

Industry Update

› AUGUST 2021 ISSUE

WELCOME

Welcome to August's newsletter.

Well, level 1 restrictions were good while they lasted, and no doubt most of us hoped the worst of the COVID-19 scenario was behind us. That was until the 17th of August, when a new COVID-19 case was found in the community. This was quickly followed by a level 4 lockdown, as the government had already indicated would be the likely first response to any community outbreak. So, once more we find ourselves in the scenario of lockdowns, restrictions, and interruption to most aspects of normal life. Obviously, this has considerable impact on business and all our members.

Scott Lawson

With the announcement that we were to go into lockdown once more, we revisited our existing COVID-19 position statements to see what needed to be updated. This involved much reading of government websites, discussions with Ministry of Business and Innovation (MBIE), and fact checking our position statements to ensure we were giving our members the latest information and clarification on essential work. We were also quick to communicate information received from MBIE to our members via email and the level 4 position statement on our website.

In the coming week, we are also working to update all COVID-19 position statements to ensure that they too provide the most accurate information and terminology being used by government. Given the country is going to be split between alert levels, we are waiting for the most recent advice from government on what changes, if any, are going to be announced for level 3 or 2. Our mission is to ensure we keep the COVID-19 position statements as accurate as possible, so—given how quickly and frequently the information we receive changes—please check to make sure you are using the most recent versions, these are always the ones from our website.

It is important to ensure that your staff are also kept up to date with the latest information on working (where possible) in the different alert levels. It is helpful to make sure your staff have access to the COVID-19 position statements and information from reliable and reputable sources such as the COVID-19 and MBIE websites. Remember, we are still working, albeit remotely, so if you need assistance, please drop us an email and we will be happy to assist where we can. In the background, we continue to focus on the main points that are important to our members during this current outbreak.

NZS4512 Seminars Complete

Luckily, we completed the last two seminars in Wellington before the latest COVID outbreak. This means we delivered nine of these around New Zealand to some 350+ people. Although we four presenters (David Prosser, Craig Barnett, Jason Godsmark, and myself) are certainly glad to put the suitcases away for a while, it was great to meet so many FPANZ members again. We had some great interactions with audiences, and it was a good opportunity to share updated standards and knowledge and to undertake some networking.

New Members

I would also like to welcome the following new provisional members to the association.

- › Reliance Fire Protection Ltd
- › Cubicon Interiors Ltd
- › Alpha Fire Limited
- › Wormald

Until next month, keep safe and let's hope the lockdown results in the swift reduction in infection numbers needed to drop down the alert levels.

Regards, **Scott Lawson**
Chief Executive Officer, FPANZ

Recent Determinations

MBIE have published two determinations, which impact on the fire protection industry.

2020/029: Regarding the issue of a notice to fix for building work to a sprinkler system carried out without a building consent

The first covers work carried out to partially strip out a sprinkler system, which was designed to ordinary hazard group 3 criteria. After the work was completed, the area was protected by concealed space protection, to extra light hazard criteria.

2017/023: Compliance of the substitution of automatic fire sprinkler systems for heat detectors in a basement carpark

This determination agreed that substituting a sprinkler system within a car park that was required to have a type 3 thermal detection system was acceptable.

HOFFE SIG Update

Author **Steve Smith** – HOFFE SIG Chair

Well, another August lockdown, it's almost déjà vu from our August lockdown last year!!! Still at least the ABs managed to secure the Bledisloe Cup with a convincing win prior to our latest lockdown. It is familiar territory for us all now but none the less it can be an uncertain time especially when you cannot control when you return to work and some business owners and managers may not want to see you until we return to level 1. I guess there will be a lot of clean workshops!

For those either working towards or wishing to work towards a NZQA HOFFE qualification this is an ideal time to progress with this qualification by completing some of the unit standards.

At the time of writing this I am anticipating that we can still hold the September HOFFE meeting which would be good because we have potential new members wanting to join in on our meeting and important topics arising like the NZS 4503 review. As usual you can zoom into the meeting if you wish to join us via your laptop.

Stay safe & we hope to catch up soon.

