

Commentary

Scott Lawson

Welcome to August's newsletter...

Our focus this month is firmly on FireNZ, as it is less than 4 weeks away. However, I still have plenty of other general business to update you on.

FireNZ

This year's FireNZ is shaping up to be another great event. Most exciting is the quality of international speakers we are fortunate enough to engage. Local speaker content is the bread and butter of the conference, but the key separator between FireNZ and other events is our ability to secure the highest-calibre international experts. This year, we are delighted to welcome five highly specialised experts who will each present on both days on two separate topics. The exhibition is a great size too, with over 45 stands now sold. This is a great result for a conference held outside of the main centres.

Remember, you can keep up to date with all the events at www.FireNZ.org, and there is still time to enrol your staff to attend. We strongly encourage our members to consider staff development and allow staff to attend parts of FireNZ, whether that be the tradeshow or even a single day of speakers. If you have any questions, please feel free to contact us at info@fpanz.org. 

Members' Meetings

I am really pleased to advise that we are now in a position to hold more members' meetings around the country. A key area we wish to improve is the delivery of services to our members in parts of New Zealand outside of Auckland. In August, we had a members' meeting in Christchurch, and turnout was great, with nearly 50 people between the two separate sessions we ran. We will have three more members' meetings in November and will confirm the Christchurch and Wellington dates closer to the time. If you have any suggestions on topics you would like presented at these meetings, please do let us know.

Careers Conference

Another initiative we have been working on alongside the industry training is developing relationships with careers advisors. The benefit of this is that we will be able to offer career pathways into the fire protection industry. We attended a conference in Wellington earlier

in the year, which was helpful in getting information on how to engage and where to focus our time and effort. We have now joined forces with the Institution of Fire Engineers (IFE), Society of Fire Protection Engineers (SFPE) and Fire and Emergency NZ to display at the November Careers and Transition Education Association (CATE) conference together with more than 600 careers advisors from around New Zealand. This is part of the considerable effort we are putting into attracting school leavers to our industry. These sorts of initiatives take time but will pay off in the coming months and years.

Audit of the Association

We are required to have our accounts audited annually to ensure compliance and to give an independent review of the organisation to its members. I am pleased to say we have just about completed this process and will provide a full copy of the auditor's report at the AGM, as we do each year. The audit is not just a review of the accounts; all our processes are evaluated, including compliance and delivery of services. We engaged Crowe Horwath to conduct the audit last year and again this year.

Passive Equipment Register

We are pleased with the uptake of the passive equipment register and have continued to develop it. We are about to launch revision 3; as you read this, the latest version, including updates and a new supplier, will be live on our website: http://www.fireprotection.org.nz/online-resources/FPA_equipment_registers. 

We are also engaging with members and other users to help develop the functionality of the register to ensure it is user friendly. We welcome your input as we continue to develop the register for the foreseeable future.

Regards, **Scott Lawson**
Executive Director, FPA NZ

Event Schedule August - October 2018

26-28 September 2018	FireNZ Conference & Exhibition	Mt. Maunganui
3rd October 2018	Board/Council Meetings	
16th October 2018	Get it Right Training Seminar	Auckland
17th October 2018	Get it Right Training Seminar	Wellington
18th October 2018	Get it Right Training Seminar	Christchurch

Sprinkler Contractor Certification Process Update.

Please note that all application for Sprinkler contractor certification and renewals must be completed on the new forms. There are several changes in the listing orders and system types so please ensure you use these new forms and check you are applying for the correct listings. The new application & renewal pack can be downloaded from <http://www.fireprotection.org.nz/online-resources/aon-technical-notes> 

If you have any question please email NZ.SSC@Aon.com or fpa@fpanz.org

Passive Fire Protection SIG Update

- Author **Paul Ryan** - Passive Fire Protection SIG Chair

As most members will realise – industry awareness surrounding passive fire protection is growing all the time, which is fantastic news after so many years of negative talk. We now have some real positive action/traction!

