

## Commentary

*Welcome to March's commentary...*

Scott Lawson

### Halon Recovery Project

Well, it's been a long road, but the halon recovery project is now complete. This has been a challenging project, and we have appreciated the support of FPANZ members in the safe removal and disposal of over 3.5 tons of this ozone-damaging substance. We are also in the process of working through how we can continue to assist members with the ongoing safe collection of any last halon that turns up on the odd site or via the public. Please contact me directly as and when you come across halon.

### "Get it Right" Training Seminars

We have completed the first of these seminars for 2018, and it was a great success; please see page "Seminar Series Success" on page 9 for more details. We aim to deliver two or three more this year. Topics are still being worked on, and we are also exploring options to enable us to deliver these seminars electronically for members outside of the main centres. If you would like to register your interest and be among the first to know about what we have coming up, please send us an email with the following information: company, your name, email address, and types of training interests, i.e., sprinklers, alarms, passive, etc.

### NZS4541 Revision Committee Nominations

Registrations of interest are now open for the upcoming selection of the revision committee for NZS4541. FPANZ has three positions on this committee, and we are asking our members to apply to act as the following representatives:

- Representative of the general FPANZ membership (with appropriate sprinkler expertise)
- Representative of the sprinkler contractors special interest group (SIG)
- Representative of the inspectorate SIG

All nominees need to supply a brief CV and complete the appropriate standards paperwork, which we can supply. Each SIG will review and nominate their own representative, and the FPANZ council will select the general representative.

### Website & IT Updates

We have been busy this past month with significant IT upgrades that will enable us to better communicate with our members and work far more efficiently internally. The association has now migrated our services and upgraded some of our outdated hardware. Members won't see most of the changes, but I feel it is important to share information about how we are future proofing the association and how it will help improve results for our members. We will be testing some of the new services and features in coming weeks and will update you on how they will enable more interaction and increase our ability to deliver added services to more remote members outside the main centres.

FPANZ now also has a new domain name, which means our email and website addresses will move from "fireprotection.org.nz" to the far simpler "fpanz.org". This has already happened, and our old website and emails continue to automatically redirect to our new domain. We will phase out the old domain in due course.

### FPANZ Equipment Registers

We are really pleased to launch the next in our range of FPANZ-approved equipment registers. The intent of these registers is to educate the sector and wider community about products that meet the appropriate standards for their type. On the back of the very successful Fire Alarms Register, we are pleased to launch the Passive Equipment Register. The SIG chair provides more of an update on page "PASSIVE PRODUCT REGISTER LAUNCH!!" on page 4. Then, hot on the heels of the Passive Equipment Register will be the Hand-Operated Fire-Fighting Equipment Register and the Sprinkler Equipment Register. These will all be found on our website for free download: [http://www.fireprotection.org.nz/online-resources/FPA\\_equipment\\_registers](http://www.fireprotection.org.nz/online-resources/FPA_equipment_registers) 

### New Members

I would like to welcome the following new members this month:

- Fire Risk Sprinklers Ltd
- Total Industrial Solutions Ltd
- Southgate Fire and Safety 2018 Ltd
- MBM Fire Protection Ltd.

Welcome on board and it is great to see our membership base continue to grow.

Regards,

**Scott Lawson**  
Executive Director, FPANZ

## FPANZ Team-Up Calendar

We now have a great online calendar system for keeping an eye on events that are relevant to our industry and FPANZ. This can be accessed a number of ways, from our website, or from the link below, or you can even subscribe to the ical links below and your own calendar will be updated with the events and changes if you subscribe to them. Presently we have four calendars the web address to view them online is:

<https://teamup.com/ksc0886ddcfa7efb7b> CLICK TO VIEW

The ical links are below, you can add the ones you want and need or All calendars. For instructions on how to link these to outlook, or other calendar applications please click

## Passive Fire Protection SIG Update

- Author **Paul Ryan** - Passive Fire Protection SIG Chair

### PASSIVE PRODUCT REGISTER LAUNCH!!

The FPANZ are proud to announce the launch of Australasia's first ever trade association register of passive fire protection products tested to AS 1530.4-2005/2014 and assessed to AS 4072.1-2005/2014.

The register has been created to help Architects, Fire Engineers, Councils, Installers and IQP's specify, consent, install and inspect NZ Building Code Compliant products.

For many years industry had debated the issues surrounding passive fire protection non-compliance – but very little was done to put measures in place which would improve the state of the industry – around eighteen months ago - FPANZ passive fire protection special interest group set out three main improvement projects that would help raise the life safety bar – and the launch of the FPANZ passive product register is the delivery of the first of the project!

The register is open to both FPANZ members and non-members to list their products.