Kind regards,

Steve Smith,
HOFFE SIG Chair 2021/2022

Use of FPANZ Logo

Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo. This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email info@fpanz.org

If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.

Evacuation Consultants SIG Update

› Author **Phil Jackson** – Evacuation Consultants SIG Chair

As the country has returned to COVID-19 alert level 4 it means that the ‘clock’ for completing trial evacuations and training has once again been paused. Trial evacuations should be completed again once social distancing measures are no longer required. During this time FENZ may continue to send their automated drill reminders. If you receive one of these no immediate action is required, the drill should be completed once the alert levels have changed and it is safe to do so.

Position statements for each alert level can also be found on the FPANZ homepage, these may be revised so please ensure that you have the latest version.

As a result of the impact lockdowns have had, many people are asking the question as to whether they should change their evacuation schemes that are maintained by trial evacuations over to a training system. It is fair to say that there are advantages and disadvantages to each method. However, it is important to remember that trial evacuations and training can both be carried out, and it is often beneficial to facilitate a combination of both. You will just need to ensure that reporting to FENZ reflects the method for which the scheme was applied.

I look forward to seeing you at our next SIG meeting, don't forget we have conference calling facilities so you can dial in from anywhere in the country.

Regards, **Phil Jackson**

Evacuation Consultants SIG Chair 2021/2022

Changes to Regulations on Trial Evacuations and Training Programmes

(Fire and Emergency New Zealand (COVID-19—Fire Safety, Evacuation Procedures, and Evacuation Schemes) Amendment Regulations (No 2) 2020)

The requirement for building owners to conduct trial evacuations or evacuation training programmes will be reinstated from next Monday, 1 February 2021, provided there are no physical distancing requirements in place for the area in which the building is located. Specific exclusions have been included in the changes to accommodate those buildings which are in use as Managed Isolation and Quarantine Facilities.

Building owners are not expected to resume trial evacuations or evacuation training programmes immediately the changes come into force. To work out when the next trial evacuation or training programme notification is due, you calculate a 6-month period that excludes the time from 25 March 2020 to 31 January 2021.

This means, for example, if a building was due to have a trial evacuation conducted by 10 April, 17 days after the suspension began, there will be a requirement to conduct a trial 17 days after the changes take effect which will mean 17 February 2021. This is provided there are no physical distancing requirements in force.

If you have any questions, please contact the Fire Information Unit on 0800 347 346 or email fireinfo@fireandemergency.nz

Passive Fire Protection SIG Update

Author **Justin McEntyre** – Passive Fire Protection SIG Chair

LOCKDOWN ACTIONS

Here we go again, and unfortunately for some of you lockdown is going to be a longer haul. I hope everyone is coping well with Lockdown and it is as short lived as possible.

In the meantime Lockdown has given myself more time to look at FPANZ related actions and has also give some staff around the countryside the opportunity to spend time on Competenz Level 3 training.

I'd encourage all employers to get your staff that are completing the Level 3 Qualification to really make the most of Lockdown & try get some units completed & submitted.

Study from home is a challenge if staff have children around, but it is an opportune time for staff to get time off the tools & focus on this study.

It is also important to note that Competenz are making available new registrations during Lockdown – so if you are looking at an extended Lockdown then consider enrolling any new staff that you haven't previously enrolled. Please contact Competenz via their website details to discuss this further.

In the meantime take care & look forward to catching up with some of you on various zoom meetings and at some point in the future in person.

Kind Regards,

Justin McEntyre

Passive Fire Protection SIG Chair 2021/2022

Sprinklers save the day in commercial laundry

Author **Todd O'Donoghue** | FENZ

This is a great example of the true value of fire suppression systems. Sharing success stories like the below helps dispel myths about sprinkler systems, and goes a long way helping to ensure more buildings are protected by sprinklers in the future.

AlSCO commercial laundry has its sprinklers to thank after it fully reopened less than 24 hours after a fire broke out in the evening, once staff had left for the day.

The fire, which occurred late in July, was quickly detected by the sprinkler system installed in the new building, which had been built just six months prior. The system not only suppressed the fire, but also signalled the Richmond Fire Brigade who arrived within minutes.

