who diligently saw through its final stages.

Once graphics are completed the document will be marketed and publicly available free of charge for all to access.

It is then the intention that this CoP will be taken on a roadshow (Covid permitting) across the country and its value show cased to Councils, Fire Engineers, Structural Engineers, Designers, Applicators and builders.

There is an opportunity for discussion around the creation of an NZQA Level 3 Intumescent Coating applicators qualification which is an exciting conversation to be having off the back of the momentum this document will create and the success of NZQA Level 3 Passive Installers qualification.

Well done to all involved to date. We now have a road map to raise the standard of Intumescent Coatings & understanding in NZ.

Kind Regards,

Justin McEntyre

Passive Fire Protection SIG Chair 2020

Reform of Vocational Education (RoVE)

28 July 2020

Tena koe

I am writing to let you know about the work of the Manufacturing, Engineering and Logistics Workforce Development Council (WDC) interim Establishment Board (iEB).

The Manufacturing, Engineering and Logistics iEB was appointed in June 2020 to work with industry to establish the Manufacturing, Engineering and Logistics WDC as a legal entity. Where possible, the iEB will also work with transitional Industry Training Organisations, the New Zealand Institute of Skills and Technology (NZIST) and other providers to provide advice and guidance to inform tertiary education system responses to COVID-19 impacts.

WDCs will contribute to the vocational education and training system by:

- Providing skills and workforce leadership for the industries they represent. This includes identifying current and future needs and advocating for those needs to be met
- Providing vocational education investment advice to the Government
- Developing qualifications, setting standards, and moderating assessments
- Endorsing provider programmes
- Promoting the benefits of educating employees to employers.

The initial focus of the [iEB members](#) is establishing the new WDC as a legal entity. We are currently developing options for the governance and establishment of these new organisations.

We will need your support to ensure that the new WDC can provide the vision and influence that support your efforts to develop our workforce. We will be in contact in the future to gather your views on the options identified.

In the meantime, please register with the Reform of Vocational Education newsletter available [here](#).

If you have any questions about the work of the Manufacturing, Engineering and Logistics iEB, please feel free to email MEL.ieb@tec.govt.nz.

Nāku iti noa

Troy Coyle
Chair, Manufacturing, Engineering and Logistics Interim Establishment Board

4510 Committee Meeting

» Author **Chris Mak** | Chair – P4510 Committee

UNCLASSIFIED

UPDATE

DATE	17/9/2020
TO	P4510 Committee and nominating organisations
FROM	Chris Mak, Chair – P4510 Committee
SUBJECT	Update on the revision of NZS 4510:2008 <i>Fire hydrant systems for buildings</i> .

PURPOSE OF THIS UPDATE

The committee revising NZS 4510 has had the kick off meeting. Due to the ongoing disruption of COVID-19, the committee meeting was held via online videoconference on 16 September 2020.

This is an update of progress to date, which is intended to be circulated to the committee members, who, in turn, are encouraged to update their nominating organisation on the progress of this project.

It needs to be noted that committee deliberations are confidential. This is to ensure, among other things, that committee members are not subjected to undue pressure and that assumptions are not made by members of the public as to what may be published.

Nominating organisations are also encouraged to provide feedback to their committee member(s) on any proposed changes.

COMPLETED & UPCOMING MILESTONES

The project is on schedule to be released for public comment in July 2021, with publication due in September 2021.

The following milestones have been completed.

1. Kick off meeting completed, where scope agreed and working groups established

The first development meeting is scheduled in November 2020, when working groups will report back on their proposed changes to NZS4510.

SUMMARY OF MAJOR CHANGES PROPOSED

The following major key changes to NZS 4510 are envisaged:

1. Review of the standard to reflect changes in the Building Code's Compliance Documents which may impact on the safety of fire-fighters in their operations.
2. Review of Appendix C for low rise buildings.
3. Review of certain technical aspects of the standard to align with NZS4541:2020, including seismic design, pumps and combined sprinkler and riser systems.
4. Review of construction requirements, including the need to partially commission the riser during the construction phase of a building project.

All fire protection industry qualifications are now free

There has never been a better time to train, or retrain, on-the-job. All fire protection industry qualifications offered by Competenz are free from 01 July 2020 until 31 December 2022 for new and current learners.

There are also government wage subsidies available for employers of apprentices in their first two years of training.

Developed in conjunction with industry experts, our range of fire protection qualifications cover skills in fire detection and alarms, passive fire protection and hand-operated firefighting equipment.