This month has seen the publication of Auckland Council Passive Position Statement Version 2 as well as the Insurance Council Seminar surrounding Passive Fire Protection Awareness.

Even with all this good work - we still have a lot of work to do with regards to education at site level.

An incorrect comment made relating to passive fire protection – if not checked – can have catastrophic implications to projects costs and delays.

A good example was one such comment made recently by a passive construction monitor – who insisted all the cables passing through the fire seal must be at 90 degrees – both sides of the wall. Luckily the manufacturer was contacted, and further advice was provided – but if that hadn't occurred – every fire seal in this substantial development was to be removed and replaced!

Ending on a positive note - September is a big month for the FPA – we have a number of specialist passive presenters attending the FireNZ seminar (September 26th – 28th) – its going to be big and we hope you find the time to come along and stay connected with the fast changing world of passive fire protection!

- Paul Ryan

Passive Fire Protection SIG Chair 2017-18

Training SIG Update - Author **Trent Fearnley**- Training SIG Chair

Kia ora koutou katoa,

Unfortunately we have not had a meeting recently. This was due to the fact that we were waiting for the approval of a contract for the Certificate in Fire Technology course and the approval of the Diploma in Fire Engineering by NZQA. The contract for the certificate course has been delayed not by us but by the restructuring at MIT. The person who was managing the process for us has been made redundant and has not been replaced. Another person from another department has been appointed to help us but we are having to now educate this person and to help her find all the documentation. However, we are still on the case and hoping for a course in the near future.

I am happy to announce though that the Diploma has been approved by NZQA and the NZ Board of Engineering Diplomas has sent it out to Polytechnics so that they can now register to deliver it. What that means for us now is that we have 2 work streams to deliver on. Work stream 1 is to develop the criteria for assessment of existing people in the industry who wish to have their skills and academic qualifications recognised as prior learning for the diploma. Also we will need to develop assessments for those who have only part of the criteria

required for a paper. This will be done in consultation with MIT. To kick this work stream off we will be having a workshop on how to set assessments. We will be seeking representation from experts within the other SIG groups for this work.

Work stream 2 is to assist with developing the course content to meet the learning outcomes of the diploma. MIT is teaming up with a couple of other Polytechnics to share the load for this. All courses will then be made available to the Polytechnics to deliver online. What this means is that it does not matter which one you go to it will be the same course. A bit more of a cost-effective way to do it. Once again we will input from SIG's for the content. It is a bit of work but by sharing the load it will be manageable for all 'He rau ringa e oti ai'. This is an exciting next step and as you can see we are still progressing well with our Pathway.

Nga mihi, – Trent Fearnley
Training SIG Chair 2017-18

Inspectorate SIG Update

Author **Jason Godsmark** - Inspectorate SIG Chair

Another month has gone, the FPA conference is just around the corner and spring is upon us.

This month we have some design guidance for a common question that we as inspectors are often asked.

“When do we need to protect eaves, awnings, verandas and other similar projections on the outside of buildings?” Clause 405.2(h) provides the guidance here.

405.2 Detectors shall be installed in locations as follows:

(h)under other external appendages (such as verandas) where combustible storage is likely to be stored or a vehicle can be parked and where there is no dimension less than 1500mm.

