

Industry Update

› JUNE 2021 ISSUE

WELCOME

Welcome to June's newsletter.

This is the last newsletter of this financial year, so I will cover a few things about the coming months. We are now into our busy period, which includes not only the lead-up to FireNZ but also the completion of the accounts for the year, preparation for our annual audit of the accounts, a solid block of Get it Right seminars over the next two months, and processing of membership renewals. Combine that with our business as usual and we will be flat out until after FireNZ.

Scott Lawson

COVID-19 has once more disrupted some of our plans and undoubtedly those of our members too. We arrived in Wellington on Wednesday last week to be told of a change to Level 2, which meant all our plans had to be changed. We decided it was prudent to postpone the Wellington NZS 4512 seminar, and the two-day careers event we were also there for was obviously cancelled too. It was disappointing and made it clear that the effects of the pandemic will still be with us for some time to come.

MEMBERSHIP RENEWAL

Membership renewals were started earlier this month, as the membership year runs from 1 July to 30 June. I would like to thank our members for the continued support, and it is great to see that once more the association has grown over the course of the year. I would also like to remind our members that the membership fees are based on the number of EFT staff (Equivalent Full-Time staff) in your organisation, and the renewal process includes a declaration about this, so please check you are in the correct membership tier by completing and returning this declaration. We are aware that one or two members are not in the correct membership tier, and we ask that those members contact us to fix this.

GET IT RIGHT SEMINARS

We have completed two of the NZS 4512 seminars and one of the Passive seminars; as mentioned, we would have completed one more in Wellington had circumstances allowed. We are working on new dates for the Wellington seminars and will email everyone who was booked in for that seminar. The popularity of the seminars has seen us put on even more sessions to accommodate as many people as possible. In total, we will be running ten NZS 4512 seminars. If you have not already booked, please email us asap so we can see whether there is still space in your area. We will also be announcing dates for the Passive seminars in Auckland and Wellington and Dunedin in the next few weeks.

CAREERS EXPO UPDATE

Earlier this month, we attended the New Zealand Careers Expo at the Dunedin town hall. Approximately nine schools from the surrounding areas brought through their students, which gave us a great opportunity to promote the fire protection industry to students looking to plan what they will do when they leave school. While we don't expect many of these students will appear in the industry this year, some were looking for opportunities for once they leave school

FPANZ PLATINUM MEMBERS

next year. Career's advisors and parents also came along, so we were able to promote our industry to them too. Unfortunately, as mentioned, the Wellington expo was cancelled when Wellington moved to alert level 2. However, the event organisers will be rebooking this, and we will be planning to attend once we know the new dates. We are assessing what other events we could use to promote the fire protection industry as a career option for those looking to enter the work force.

PRODUCT REGISTERS

I am pleased to advise that the new online version of the passive product register is in the final stages of development and testing. A small group led by the Passive SIG Chair, Justin McEntyre, has been working on this project, which will see the register evolve into a far more useful reference tool than the current PDF

version. We are about to enter the user-testing phase, which we hope to complete in the next 4–6 weeks depending on any findings. We appreciate everyone who has been involved in this project, and the product suppliers for continuing to support the evolution of this tool.

I look forward to updating you next month on some of the plans for the new financial year and hopefully more on the roll out of seminars to our members around NZ.

Until then,

Regards,
Scott Lawson
Chief Executive Officer, FPANZ

Use of FPANZ Logo

Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo. This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email info@fpanz.org 

If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.

HOFFE SIG Update

› Author **Steve Smith** – HOFFE SIG Chair

Well, the Kiwi teams have dominated the rugby and the Blues finally have some well-deserved silverware in their trophy cabinet. It was also very pleasing to see that our cricket team overcame good opposition, travel, covid restrictions and even the weather to lift the ICC World Test Championship trophy.

Since the last article we have been involved with the review of the level 3 HOFFE qualification. A couple of interesting points about this review were as follows:

- › Our Fire equipment industry training programmes continue on even after Competenz closes its doors.
- › The transition takes place after August 2021.
- › The free fees scheme is still on offer.
- › The level 3 HOFFE qualification only requires 105 credits.
- › Generally, a novice person with some practical skills can achieve this qualification within 2 years.

As an example of what shouldn't happen, I was recently on a major high profile construction site in Auckland and, while going over the fire-fighting equipment installed on a new vehicle for the site, I noticed a 9kg ABE fire extinguisher in a heavy-duty fire extinguisher vehicle bracket. It caught my eye because it had bent handles and a twisted safety pin in it which looked like it had recently happened but someone who didn't know what they were doing or was having a very bad day had certified this - a bad day for the following reasons:

- a) The service tag noted NZS4503 as the reference standard yet the hole (only one) was a round hole not a number as required under section 2.8 of NZS4503:2005?
- b) There was no recorded test date at all?
- c) The only hole on the service tag intersected August 2023?
- d) No service safety seals.
- e) The heavy-duty fire extinguisher vehicle bracket had no safety pins in it at all or service safety seals and it was headed into some rough terrain.

