

Industry Update

› AUGUST 2020 ISSUE

WELCOME

Welcome to August's newsletter.

As I write this month's commentary from my home in Auckland, it is disappointing that we are again facing the prospect of longer restrictions that undoubtedly have an impact on not just Auckland but the whole country. I thought I would remind our members of the COVID-19 position statements we put together on the various COVID-19 alert levels. These are still current according to the level system used by government, and we regularly review them to ensure they are up to date. They can be located at <http://www.fireprotection.org.nz/online-resources/position-statements>

I think it is clear to most that possible outbreaks and their impacts will likely be ongoing and affecting the community for the next year or two. As we are all finding, we can only plan for so much given the degree of uncertainty in the current environment. Like our members, front of mind for the association is that we need to be able to deal with changes in the economic

environment, and this will also change some of our strategy going forward. Events such as our "Get it Right" seminars and the FireNZ conference are the types of events that require reasonable planning cycles and can be affected just days out from being scheduled to run. This is forcing us to seek flexibility when we book them to account for the possibility of future disruptions.

Scott Lawson

We want to give our members more input into the direction of the association and its priorities for this year given the environment we find ourselves in. To start this off, we will be sending out some short surveys on specific topics and proposed projects to gather your views. We know there is uncertainty and that no-one has all the answers, but we see this as an important way to get a wide range of input from our membership base. These surveys will be limited to the primary contact for each member company to ensure we get fair input from each.

"Get It Right" Seminars

We are working on dates for the follow-up seminars and hope to email these out in the next few weeks. If you were enrolled in the seminars that were cancelled, we will contact you directly to confirm your booking. Given the current environment, we will have shorter lead-in times for seminars to try and minimize the possibility of having to change dates or – if we must change them – to allow us to rebook quickly. We might also place tighter controls on numbers at each event depending on the alert levels at the time. Some seminars might have a blended delivery method, with part online and part class based. We have plenty of content and topics that we want to cover, so we are focusing on making it work despite the ongoing uncertainty. We will also ensure our seminars offer alternative attendance and refund options should we be forced to postpone or cancel an event.

FPANZ PLATINUM MEMBERS

Standards updates

NZS4514 – Interconnected Smoke Alarms for Houses: Development of this standard has now concluded, and it is now open for public comment until Wednesday 7 October 2020. Find more on this on page 8.

NZS4512 – Fire Detection and Alarm Systems in Buildings: Development of this standard is in the final stages. Once this stage is complete, we will let you know when it opens for public comment.

NZS4510 – Fire Hydrant Systems for Buildings: Development will start in September 2020. FPANZ has two representatives on this committee: Nicky Marshall and Chris Mak. You can contact them directly or via info@fpanz.org if you want to submit comments about this revision.

NZS4503 – Hand Operated Fire-Fighting Equipment: We are looking to scope the possibility of revising this standard; you can find more on this in the HOFFE update. Again, we welcome input from members on this standard, as it has not been revised for some 15 years.

The past year or so has seen great progress by FPANZ, the Fire Protection charitable trust, and our members in getting these important industry documents updated and kept relevant.

Competenz and Fees Free

It is really encouraging to note the increasing numbers of our members taking advantage of the fees-free programme on all fire qualifications while the option is available, and we will update these figures next month. Of interest is the surge in demand for the new passive installers level 3 qualification, and the numbers enrolled are really pleasing. There will never be a cheaper time to get your staff qualified with NZQA qualifications. Companies with qualified staff will also benefit from the ability to continue to train new staff or upskill existing staff. Formal NZQA qualifications are the foundation of the drive for a regulated fire protection industry, so we encourage you not to miss this opportunity.

Membership Update

Just over 90% of our members have already renewed their commitment to FPANZ for this current financial year, which is really pleasing. We have formalised the process and what is required to renew each year to ensure a more rigorous process and make sure all members are aware of their commitment to the code of ethics, insurance etc.