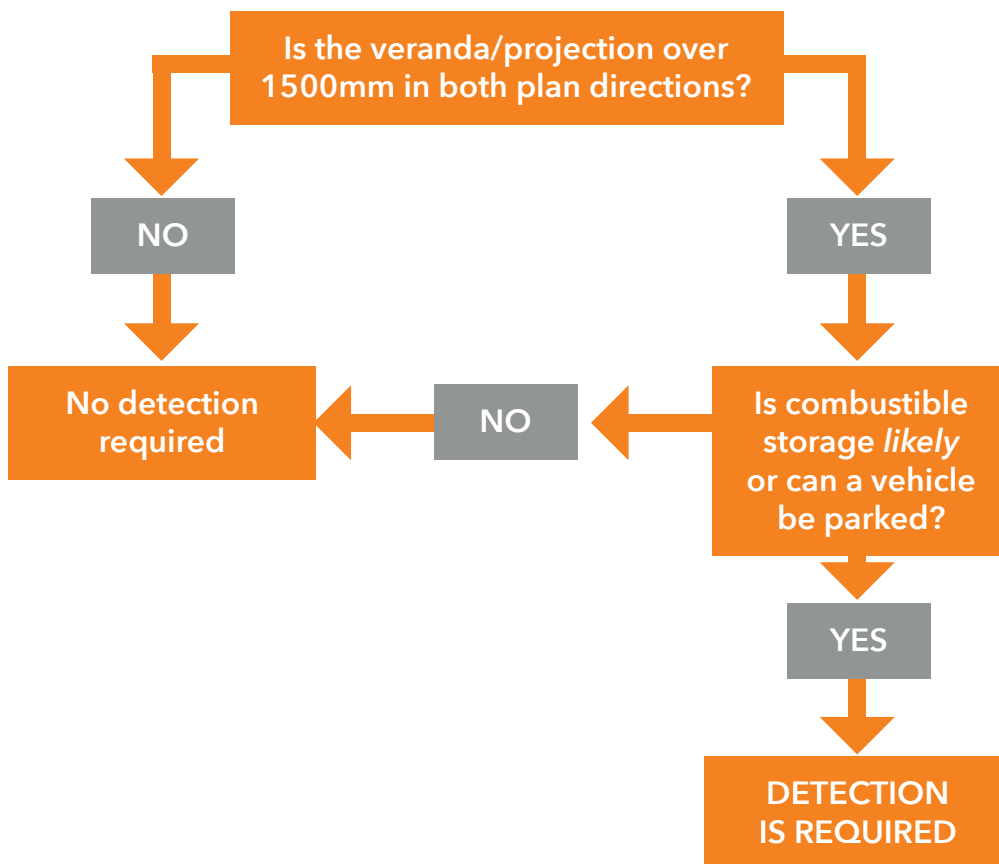

There are two key parts to this, the first while not really following correct Boolean logic is “where there is no dimension less than 1500m”, this requires **and** projections to be over 1500mm in both plan directions, if either is under 1500mm then no detection is required.

The second part to consider is “where combustible storage is likely to be stored or a vehicle can be parked” as there is an **“and”** between these parts of the clause requiring both conditions to be met.

The following decision chart can be used.

PROTECTING VERANDAS AND OTHER PROJECTIONS

– Jason Godsmark
Inspectorate SIG Chair 2017-18

HOFFE SIG Update - Author **Steve Smith** - HOFFE SIG Chair

The weather is getting warmer, mornings brighter and summer is closer. Pretty positive stuff (unless you are an Aussie rugby fan!!!)

One concern that has arisen, is that with the economic climate tightening, some people are calling for our fire safety requirements to be further diluted. More disturbing is that some of these people are from within our own industry.

An example recently was that a call was made to look at the removal of the requirement for fire extinguishers to be installed when a sprinkler system is installed. Typically the way a well set up commercial building will work is that fire extinguishers will be installed throughout the building (including the sprinkler pumphouse) as a first response option. So if it is safe to do so, it can be used to extinguish a fire and prevent the loss of people and property.

As shown by the NZFS (now FENZ) funded survey report number 148 on the use of Hand Operated Fire Fighting Equipment (HOFFE), there are definite tangible benefits to having first response fire extinguishers installed in non-residential buildings. Some of the findings in the summary report from Civic Futures included:

- a) "The report concluded that a positive cost benefit case can be made for the installation of fire extinguishers in specific types of buildings".
- b) "This study indicates that HOFFE provides significant net benefits (when applied to certain sectors) across New Zealand's non-residential buildings.

c) The net benefit (estimated at \$24.8M) is concentrated in Factories & Industrial buildings (net benefit \$18M) and restaurants & taverns (net benefit 3.2M).

d) Putting appropriate regulations in place is considered likely to lead to slight increases in HOFFE provision and could reduce fire damage costs by \$3M annually.