The fire started in mobile bins containing towels in an open area. Heat from the fire set-off three sprinkler heads directly above the area, which meant the electricity and other assets in the building were left undamaged. The fire started from the spontaneous combustion of the towels which had been exposed to massage oils, a phenomenon that is well known in the laundry industry and is unfortunately becoming a more common cause of fires.

More than 10 years ago AlSCO decided to invest in sprinkler systems in all new builds and where practical or required, they had them installed into existing plants to protect their people, and assets. AlSCO Group Manager Steve Barden says, "If we hadn't had sprinklers it would've been a total loss. We were back to business as usual the next day, after electricians ensured everything was safe."

Fire and Emergency New Zealand Risk Reduction and Investigations Manager Todd O'Donoghue says, "This is a prime example of the true value of sprinkler systems. Without it, the building could've been destroyed by the fire, which would've been devastating."

Anecdotally, Fire and Emergency hear of business owners who view sprinkler systems as an additional and unnecessary expense in building projects. "The fire at AlSCO demonstrates how sprinklers not only reduce the direct impacts of damage from fire, but also help with business continuity after an event.

"Sprinkler systems should never be underestimated by any commercial building owner," Todd says. AlSCO, even more so after this incident, recognise that these systems offer peace of mind – especially with the risk of spontaneous combustion in commercial laundries.

With 160 plants globally, AlSCO has sound processes for managing this risk including washing towels exposed to oils separately with a specific formula, and temperature checking them during the cool down period. While this was strictly followed by staff, this demonstrates that risk still exists and a sprinkler system provides crucial protection.

Damp towels and a wet floor in the concentrated areas where the fire occurred.

Bins of towels where the fire occurred, and was contained by the sprinklers.

Contractor fined for theft of mains water in Auckland

Author **Todd Niall** | Stuff.co.nz | First published 16 August 2021

A civil contracting firm has become the first to be convicted of stealing water from Auckland's supply network, and has been fined \$4900.

Watercare said Powerhouse Civil took significant volumes of water through fire hydrants in March and again May 2020, despite being warned after the first instance.

Auckland Council's water company took the prosecution amid rising numbers of suspected water thefts, which have doubled in three years.

An unauthorised connection to Auckland's water network using an unapproved standpipe.

The Drury-based firm admitted four charges and was convicted in the Auckland District Court for breaches of the 2002 Local Government Act, the 2015 Auckland Council Water Supply and Wastewater bylaw and the 1956 Health Act.

Auckland Mayor Phil Goff said he hoped the prosecution would send a strong message and clear reminder that theft from the network will not be tolerated. "When someone illegally accesses our water network, the potential for our drinking water to be contaminated by backflow poses a serious health risk," Goff said.

Watercare dealt with most illegal takings through settlements and has recovered nearly \$1 million dollars from 359 instances over the past three years. In one case, a firm used 18 million unpaid litres, meaning the company would owe about \$28,620.

Watercare said theft from hydrants can also affect a neighbourhood's water pressure and restrict flow available for firefighting. "It's not possible to provide an exact figure for the volume of water stolen as – by its nature – it is unmetered, and we generally won't know how long it's been in place," Anin Nama, general manager of asset management, told Stuff in March.

However, the number of known cases rose from 70 in 2018 to 178 in 2020.

A recent board report showed 105 reported cases so far in 2021, with 48 confirmed and charged for, and 57 still under investigation. It said more critical than the loss of revenue was the risk to public health posed by unauthorised connections to the network, into which contamination could flow.

Calendar year	Total cases	Commercial cases	Residential cases
2018	70	1	69
2019	111	25	86
2020	178	52	126

Table of water theft cases investigated by Auckland's Watercare

Low-level restrictions remain in place and, despite supply boosts over the past year, water dams are 62 per cent full, compared with an historic norm of 85.5 per cent.

The latest significant addition was the commissioning of an expanded treatment plant at Tuakau in July, allowing an extra 50 million litres a day to be used. The crackdown on the illegal taking of water has occurred as Auckland emerges from its most acute drought since the supply crisis of 1993-94.