I would like to welcome the following new members to our association this month:

- › **FireForce Ltd** – Bronze
- › **Macedo Consultants** – Bronze
- › **Promat Australia Pty. Ltd** – Silver
- › **Willoughby Fire Solutions** – Bronze
- › **LOWC Fire Ltd** – Bronze

Until next month,

Regards,
Scott Lawson
Chief Executive Officer, FPANZ

New Corrosion Solutions

Protect it. Extend it.

Safeguard your fire sprinkler system today – extend its life tomorrow.

Corrosion in fire sprinkler systems leads to plugging problems, diminished sprinkler performance, water leak damage and reduced service life. TYCO® corrosion solutions are designed to address these risks to life safety, structural integrity and business continuity. Featuring a range of nitrogen generators, this portfolio of corrosion-fighting solutions gives you the tools to reduce corrosion and extend the life of your fire sprinkler system.

Learn more at www.tyco-fire.com/corrosionsolutions

The power behind **your mission**

HOFFE SIG Update

› Author **Steve Smith** – HOFFE SIG Chair

Hi folks,

I trust you are all well and are getting back on top of your workloads! Unfortunately, we are still hearing of businesses that are downsizing, restructuring and closing branches - the flip side is that there are also more and more projects getting the green light and some of these are now underway, offering ongoing opportunities for our members. We have also now seen another Auckland based outbreak of COVID-19, as if it needed to remind us that it is still around! The situation is an evolving one where you almost need a crystal ball to know what's going to happen next! Although it is disruptive for all of us and hard on many businesses, we can take some comfort from the fact that when compared to what is happening in the international community we are still looking pretty good.

It has been pleasing to see that some of our members are generating active enquiries about accessing the free fire equipment industry training initiative that is currently available and has obvious benefits for the credibility of our fire equipment companies and the fire industry as a whole. Competenz have indicated to us that regardless of what happens with the restructuring of the industry training organizations, the NZQA qualifications gained now, and up until the changeover, will still be officially recognized in the future. They also informed us that for those people who are actively progressing (regularly completing unit standards as is normally required), their qualifications when the changeover with

Competenz occurs will still be officially recognised and they will be able to complete their qualifications.

Since our last HOFFE group meeting we have also had a constructive, well attended meeting with a good amount of dialogue to establish whether there was a will to progress the long talked about changes to NZS4503. This is a fundamentally important document for our industry, recently demonstrated when it was used by the Commerce Commission in its prosecution of Aero Fire It is also often used as a reference document for many pieces of legislation. Thankfully, most stakeholders have indicated their active support to progress this freshen up of the standard which is a “corner stone document” for our part of the industry and yet it is now 15 years old! The actual cost for this NZS4503 review is not yet known as the final cost will be dependent on the many factors including, but not limited to, the type and number of changes being undertaken. As ever we are exploring ways to help support and fund this exercise. While we aren't keen on holding BBQs outside the local hardware store we are open to all reasonable fundraising suggestions?

Stay safe & well, our next meeting is on the 25th of September.

Kind regards, **Steve Smith**,
HOFFE SIG Chair 2020

Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

We have recently seen the country move from Level 1 back up the scale to a more controlled environment. Fluctuation between levels is likely to continue for several months. Should we be routinely considering social distancing when we run fire drills? There have been several events reported by the media where a building wide evacuation has been triggered. If we train our occupants as part of the drill, this will improve our response and lessen the risk. One of the considerations will be the additional space that will be required at the assembly area due to social distancing.

The following article outlines crowd evacuation models in the time of pandemic:

https://cdn.ymaws.com/www.sfpe.org/resource/resmgr/europe_magazine_pdfs/q22020/6_use_of_crowd_evacuation_mo.pdf

Our SIG meeting will be held on 25th September, time to be confirmed. Don't forget if you have any comments or thoughts on how building design impacts on evacuation for the MBIE project, please send them through. If you would like to be involved with collecting evacuation data for Massey and Canterbury Universities, please get in touch also.