In the recommendation section of the report a warning is included. Put simply, a reduction in the provision of HOFFE between 5 - 15% would likely result in an increase in fire damage costs of between \$2.0m & \$5m annually.

The message from this report is consistent with that of similar studies conducted overseas. Our group also believes that removing properly installed fire safety equipment from a premises where it forms part of the protection for both people and property, cannot be in the best interests of Fire Safety!!!

Hopefully this will be seen as constructive information. I also urge those of you who have not read the report or report summary document to do so. The short form 2-page summary came out in June 2016 and has some useful information.

I hope to see a good turnout of HOFFE members at the next meeting as we have some topics that would benefit from a good group discussion.

Regards, **Steve Smith**,
HOFFE SIG Chair 2017-18

Evacuation Consultants SIG Update

Author **Phil Jackson** - Evacuation Consultants SIG Chair

Many of us have now experienced the new regulations first-hand through new scheme submissions and trial evacuation reporting. We have certainly been made aware of the frustrations that are being encountered with these changes.

Fire and Emergency New Zealand are running a workshop for our members so we can work through some of the challenges that we are presented with. I look forward to seeing some of you there.

Recently an invitation was sent out to use fire extinguishers in a virtual reality environment at Massey University. I have received some feedback from people within the industry noting some of the shortcomings of this as a tool - if you have the time please attend the session, have a go, and present your feedback to the research team so that it can be used to improve the experience.

We have received a few queries about the new regulations and fire action notice signage, unfortunately in one case a company was informed their notices were no longer legal and should replace them all immediately. Please remember that whilst new scheme applications are encouraged to meet the new signage requirements, the regulations do not require new or replacement notices to meet them until 1st January 2019

FireNZ is just around the corner, no doubt I will see many of you there. Until then please keep the queries and feedback coming via evac@fpanz.org

- **Phil Jackson**
Evacuation Consultants SIG Chair 2017-18

Two New NZS 4512 Formal Interpretations

Author **David Prosser**

“Hot off the press” are two new Formal Interpretations to NZS 4512:2010 Fire Detection and Alarm Systems in Buildings.

FI-134 confirms that EWIS systems to the new Australian Standards AS 4428.16 (warning system) and AS 4428.4

(intercommunication system) are permitted for use in New Zealand, subject to the same conditions as EWIS systems to the (superseded) Australian Standard AS 2220.

continued overleaf

Fire formal interpretations

16 July 2018

FI-134

NZS 4512:2010 *Fire Detection and Alarm Systems in Buildings* – EWIS Standards Clause 218.6

Question:

Clause 218.6 requires any EWIS providing the alerting devices to comply with AS 2220.1.

AS 2220.1 has been superseded in Australia by two new standards: AS 4428.16 in respect of the warning system, and AS 4428.4 in respect of the intercommunication system.

- 1) In New Zealand, may an EWIS complying with AS 4428.16 and AS 4428.4 be used instead of one complying with AS 2220.1?
- 2) If so, must the Evacuation and Alert signals still comply with Appendix F, as per clauses 218.6 (a) and (c), and 406.8, or may these signals comply with AS 4428.16?
- 3) Also, do the other requirements of clause 218.6 continue to apply (in respect of d.c. power supply system, battery capacities, brigade silence alarms and evacuation switches)?

Interpretation issued by the Alarms and detection group:

- 1) Yes.
- 2) EWIS Evacuation and Alert signals must comply with NZS 4512 Appendix F.
- 3) The other requirements of clause 218.6 continue to apply to EWIS complying with AS 4428.16 and AS 4428.4.