Its self-regulating – each registered supplier signs an undertaking that listed products are fully tested to AS1530.4-2005 (& 2014) or assessed to AS 4072.1-2005 (& 2014), that the test data is within date, tested/assessed at an ILAC accredited laboratory and that the reports are made readily available to industry upon request.

Any supplier / manufacturer who does not keep to the undertaking runs the risk of removal - which is a pretty big incentive!

FPANZ has already received feedback – only a few days after launch - from Architects and Fire Engineers that they will be specifying “passive fire protection products listed in the FPANZ passive product register” on their projects going forward - which is fantastic news!

So if you're a manufacturer or supplier of passive fire protection products and want join the register – please let us know.

We hope that the register will fast become the “go too” for industry wanting to ensure

code compliant products are selected.

We are already working on the next two projects – FPANZ position statements providing one technical voice to industry – instead of the situation we have currently – which is lots of different opinions coming from lots of different individuals and the other being the new NZQA level 3 and 4 qualifications for the installation of passive fire protection working alongside our strategic partners Competenz.

The end result of these three projects will mean that the Architect or Fire Engineer will be able to specify products referenced on the FPANZ register, installed by an NZQA level 3 or 4 technician backed by Technical Position statements that clarify any complexities through the process.

The FPANZ Board, Council and SIG groups work for the good of the industry – without industry support – with all the best will in the World – things wont change for the better – so please – continue supporting us and if you have any questions, ideas or want to become part of the association – please get in touch!

- Paul Ryan

## Evacuation Consultants SIG Update

Author **Phil Jackson** - Evacuation Consultants SIG Chair

As many of you are likely aware the DIA has now released information about the proposed changes to the Fire Safety and Evacuation of Building Regulations 2006, this report can be found here <https://www.dia.govt.nz/Fire-Services-Transition> 🖱️

During the last meeting it was agreed that from the Middle of April a steering group will meet to re work the existing fire evacuation consultant qualification. If you would like to be part of this group either in person, via conference call or correspondence then we welcome your input. We will also be taking the opportunity to revise the current code of practice.

I am pleased to announce that applications are now being taking for the existing evacuation consultant qualification, and welcome Jim Kelly back on board who will be managing these.

Finally for those of you who attended the last SIG meeting we are able to provide CPD points following the talk from our guest speaker.

We look forward to welcoming you to our next SIG meeting on 9th April.

– *Phil Jackson*  
Evacuation Consultants SIG Chair 2017-18

## Training SIG Update

- Author **Trent Fearnley**- Training SIG Chair

*Kia ora koutou,*

Although it is not visual our group has been busy beavering away on the detail of the proposal for the NZ Board of Engineering Diplomas for our Fire Engineering Diploma. A lot of work was put into the Purpose Statements, Learning Outcomes and Content Indicators for the 7 new fire engineering papers. The proposal is with MIT Academic Standards Committee and then forwarded on to the board. It is a slow process but it just means that there is a high standard set that we must meet.

I will be presenting to the NZBED Quality Assurance Committee on 26 March. Hopefully after that I will have some good news for everyone.

Nga mihi, – *Trent Fearnley*  
Training SIG Chair 2017-18

## Contractors SIG Update

Author **Kiran Soma** - Contractors SIG Chair

The Sprinkler Contractors SIG is calling for registration of interest from SIG members to represent us on NZS4541 revision committee.

The ideal candidate, must meet the selection criteria, and should have sufficient experience, expertise, and ability to communicate.

Given the significant financial and technical contribution SIG members make for the development of NZS4541. The mandate from the SIG, to our delegate is to inform us, represent our interest, and provide a conduit to and from SIG contractors. The SIG delegate will communicate, review, and address changes with the SIG prior to public comment stage. Issues and proposed changes should be

worked through with the SIG members, for discussion with their delegate, be it in confidence if need be.

The Delegate is expected to attend the majority of SIG meetings, and also provide written update to the SIG of NZS4541 progress and developments, on a monthly basis.

Should you wish to be considered, please submit your interest to [fpa@fpanz.org](mailto:fpa@fpanz.org), prior to end of day Friday 23 March 2018. We will be looking to finalize the delegate for submittal by end of this month.

– *Kiran Soma*, Contractors SIG Chair 2017-18

## Inspectorate SIG Update

Author **Jason Godsmark** - Inspectorate SIG Chair

I was recently asked to give a talk to a group of IQP's on what a survey is where it fits into the Bwof process and what they as IQP's should be looking for and what they need to know.

### What a sprinkler survey is or isn't.

- It is specific checks to ensure functionality and a visual check (from ground level) of the system. These checks are done using the methodology noted in the latest standard *with reference to the standard of installation*.
- It does not verify that all areas of the system are 100% compliant, they are a snapshot of the system on the day.