Regards,

- Phil Jackson
Evacuation Consultants SIG Chair 2020

Use of FPANZ Logo

Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo.

This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email info@fpanz.org

If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.

Passive Fire Protection SIG Update

» Author **Justin McEntyre** – Passive Fire Protection SIG Chair

Tested Vs Assessed:

With the current codes of practice and Passive products annual renewal being worked through the issue of Tested vs Assessed is constantly brought up in conversation.

NZBC accepts the use of AS4072.1 Assessments as a way of showing compliance as an equal with a tested solution in accordance with AS1530.4.

However there are fundamental differences between a Tested detail and an Assessed detail. In its simplest form an AS4072.1 Assessment is a calculated guess at best.

In a recent conversation with my P.I insurer the conversation regarding selection of Assessed products was raised as to where liability starts and stops with such scenarios. Their advice to me was if I have even an inclining of doubt then stay away, that is my professional duty to protect myself and my clients and their building occupants. This was a statement that doesn't sit comfortably with me as a business operator.

As Contractors, Installers, Specifiers, Engineers, Distributors, Manufacturers, IQP, Third party inspectors we should have a sufficient level of knowledge to be able to identify any gaps. But we also need to have a level of trust in the standards and the authorities certifying these assessments.

The intent of AS4072.1 is to provide the minimum requirements for application of fire resistant products and provide tolerances for assessment of products and scenarios with the obvious outcome being that it allows for reducing costs for commissioning fire tests whilst also providing a level of confidence.

There is detailed content on what can and can't be assessed and what the assessment should consider. Details must be included such as; validity period, full scale test evidence assessment is based upon. There are details of maximum tolerances for assessment scope for example:

- » varying cable sheathings can be assessed (4.5)
- » differing plastic pipes can be assessed provided the max previously tested comparison is not greater than 120mm or smaller than 40mm (4.6.4)

- » and for multiple penetration systems the unit can not be assessed any larger than the device that has been tested in a 3m x 3m furnace (4.9.1).

Even as detailed as AS4072.1 has been written it is still not a perfect document. As stated by Niall Rowan the CEO of ASFP in his presentation at FireNZ 2018 “you can drive a bus through the middle of Assessment standards”.

The attraction for Manufacturers and industry to use Assessments is obvious – it is commercially more palatable to do so. However, this comes with a great risk. This risk has been highlighted in the most tragic and devastating circumstances when we look at cladding and the Grenfell Fire. Implications from this locally have had many ACP claddings that were previously assessed removed from distribution and the entire Codemark system called into question.

A critical recommendation from the Dame Judith Hackitt report into Building regulations in the UK following Grenfell was “More effective product testing & regulation”.

AS4072.1 was last reviewed in 2016 and reconfirmed. Even in the short 4 years since this was reviewed a lot has changed in our industry (not least of which was Grenfell tragedy in the UK and the determination for the Lacrosse Fire in Australia).

Whilst I understand the need for AS4072.1 assessments within our building regulation framework I can't help but think it is time we had a discussion as to whether we need to curb the proliferation of Assessments in lieu of Testing.

Kind Regards,

Justin McEntyre

Passive Fire Protection SIG Chair 2020

Reform of Vocational Education (RoVE)

28 July 2020

Tena koe

I am writing to let you know about the work of the Manufacturing, Engineering and Logistics Workforce Development Council (WDC) interim Establishment Board (iEB).

The Manufacturing, Engineering and Logistics iEB was appointed in June 2020 to work with industry to establish the Manufacturing, Engineering and Logistics WDC as a legal entity. Where possible, the iEB will also work with transitional Industry Training Organisations, the New Zealand Institute of Skills and Technology (NZIST) and other providers to provide advice and guidance to inform tertiary education system responses to COVID-19 impacts.