Two new NZS 4512 Formal Interpretations *cont.*

FI-135 clarifies the IP ratings required for various components of a combined Detector/Alerting Device intended for use in exposed conditions or other wet environments.

Fire formal interpretations

16 July 2018

FI-135

NZS 4512:2010 *Fire Detection and Alarm Systems in Buildings* – Clauses 216.11 and 218.2

Question:

Clause 216.11 requires that detectors intended for use in exposed conditions or other wet environments shall have protection of at least IP54 (or encapsulation). Clause 218.2 requires that alerting devices used in a similar environment shall have protection of at least IP24.

For the case of a combined detector and alerting device intended for such use:

- (1) Does the entire device require a rating of at least IP54 (or encapsulation)?
- (2) Or does each component of the device have to meet that component's required rating, i.e. IP54 (or encapsulation) for the detector component and IP24 for the alerting device component?

Interpretation issued by the Alarms and detection group:

For a combined Alerting Device/Detector intended for use in exposed conditions or other wet environments:

- 1) The Detection component requires protection of at least IP54 (or encapsulation).
- 2) The Alerting Device component requires protection of at least IP24.
- 3) Any part(s) of the device shared between the Detection and Alerting functions requires protection of at least IP54 (or encapsulation).

Auckland Council Fire Stopping Position Statement

The Auckland Council Fire stopping position statement is now available on its public website and can be found on the following link:

<https://www.aucklandcouncil.govt.nz/building-and-consents/understanding-building-consents-process/ask-for-guidance/Documents/ac1825-position-statement-fire-stopping.pdf> 

Version 2 includes a number of additional sections and more information clarifying Councils expectations with regards to documentation, installation and inspections.

Hopefully this will be of no surprise to FPA members and will help to support the industry to improving the delivery of fire stopping and maintenance of passive fire protection features.

fire NZ 2018

FPANZ / SFPE One-Day Seminar

Wednesday 26th September 2018

The Fire Engineering Design & Construction Cycle

PROGRAMME	
9.20 - 9.30	Welcome
9.30 - 10.15	FEB and Alternative Solutions (45 min) Keryn Goble (FEB), Daryn Glasgow (Alt Solns)
10.15 - 10.45	Morning tea
10.45 - 11.45	Passive Fire (60 min) FPA led – Paul Ryan
11.45 - 12.15	Fire Protection (30 min) FPA led - TBA
12.15 - 1.15	Lunch
1.15 - 1.45	Evacuation Schemes (30 min) FPA led – Phil Jackson
1.45 - 2.45	Design Coordination and Construction Monitoring (60 min) M James (Des Coord), Greg North (Const mon)
2.45 - 3.15	Afternoon tea
3.15 - 3.45	Cladding (30 min) - TBA
4.00 - 5.30	SFPE AGM

Keynote Speakers

Dr. David Crowder

Head of Fire Investigation and Expert Witness Services, BRE Group

David has overall responsibility for the fire investigation team as well as expert witness services across all disciplines in the BRE Group of companies.

He specialises in investigating fire development, the performance of fire protection measures and systems during real fire incidents, and the regulatory aspects of performance in these areas. Major fire investigations he has worked on include the Penhallow Hotel fire in Cornwall, the Atherstone-on-Stour warehouse fire, Royal Marsden Hospital, Cutty Sark and the Lakanaal fire in Camberwell.

Research projects include: fire spread in car parks, researching the effectiveness of residential sprinklers, evacuating mobility impaired people from hospitals, developing a fire protection strategy for HMS Victory, developing cost effective water misting systems for use in prison cells and a scoping study on the environmental impact of fires. He holds a PhD in the impact of fire chemistry (flammability and toxicity) in fatal fires, examined via the investigation and reconstruction of real fires.