Sprinkler Survey reports will have three types or deficiencies listed within them

The first type are Significant/Serious Defects, These should preclude the issuing of a 12a as noted in NZS4541:2013 these are

- Deficiencies of sudden degradation of the water supply.
- An increase in the fire load beyond the capability of the system.
- External fire loads
- Unprotected areas
- Incorrectly set or faulty fire or pump start pressure switches
- Over age diesel pump set starting batteries
- Defective, damaged or painted sprinkler heads (includes concealed plate covers)
- Components subject to recall
- Any defective device that precludes ongoing testing and maintenance.
- If an area was not able to be accessed after two consecutive Biennials.

The second type of deficiencies From NZS4541:2013 are the General/valve house items which are items that are required under the relevant clauses of NZS4541/4515 but don't meet the requirements noted above. Generally these will not adversely affect the operation of a system in a fire situation.

These can include

- Areas of poor coverage due to poor spacing or minor obstructions.
- Obvious issues with Hand held fire fighting equipment. (unless sprinkler installed to BC appendix B/D).
- Labelling
- minor corrosion
- incorrect details on block plans
- other non compliances with the system *relevant to the standard of installation*.

From NZS4541:2013 "If a process to remediate deficiencies that are not serious deficiencies has commenced, then such deficiencies shall not preclude the issue of a certificate of compliance with inspection, maintenance and reporting procedures (Form 12A) provided that the deficiency has not continued for longer than 12 months since the time of first reporting"

In practice this means you have until the second Biennial is due to complete these items before they affect the 12A.

The third type is Observations and Recommendations often known as Duty of care.

Do not affect issuing the 12A for the sprinkler system at all but may note issues with other fire systems and will often note items that can be done to improve a system.

Fire alarm surveys also form part of the required tests for issuing of a 12A and NZS4512:2010 has a number of clauses which detail what issues will affect the issuing of a 12A.

- Clause 601.3
  - Notes
    - (1) A Certificate of Compliance is commonly referred to as a 'Form 12A' as defined in the Building (Forms) Regulations 2004. This is not the same as an Appendix J Certificate of Completion, issued at system commissioning.
    - (2) Significant deficiencies which would lead to a probability of system failure should be urgently attended to, to ensure that the system will operate reliably. Examples of such deficiencies include missing detectors or manual call points, or deficiencies that would significantly delay the operation of the system in the event of a fire. A Certificate of Compliance should not be issued if such deficiencies exist.
    - (3) Minor deficiencies which are in the process of being rectified should not preclude the ability to issue a Certificate of Compliance. Such deficiencies could include areas with individual detectors out of rule, a zone index that requires updating, and the like. If such deficiencies appear on subsequent inspection reports, a Certificate of Compliance should not be issued until such deficiencies are rectified.

### Common issues we see:

- Painted / Damaged / corroded / taped Sprinkler heads
- Obstructed heads
- Not enough coverage
- Badly fixed pipe work

*continued next page...*

### Inspectorate SIG Update cont.

- Flue spaces blocked in racking
- Hoffe not serviced
- Degradation of water supplies
- Large Stacks of Pallets
- Unprotected areas due to new construction (usually this has "always been there")
- Smoke/heat detectors taped up or covered
- Sounders not working

The key to both sprinkler and fire alarm surveys is that they must be done with *reference to the standard of installation*; the requirements of a later standard cannot be imposed upon a system installed to a previous version of the standard. Surveyors and IQP's need to be up to date with all versions of the relevant standards and be aware of their responsibilities in this industry of "Life Safety" that we work in.

- Jason Godsmark  
Inspectorate SIG Chair 2017-18

### HOFFE SIG Update

- Author **Steve Smith** - HOFFE SIG Chair

I imagine that like us, you are all well and are back in work mode and very busy after a few breaks during February (more at the end of this month).

We did have another productive and positive HOFFE Group meeting last month at our new venue in central Auckland, it was even more pleasing that we managed to get a few things sorted.

Within our HOFFE group we have been able to find clarify that the new Hazardous Substances and (Compressed Gases) New Organisms Regulations 2017 do require both high & low-pressure fire extinguishers (pressure vessels) coming into our country to get a be cleared and gain an Imported Gas Cylinder Test Certificate prior to being sold onto the New Zealand market. This may seem logical to most of us but previously a low-pressure cylinder (powder, foam, water, wet chemical etc) could be brought in without a clearance certificate however high-pressure cylinders required a clearance certificate!!!

Obviously this regulation becomes particularly relevant for those wanting their fire equipment to be part of our FPA product register as compliance with the HSNO regulations is one of the pre-requisite requirements to be met for an before a listing can be approved.