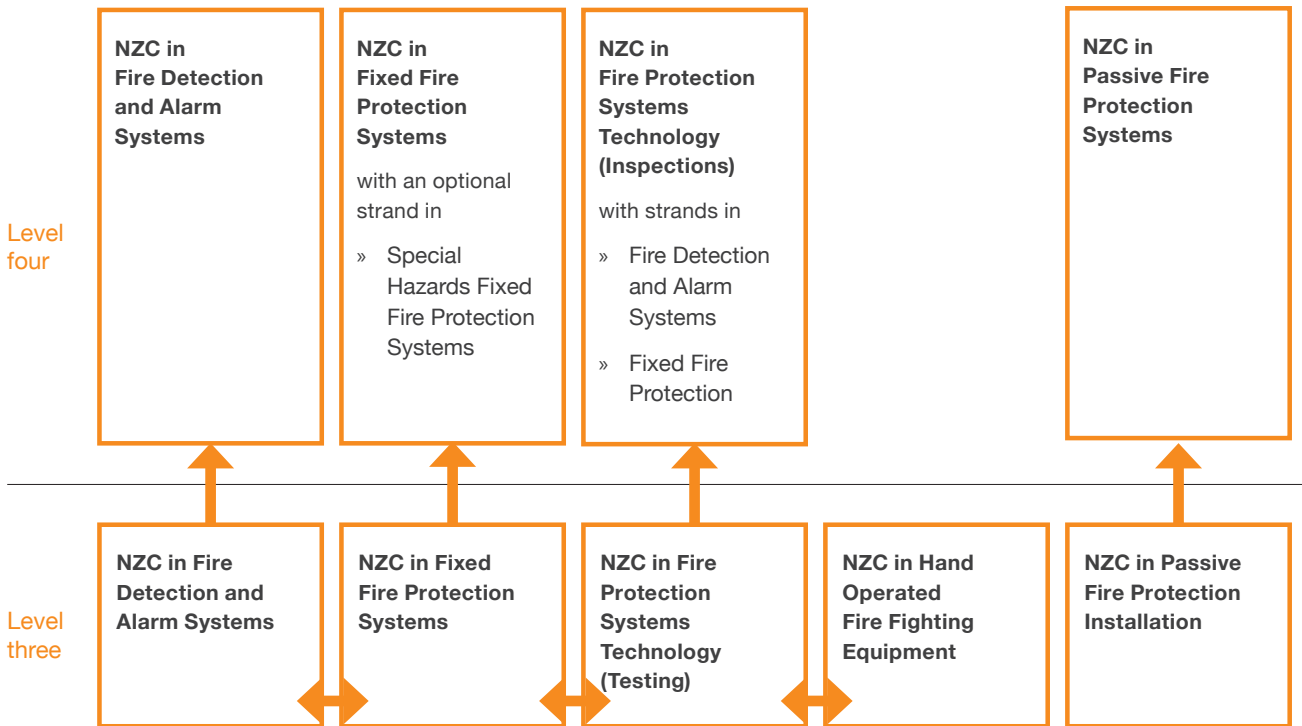

These qualifications take a step-by-step approach. Key benefits of the programmes are:

- » A combination of practical and theory to develop both knowledge and skills
- » Interactive learning available online 24/7
- » Covers critical health and safety aspects of your work
- » Competenz training advisor visits to support learners through their training
- » Nationally recognised qualifications registered with the New Zealand Qualifications Authority (NZQA).

New Zealand Certificates in fire protection

Competenz has created logical pathways for learners to progress, with five New Zealand Certificates at level 3 and six New Zealand Certificates at level 4.

Training with Competenz

Competenz is the industry training organisation (ITO) for the fire protection industry.

Developing highly skilled employees is critical to staying competitive, productive and safe. To do this Competenz works with industry experts to develop nationally recognised qualifications, mapping the skills needed and registering them with NZQA. Our team also develop training plans to make it easy for you to grow your employee's skills and productivity.

We do this in 37 industries with more than 3,500 businesses, helping over 20,000 people develop their skills on-the-job each year.