WDCs will contribute to the vocational education and training system by:

- Providing skills and workforce leadership for the industries they represent. This includes identifying current and future needs and advocating for those needs to be met
- Providing vocational education investment advice to the Government
- Developing qualifications, setting standards, and moderating assessments
- Endorsing provider programmes
- Promoting the benefits of educating employees to employers.

The initial focus of the [iEB members](#) is establishing the new WDC as a legal entity. We are currently developing options for the governance and establishment of these new organisations.

We will need your support to ensure that the new WDC can provide the vision and influence that support your efforts to develop our workforce. We will be in contact in the future to gather your views on the options identified.

In the meantime, please register with the Reform of Vocational Education newsletter available [here](#).

If you have any questions about the work of the Manufacturing, Engineering and Logistics iEB, please feel free to email MEL.ieb@tec.govt.nz.

Nāku iti noa

Troy Coyle
Chair, Manufacturing, Engineering and Logistics Interim Establishment Board

Updated Household Smoke Alarm Standard released for public comment

» Author **David Prosser** | Elected Member Representative, Lifetime Member FPANZ

DZ 4514:2020 - Interconnected smoke alarms for houses

This standard provides a specification for the selection, installation, commissioning, and maintenance of interconnected smoke alarms in houses (single household units). This edition is a partial technical revision and supersedes NZS 4514:2009. Allowance has been made for long-life batteries and wirelessly interconnected smoke alarms.

Changes have been made for ceilings with exposed framing members. Testing requirements have been simplified.

The appendices have been edited and updated to provide more clarity and guidance on the selection and location of smoke alarms.

You can submit your comments via the 'submit comments' button below, or alternatively you can download the Public Comment Form by clicking on or copy/pasting the following link into your URL:

<http://standards.govt.nz/assets/Drafts/DZ4514-PC-Form.docx>

All fire protection industry qualifications are now free

There has never been a better time to train, or retrain, on-the-job. All fire protection industry qualifications offered by Competenz are free from 01 July 2020 until 31 December 2022 for new and current learners.

There are also government wage subsidies available for employers of apprentices in their first two years of training.

Developed in conjunction with industry experts, our range of fire protection qualifications cover skills in fire detection and alarms, passive fire protection and hand-operated firefighting equipment.