I suggest that if the person who carried out this work had been through a proper NZQA training programme and was a graduate of the Level 3 HOFFE qualification, these discrepancies would not have occurred.

Our next meeting is on the 16th of July and remember you can attend either in person or from wherever you choose via a video link.

Have a great month.

Kind regards,

Steve Smith,
HOFFE SIG Chair 2020/2021

Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

As we have just celebrated the shortest day of the year, it is important to consider the environment when carrying out trial evacuations. Many organisations choose to carry out early morning drills so their night shifts can be included, whilst this is encouraged an assessment should be considered to ensure there is sufficient lighting moving from the building to the assembly area, and any vehicles operating in the area can clearly see the occupants.

Recently Fire and Emergency NZ demonstrated a 'live burn' house fire, this was widely published via television and media platforms. Many of us consider commercial building safety, we should also consider fire safety in other areas that may fall outside the requirements of the evacuation regulations.

We look forward to seeing you at the first SIG meeting of the new membership year next month, please get in contact if you require the zoom link.

Regards, **Phil Jackson**
Evacuation Consultants SIG Chair 2020/2021

Changes to Regulations on Trial Evacuations and Training Programmes

(Fire and Emergency New Zealand (COVID-19—Fire Safety, Evacuation Procedures, and Evacuation Schemes) Amendment Regulations (No 2) 2020)

The requirement for building owners to conduct trial evacuations or evacuation training programmes will be reinstated from next Monday, 1 February 2021, provided there are no physical distancing requirements in place for the area in which the building is located. Specific exclusions have been included in the changes to accommodate those buildings which are in use as Managed Isolation and Quarantine Facilities.

Building owners are not expected to resume trial evacuations or evacuation training programmes immediately the changes come into force. To work out when the next trial evacuation or training programme notification is due, you calculate a 6-month period that excludes the time from 25 March 2020 to 31 January 2021.

This means, for example, if a building was due to have a trial evacuation conducted by 10 April, 17 days after the suspension began, there will be a requirement to conduct a trial 17 days after the changes take effect which will mean 17 February 2021. This is provided there are no physical distancing requirements in force.

If you have any questions, please contact the Fire Information Unit on 0800 347 346 or email fireinfo@fireandemergency.nz

Inspectorate SIG Update

» Author **Stephen Ridder** – Inspectorate SIG Chair

Recently I had the opportunity to attend the FPA NZS4512:2021 seminar. It was pleasing to see high levels of engagement and attendance. Like the NZS4541:2020 seminars put on by the FPA the fire alarm sessions are also being attended by senior technicians. I applaud those companies who are investing in the professional development of their site staff.

It is important for all of our industry that quality training is provided to the staff in the field. While there is no getting away from the fact that training does cost one cannot quantify how much is saved when a field technician realises that they need to do something different to comply with the current standard. As inspectors we often hear the expression “But we have always done it this way”; attending training is an important pillar in breaking that thinking. An equally important pillar is reading and considering what is written in the revised sprinkler and fire alarm standards.

For a long time our industry has struggled with formal education paths and training. Training is so often a senior member of staff training the new person; the problem this creates is one person’s faults and bad habits are passed along. With the New Zealand Diploma of Engineering (NZDE - Fire) now available there is yet another education path available to our industry. Between FPA seminars for ongoing professional development, the new NZDE strand and the existing New Zealand Certificates (Fire Protection) there are a multitude of education paths available. I would encourage members to take advantage of these training opportunities.

Passive Fire Protection SIG Update

› Author **Justin McEntyre** – Passive Fire Protection SIG Chair

BUILDING (Building Products and Methods, Modular Components, and Other Matters) AMENDMENT BILL

The Government has recently passed the first phase amendment to the Building Act 2004 with the introduction of Building (Building Products, and methods, Modular components and other matters) Amendment Bill. Effective from 8th June 2021.

The Building.govt.nz website states that this is the first phase in an effort to make the Building and Construction Sector more efficient, provide greater robustness of products and improve trust. Future phases will look to tackle LBP scheme and Engineers.

The key changes are:

- › Provide minimum information on product supply to allow better informed decisions
- › Introduce a minimum framework for modern methods of construction – such as prefabrication
- › Strengthen the product certification system (Codemark)
- › Increase penalties that can be imposed upon **Individuals** or **Organisations**.

Specifically information that a Manufacturer or Supplier must provide is:

- › a description of the product;
- › details of the supplier, including contact information;
- › information on the scope and limitations of use for the product;
- › design and installation requirements, and maintenance requirements;
- › a declaration of whether the product is subject to a warning or ban.

Any increase in standard in the Construction industry is a good thing and the implications upon our specific industry will be very relevant and immediate.

More information is available on the Government website found here. I encourage everyone to read through & consider the changes and implications they will have on your individual role or organisation.

<https://www.building.govt.nz/getting-started/building-law-reforms/> 

Kind Regards, **Justin McEntyre**