Arnold Dix

Risk Doctor - Technical / Legal
ALARP

Arnold Dix is a passionate advocate for safety in complex built structures. With an international reputation as a disaster investigator, consultant and advisor - trained as a Lawyer and Scientist - with a professional background spanning Partnerships in some of the world's leading Law firms, a barrister and Visiting Professor of Engineering at Tokyo City University His background and professional focus is rather strange but useful. He serves on two NFPA standards (NFPA 130 and 502) at the invitation of the US for nearly 20 years, sits on the Executive of the International Tunnelling Association (UN affiliate), is a registered British Investigator, and founded the ALARP group of companies.

Niall Rowan

Chief Executive Officer, ASFP

Niall started working in fire in 1979 graduating to managing Warringtonfire's (Exova) test laboratory operations. He drafted the first twelve fire resistance test methods for CEN in the 1990s and from 2007 to 2009 he was President of EGOLF, the European organisation of fire testing laboratories and certification bodies.

In 2009 Niall became the ASFP's Technical Officer, responsible for the Association's technical output, including the recently revised Yellow, Red, and Blue Books, the ASFP Guide to Passive Fire Protection for Fire Risk Assessors and many other publications.

Niall took on the role of Chief Operations Officer at the ASFP at the start of 2017 providing leadership and direction to the ASFP's aims to ensure professionalism in the design, development, specification, installation and maintenance of Passive Fire Protection.

In early 2018 Niall became the ASFP's Chief Executive Officer where he continues to work with government, agencies and other stakeholders. He currently spends much of his time involved with fallout from the horrific Grenfell Tower fire and sits on the Building Regulations Advisory Committee which is revising the statutory guidance to the Building Regulations in the wake of the tragedy.

Sean Decrane

Industry Relations, Building & Life Safety Technologies, UL LLC

Sean DeCrane retired as a 25+ year veteran of the Cleveland Division of Fire. He rose through the ranks and serving in various roles including the Director of Training and Acting Chief of Operations. He retired as a Battalion Chief covering Cleveland's Westside

Sean has been very involved in the research at Underwriters Laboratories and the National Institute of Standards and Technology. He serves on the UL Fire Council, is a member of the UL Fire Fighter Safety Research Institute's Advisory Board and is currently on a number of technical panels for research and standards.

Chief DeCrane also represented the International Association of Fire Fighters in the International Code Council process and has served on the 2009, 2012, 2105 and 2018 Fire Code Developing Committee and as Chair for 2015 and 2018. Sean served on the NFPA 1 Technical Advisory Panel, NFPA Research Foundation on Tall Wood Buildings and is serving as the Chair of the fire Test Work Group for the ICC Tall Wood Building Ad Hoc Committee.

Sean has been awarded the 2015 UL Council Member's Achievement Award, 2014 Fire Equipment Manufacturer's Fire Safety Advocate of the Year Award, the 2013 International Association of Fire Chiefs Life Safety Award and the 2012 ICC-IAFC Life Safety Advocate Award. Sean has delivered a number of keynote addresses including the 2015 Fire Department Instructor's Conference. Currently Sean has been appointed as the UL Manager for Industry Groups and association and Professional Organizations.

Jonathan Barnett

Technical Director, RED Fire Engineers, Australia

Jonathan has over 40 years' experience in fire safety engineering. Previously a professor of fire engineering and mechanical engineering at WPI in the US, Jonathan has researched topics such as computer modelling of fire, structural fire protection and the development of tests for firefighting personal protective equipment. Today he is the Technical Director for RED Fire Engineers in Australia.

As an expert witness, Jonathan has testified on fire events throughout the world. In 2001

Jonathan was a core team member for the Building Performance Study that investigated the events of 9/11.

Currently, Jonathan is the national chair of Engineers Australia Society of Fire Safety and a Subject Matter Expert for The Australian Building Codes Board. He is also a founding and life Member of the Society of Fire Protection Engineers (NZ Chapter).
