

# Industry Update

» JULY 2021 ISSUE

## WELCOME

*Welcome to July's newsletter.*

We have now rolled over into our new membership period of 1 July 2021–30 June 2022, so I have a few quick updates in this regard. It is pleasing to see the strong response to our renewal process, where companies check and return a declaration that their insurance cover and staff numbers are correct based on membership requirements. It is worth explaining that we instituted this process to ensure that all companies are paying the correct membership fees and to remind the directors of these companies of the code of ethics and insurance requirements to retain membership.

Scott Lawson

The process is working well, and several companies have now increased their membership tier to reflect growth in staff numbers. It is also great to see continued interest in joining the association, with several new applications working their way through the provisional membership process. It is also worth pointing out that if companies resign from the association and then wish to re-join in the future, the new membership process means coming back in as a provisional member and paying an administration fee on top of the membership fee. The reason for this is that we have had some members resign for a year then seek to re-join when they realise that membership can assist their independent qualified person (IQP) renewal process. This has been a very very small number, but the new process is to try and stop this practice and not to disadvantage members that join and remain members for the life of their company.

### FireNZ Delegates Prospectus Released

The FireNZ committee (Society of Fire Protection Engineers, Institute of Fire Engineers, FPANZ) are pleased to announce the first release of the delegates' brochure for FireNZ 2021, which is being held in Rotorua on 27–29 October.

We have also released more information about the Gala dinner and FireNZ awards evening, and tables are already selling fast. It is worth noting that event logistics mean there are constraints on the numbers at the Gala dinner this year, so prebook your table or seat at this event to ensure you don't miss out. The master of ceremonies will be Te Radar, and the event is being held at the Skyline Stratosfare Restaurant & Bar. Transport to and from the FireNZ conference will be provided for attendees. The location, high on the side of Mount Ngongotahā and overlooking lake Rotorua, is

stunning, and your ticket will include the gondola ride up to a spectacular buffet dining experience, making this great value for money.

Nominations for the industry awards are still open for another two weeks, and details and the nomination form can be found on the FireNZ website:

[www.firenz.org](http://www.firenz.org)

### Update on Seminars

We have received a great response to the continued roll out of the NZS 4512 seminar and the first Passive seminar. As I pen this update, we have just completed two more seminars in Auckland and Christchurch and are due to run the last two seminars in Wellington

FPANZ PLATINUM MEMBERS

on 2nd and 3rd August. In total, we will have run ten seminars in the past two months, and these have all been sold out. The real value to industry with these seminars is the ability for groups to be educated, to network, and to have questions answered. During these seminars, participants have let us know about other topics they would like to be covered, so we do encourage members to drop us comments and suggestions for other seminars so we can work on delivering more on topics that will benefit you or your staff. We are hoping to announce more details soon on short webinar updates that will be supplementary to the seminars we have just run.

## Communication to the Industry

Like many organisations, we are constantly looking for ways for ensure we can communicate with our members and their staff. We realise that some companies prefer to have a single point of contact to review and disseminate information to their staff, but we also find that this sometimes causes a bottleneck and people miss out on updates. The best method for staying up to date on what the association is working on and upcoming events is via our monthly newsletter. The more people from each member company who receive our newsletter, the higher the chance of

industry updates being communicated within your company. With this in mind, we welcome you to send us any company contacts who would like to receive our newsletter, and we will add these to our distribution system. The process to do this is fairly simple: supply the information below and email it to [info@fpanz.org](mailto:info@fpanz.org).

Email	First Name	Last Name	Company

## New Members

would also like to welcome on board the following new provisional members

- » **Fire TS Laboratory** – Provisional Member Silver
- » **RH Fire Ltd** – Provisional Member Bronze
- » **Delta Fire Ltd** – Provisional Member Bronze

Until next month,

Regards,  
**Scott Lawson**  
Chief Executive Officer, FPANZ

## Use of FPANZ Logo

**Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo.** This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email [info@fpanz.org](mailto:info@fpanz.org)

**If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.**

## Advisory Notice – Best Practice

### Misleading behaviour if 2151B detectors are incorrectly installed

An alert member has discovered potentially-misleading behaviour with System Sensor model 2151B Conventional Smoke Detectors if B401 Bases are installed incorrectly.

This issue occurs when the Red (+ve) zone circuit cables are wrongly wired to the B401 Base's Remote Indicator terminal (1) instead of the +ve terminal (4).

If wrongly wired at installation, as described above, the detector's red LEDs will blink, and the fire panel zone circuit will appear normal. When it senses smoke, however, a wrongly-wired detector will latch into alarm (with its red LEDs on steady), but the fire panel will not go into alarm.

This issue is believed to affect 2151B, 2151BPI, and 2151BAUS detectors only, and has been confirmed with several models of fire panel. All suppliers with relevant FPANZ Alarm Register listings have been advised.

While unfortunate, this behaviour under abnormal conditions is not believed to contravene any requirements of the detector's Compliance or Listing. When wired correctly by the installer, the detectors behave correctly.