To find out more about the fire protection qualifications call our customer services team on 0800 526 1800 or email info@competenz.org.nz.

www.competenz.org.nz

What could you be eligible for as an employer or learner?*

Free
Apprenticeships
and Targeted
Traineeships
(TTAF)

One of the following*

Apprenticeship
Boost

Mana in Mahi
Extension

Regional
Apprenticeship
Fund

Select one from the following:

	Targeted Training and Apprenticeship Fund (TTAF)	Apprenticeship Boost	Mana in Mahi Extension	Regional Apprenticeship Fund
What is it?	Free fees on apprenticeships, plus traineeships in targeted sectors	Wage subsidy	Wage subsidy + additional pastoral care	Wage subsidy + additional business support
How much could an employer get?	All fees that an employer would normally pay to an ITO will now be covered. This includes resources, block courses, night classes, study groups and e-learning fees.	Apprenticeship Boost will be available from August 2020 and runs for 20 months. An apprentice who is in the first year of their apprenticeship will be eligible for \$1,000 per month, and an apprentice in their second year is eligible for \$500 per month for a maximum period of 20 months.	The wage subsidy will be increased – up to \$16,000 for a first year participant. Up to \$8,000 for a second year participant. The fund pays for any training your employee needs before they start. WINZ will also work with your employee to: <ul style="list-style-type: none"> » Set achievable goals » Provide incentive payments to motivate them to meet their goals » Provide support to start their qualification or apprenticeship » Get their feedback on how things are going. 	The initiative allows for up to \$40,000 of support per apprentice. This includes a wage subsidy of up to \$16,000 for the first year of training Up to \$8000 for the second year. It also includes additional funding to help with other business support and pastoral care so the employer and apprentice can successfully maintain the apprenticeship.
What period does it cover?	1 July 2020 to 31 December 2022 (30 months)	From August 2020 to March 2022 (20 months)	From August 2020, programme support will be extended from 12 up to 24 months.	More information to come
What are the employer's/ apprentice's eligibility criteria?	All apprentices are eligible – new and currently enrolled All traineeships in targeted areas are eligible – new and currently enrolled, if they are enrolled in a L3-L7 qualification. This does not currently cover pan-sector skills such as OSH, Sales, Distribution, Leadership, Business Administration. All learners enrolling into a Competenz qualification must meet the entry requirements, with the aim of completing the full qualification, with the full support of their employer.	Employers of first and second year apprentices who are currently in, or newly enrolled in, a Tertiary Education Commission approved New Zealand Apprenticeship or a Managed Apprenticeship	Need to have a Mana in Mahi candidate through Work and Income employed as a first or second year apprentice, who is in a Tertiary Education Commission approved New Zealand Apprenticeship or a Managed Apprenticeship. Otherwise need to employ a new apprentice through the Mana in Mahi scheme.	Need to employ a worker displaced by the effects of COVID-19 as well as be a person of Māori or Pacific descent. More information to come.
What do I do next?	Nothing – Competenz will automatically apply the free fees to invoices for eligible learners, or credit enrolled learners based on their pro-rated fees post 1 July 2020. Any questions, please email freetraining@competenz.org.nz	Apply through WINZ workandincome.govt.nz/work/apprentice-support	Apply through WINZ workandincome.govt.nz/work/apprentice-support	Go to the WINZ website workandincome.govt.nz/work/apprentice-support

Over the last two weeks, we have seen the construction industry get in and do the right thing during these trying times. Particularly in Auckland, our people have quickly reverted to the procedures put in place to protect us all when chances of COVID-19 community transmission are higher.

The recent cluster outbreak has reminded us just how quickly this disease can spread and that we can't drop our guard. It is also a timely reminder that we can't get complacent about our Covid-19 health and safety controls either. We need the whole industry to pull together and do the right thing to maintain public and government confidence in our ability to work safely during these heightened risk levels.

The Alert level protocols and tools and resources, developed by our industry and available on www.chasnz.org/covid19, provide a standard way of managing COVID-19 in our construction related businesses. The establishment of these protocols were a key part of getting Government support for our industry to work at Alert Level 3.

We know that most businesses have been doing a good job in applying the protocols but we are aware that it is a constant challenge to maintain them over time, especially if workers see other businesses or even members of the public not applying a similar high standard.

To better help construction businesses understand and apply the protocols, we have developed some simple check sheets that you can use on site or when going to a workplace. These will help you to be confident you are doing the right thing.

You can use these check sheets when explaining how you are controlled COVID-19 to clients, visitors, building inspectors or even WorkSafe. They do not replace the protocols but help make it easier to check you are doing it right every day.

You can access these check online sheets [here](#)

We have also had questions from clients around what they should be expecting from their builder or tradesperson. We have developed this one-page guide for clients you can use when asked questions about COVID-19 and what controls should be in place.

Clients can access further information online about what to expect during Alert Levels 3 and 2 from my builder or tradesperson [here](#)

If you do have concerns about protocols not being followed you can forward these issues to <https://covid19.govt.nz/covid-19/covid-19-compliance/>