It is pleasing to see that the role of hand operated fire fighting equipment has not only been evidenced in the fire extinguisher usage survey but also been reflected in the information available on the FENZ website. Many thanks to people like Simon Davis, Lance Hunt, Simon Patton & all those who contributed to the survey as this recognition of the role our products play in life safety and business/property protection is well overdue.

I trust you all have a great month, our next big project for the group is the service company register which we will discuss at our next meeting.

Regards,  
- Steve Smith,  
HOFFE SIG Chair 2017-18

## SEMINAR SERIES SUCCESS

We have recently completed the first "Get it Right" sprinkler training seminar for 2018 in Auckland, Wellington and Christchurch. It was an overwhelming success, with such high demand that each location was overbooked, even after doubling the size of the Auckland session. Special thanks to our presenters, Tom Carpenter from FM Global, Mitch Buckley from Victaulic, and Chris Mak representing the Sprinkler System Certifier.

The feedback from all who attended was very positive, and the wide mix of representation from the sprinkler industry was pleasing. Along with the primary objective of ongoing industry training and continued professional development, it was a great chance for people to network and share their views on the industry.

Planning is already well underway for the next seminar, which will be fire alarms based. We aim to deliver this in late May or in June and will distribute the flyer as soon as we have the content and venues booked.

## Reducing False Alarms - A Success Story

Author **Trent Fearnley**  
- National Advisor Fire Risk Management

High on a hillside overlooking the picturesque Lake Wakatipu and the Remarkables, sits the eco-friendly Sherwood Hotel. However, it was not the location that brought this hotel to the attention of Fire Risk Management Officer, (FRMO) John Smalls, from Queenstown; it was the 27 false alarms, five small fires and one reasonably sized fire.

This building had the highest false alarm rate in the area, so John contacted the owner and began a dialogue in November 2015 to find out what was happening. The false alarms not only occurred in the hotel rooms but also in the open restaurant/kitchen area. John worked with them to build a 'False Alarm Management Plan' as well as helping to upgrade the fire alarm system to an addressable intelligent system. They worked with a local company to stage the upgrade over six months which included:

- upgrading the detectors in 15 out of 16 rooms in the lodge building to have devices and fitted cages installed to all sensors over the bunk beds to stop damage from backpackers
- upgrading the alarms in the restaurant to multi-criteria heads to prevent the smoke from the open fire and open wood BBQ from activating the alarms
- removal of toasters in rooms
- implementing a staff training programme with ongoing regular training

- upgrading the detectors in the bathrooms and hallways of the hotel blocks to work with the new analogue addressable panel
- implementing a 12-month cycled deep clean/assessment programme for the new smoke detectors.

The number of false alarms has decreased to two in 2017 and none so far this year. This is a great result for an area which relies on the response from volunteer brigades.

"The Sherwood has not rested on their laurels as they were very helpful during a recent scrub fire a year or so ago. They found rooms for all the rural firefighters (not easy in Queenstown) and gave them all a free meal in the evening. So in my mind, they are an exemplary building." - John Smalls, FRMO, Queenstown.

## Sprinkler Contractor Certification Process Update.

Please note that all application for Sprinkler contractor certification and renewals must be completed on the new forms. There are several changes in the listing orders and system types so please ensure you use these new forms and check you are applying for the correct listings. The new application & renewal pack can be downloaded from <http://www.fireprotection.org.nz/online-resources/aon-technical-notes>

If you have any question please email [NZ.SSC@Aon.com](mailto:NZ.SSC@Aon.com) or [fpa@fpanz.org](mailto:fpa@fpanz.org)

# THE PREMIER EVENT IN FIRE & LIFE SAFETY

**1-3 MAY 2018**  
**BRISBANE CONVENTION  
& EXHIBITION CENTRE**

Join us in Brisbane for Fire Australia 2018, the country's premier event in fire and life safety. With a world-class conference program and an ever-expanding tradeshow, Fire Australia 2018 is the opportunity for you to learn, network, create and share.

REGISTER ONLINE [FIREAUSTRALIA.COM.AU](http://FIREAUSTRALIA.COM.AU)

# Train on-the-job with free fees

**Good news – most Competenz fire protection training programmes are eligible for the government's new tertiary Fees-Free policy.**

This means most costs usually paid by employers, apprentices and trainees in the first two years will now be free for some people.

Eligible programmes:

- » New Zealand Certificate in Fire Detection and Alarm Systems Level 4
- » New Zealand Certificate in Fire Protection Systems Technology (Inspections) Level 4
- » New Zealand Certificate in Fire Protection Systems Technology (Testing) Level 3
- » New Zealand Certificate in Fixed Fire Protection Systems Level 3 and Level 4
- » New Zealand Certificate in Passive Fire Protection Systems Level 4

Find out if your people are eligible and enrol now. Quote FIRE18 when you talk to us.