FPANZ cannot over-stress the importance of thoroughly performing commissioning and regular testing procedures, as has been highlighted in the recent *Fire Alarms Best Practice* workshops. In particular, NZS 4512 clause 603.3 smoke testing to ensure that *“both the device and the zone control unit operate correctly”*.

NZS 4512 clause 504.1 requires commissioning testing to verify *“correct operation and function”* and that all detectors are in circuit. In this instance, the LED blink alone cannot be relied upon to detect miswiring.

While at least 20% sample testing is required by clause 504.2, best commissioning practice would ensure that every installed smoke detector is capable of triggering the alarm system into the fire condition.

AN001 – 28<sup>th</sup> June 2018

# HOFFE SIG Update

› Author **Steve Smith** – HOFFE SIG Chair

Well, this year is flying by fast – in saying that thanks to COVID we are now enjoying the 2020 Olympic Games, confusing or what???

It was pleasing to see that we had a greater service company presence at the last HOFFE group meeting and also that more people are using the “Zoom” online option to join the meeting.

One of the interesting points raised by a member during our meeting was the issue of New Zealand being a signatory to the World Trade Organizations agreement on Technical Barriers to Trade (TBT). This is a document which can be sourced from Standards New Zealand website and states “The TBT Agreement contains obligations which seek to ensure that regulations, standards, testing and certification procedures do not create unnecessary obstacles to trade.” It goes on to state that as an WTO member, governments are required to notify the WTO of any proposed measures that constitute a technical barrier to trade.

Under the Equivalence heading it states *“Members are required to give positive consideration to accepting other members technical regulations as equivalent to their own, even if the two differ. The proviso is that the importing member is satisfied that these regulations adequately fulfil the objectives of their own regulations.”* At the risk of getting ahead of ourselves, the potential of this is that some of the barriers that have existed for bringing in products from reputable sources may be able to be eased, which could be significant!

On the NZQA training front we were given some updated numbers at this month’s Council meeting which showed that the free fees initiative is continuing to encourage people to sign up for qualifications, this is great to see and this opportunity benefits both the graduate and our industry.

Have a great month, our next HOFFE group meeting is on the 24th September so please put it in your calendar and participate either in person or Zoom in on line.

Have a great month.

Kind regards,

**Steve Smith,**  
HOFFE SIG Chair 2021/2022

## Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

There has recently been increased interest in developing evacuation procedures at the design stage of some buildings. This helps the end user groups better understand the expectations of how the occupants would operate during a smoke event investigation phase through to and including a full building evacuation. It also allows for consideration around design and location of equipment such as evacuation chairs and hand operated fire fighting equipment. Much of this equipment is added following the design, and the opportunity to recess or properly house it is lost.

Developing a procedure at an early stage also allows the evacuation consultant to have an input into the building and alarm design and to develop a deeper understanding of how the system will perform when it comes to running fire drills and delivering training as part of the evacuation scheme maintenance. It also provides the opportunity to collect information that is required for the scheme such as a schedule of hazardous substances.

We also find that where the procedure is developed early, FENZ have an opportunity to add comment either from an engineering perspective to support the building design, or from a fire risk management point of view. As the local fire risk manager currently has final sign off with the scheme applications it makes sense to invite them to contribute their thoughts towards the procedure.

Regards, **Phil Jackson**

Evacuation Consultants SIG Chair 2021/2022

## Changes to Regulations on Trial Evacuations and Training Programmes

(Fire and Emergency New Zealand (COVID-19—Fire Safety, Evacuation Procedures, and Evacuation Schemes) Amendment Regulations (No 2) 2020)

The requirement for building owners to conduct trial evacuations or evacuation training programmes will be reinstated from next Monday, 1 February 2021, provided there are no physical distancing requirements in place for the area in which the building is located. Specific exclusions have been included in the changes to accommodate those buildings which are in use as Managed Isolation and Quarantine Facilities.

Building owners are not expected to resume trial evacuations or evacuation training programmes immediately the changes come into force. To work out when the next trial evacuation or training programme notification is due, you calculate a 6-month period that excludes the time from 25 March 2020 to 31 January 2021.

This means, for example, if a building was due to have a trial evacuation conducted by 10 April, 17 days after the suspension began, there will be a requirement to conduct a trial 17 days after the changes take effect which will mean 17 February 2021. This is provided there are no physical distancing requirements in force.

**If you have any questions, please contact the Fire Information Unit on 0800 347 346 or email [fireinfo@fireandemergency.nz](mailto:fireinfo@fireandemergency.nz)**

## Inspectorate SIG Update

› Author **Stephen Ridder** – Inspectorate SIG Chair

As inspectors we come across situations that do make us wonder. Lack of coordination can give the contractor, inspector, and the certifier a real problem in finding the right solution and then implementing within the remaining time in the construction programme. In many cases it is not lack of coordination by the fire contractor but other trades diverting from the agreed plans.

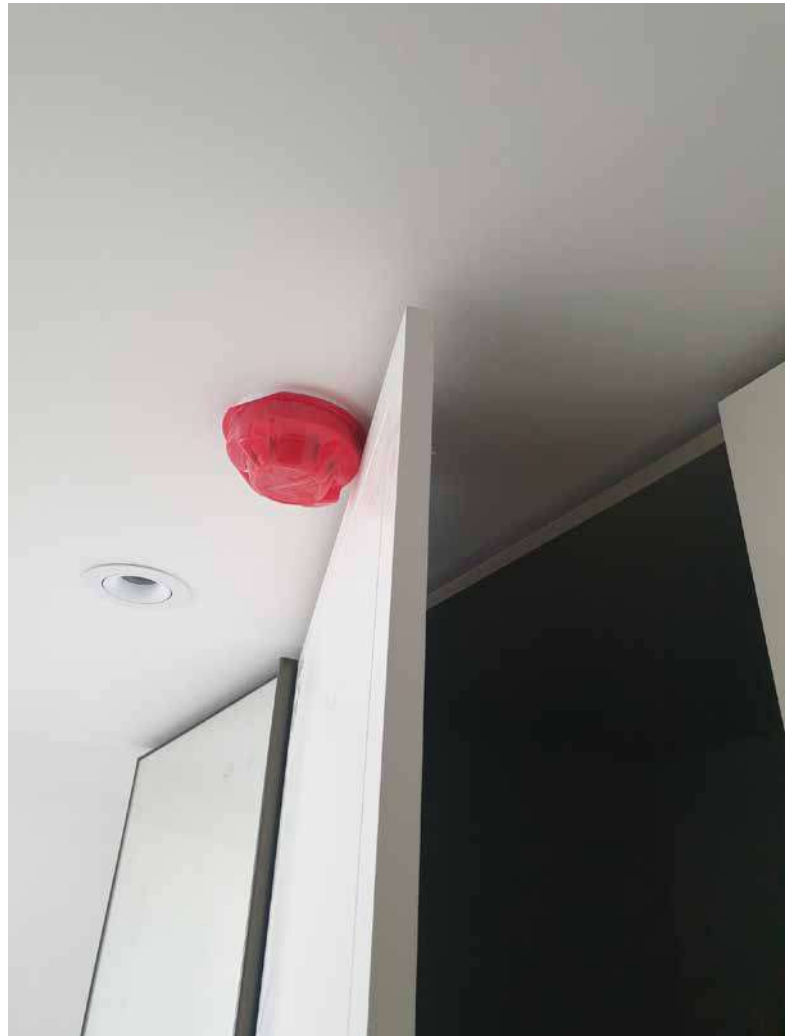

While the field technicians have normally resolved a problem such as a smoke detector clashing with a full height door other clashes may not be immediately obvious. My observation is the jobs that the designer has been involved with the site supervision usually result in more involved problems being spotted earlier, which then gives all parties more time to find the best solution.

As far as modification of listed hardware is concerned it is fairly certain that the manufacturer would not endorse the aftermarket modification that the fitter has done to the sprinkler head. While this photo is from an international forum New Zealand is not immune to such practices; I'm aware of a similar modification having been found twice here. Technicians and supervisors with personal integrity are what it takes to resist such temptation.

Regards,

**Stephen Ridder**

Inspectorate SIG Chair 2021/2022

# Passive Fire Protection SIG Update

› Author **Justin McEntyre** – Passive Fire Protection SIG Chair

## INTUMESCENT COATINGS CODE OF PRACTICE – FIRST YEAR REVIEW:

The Intumescent Coatings Code of Practice has been released for a little under a year and has had a profound impact on the industry across the country.

We now regularly see:

- › Early design consideration regarding Intumescent coatings
- › Competency of applicators being assessed
- › Communications between all related project parties regarding Intumescent Coatings
- › QA documentation and control
- › BCA's increasing their knowledge and expectations in this space
- › Fire Engineers increasing their knowledge in this space
- › Main Contractors giving the trade the respect it deserves

Whilst not every project across the country will be perfect yet – the industry is a long way ahead of where it was this time last year & before that.

With that the first annual review has commenced with Shane Wyatt establishing a Working Group to consider anyone's feedback & any enhancements we can make to the document. I'd encourage any related participant with a comment to make a submission so we can review & issue an updated version with any amendments later this year. Please do so by emailing to: [info@fpanz.org](mailto:info@fpanz.org) – subject heading "INTUMESCENT COATINGS COP – REVIEW"

Kind Regards, **Justin McEntyre**  
Passive Fire Protection SIG Chair 2021/2022

# FIRE INDUSTRY AWARDS DINNER

28 OCTOBER 2021

STRATOSFARE RESTAURANT & BAR, SKYLINE, ROTORUA

**fire NZ 2021**

This year the FireNZ committee wish to initiate a number of annual awards that become recognised as being representative of the entire fire industry and create a legacy that becomes an aspiration for achievement.

***“The fire industry awards represent the best of the fire industry and recognise those that contribute to achieving a safer New Zealand”***

We are delighted to announce that nominations are now sought for several awards to be presented at this year's FIRENZ Gala Dinner, 28 October being held at the Skyline Rotorua.

For more information please visit [www.firenz.org](http://www.firenz.org)