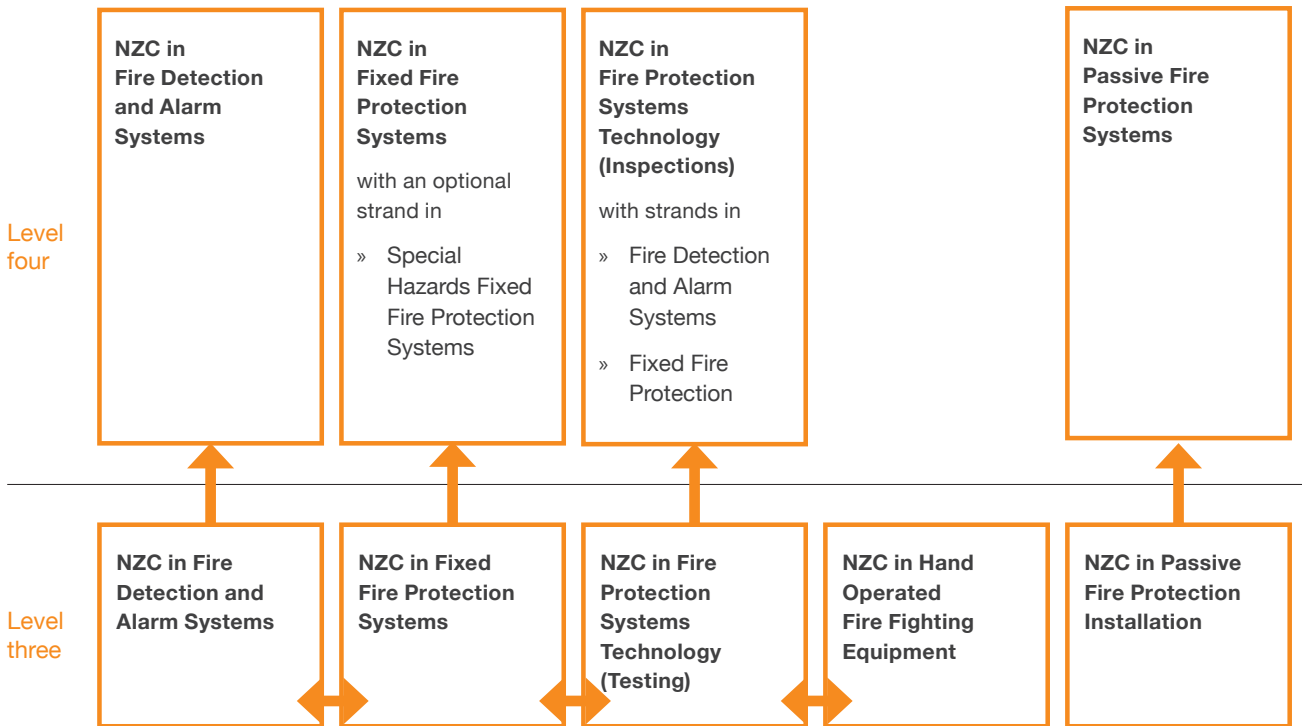

These qualifications take a step-by-step approach. Key benefits of the programmes are:

- » A combination of practical and theory to develop both knowledge and skills
- » Interactive learning available online 24/7
- » Covers critical health and safety aspects of your work
- » Competenz training advisor visits to support learners through their training
- » Nationally recognised qualifications registered with the New Zealand Qualifications Authority (NZQA).

New Zealand Certificates in fire protection

Competenz has created logical pathways for learners to progress, with five New Zealand Certificates at level 3 and six New Zealand Certificates at level 4.

Training with Competenz

Competenz is the industry training organisation (ITO) for the fire protection industry.

Developing highly skilled employees is critical to staying competitive, productive and safe. To do this Competenz works with industry experts to develop nationally recognised qualifications, mapping the skills needed and registering them with NZQA. Our team also develop training plans to make it easy for you to grow your employee's skills and productivity.

We do this in 37 industries with more than 3,500 businesses, helping over 20,000 people develop their skills on-the-job each year.

To find out more about the fire protection qualifications call our customer services team on 0800 526 1800 or email info@competenz.org.nz.

www.competenz.org.nz

What could you be eligible for as an employer or learner?*

Free
Apprenticeships
and Targeted
Traineeships
(TTAF)

One of the following*

Apprenticeship
Boost

Mana in Mahi
Extension

Regional
Apprenticeship
Fund

Select one from the following:

	Targeted Training and Apprenticeship Fund (TTAF)	Apprenticeship Boost	Mana in Mahi Extension	Regional Apprenticeship Fund
What is it?	Free fees on apprenticeships, plus traineeships in targeted sectors	Wage subsidy	Wage subsidy + additional pastoral care	Wage subsidy + additional business support
How much could an employer get?	All fees that an employer would normally pay to an ITO will now be covered. This includes resources, block courses, night classes, study groups and e-learning fees.	Apprenticeship Boost will be available from August 2020 and runs for 20 months. An apprentice who is in the first year of their apprenticeship will be eligible for \$1,000 per month, and an apprentice in their second year is eligible for \$500 per month for a maximum period of 20 months.	The wage subsidy will be increased – up to \$16,000 for a first year participant. Up to \$8,000 for a second year participant. The fund pays for any training your employee needs before they start. WINZ will also work with your employee to: <ul style="list-style-type: none"> » Set achievable goals » Provide incentive payments to motivate them to meet their goals » Provide support to start their qualification or apprenticeship » Get their feedback on how things are going. 	The initiative allows for up to \$40,000 of support per apprentice. This includes a wage subsidy of up to \$16,000 for the first year of training Up to \$8000 for the second year. It also includes additional funding to help with other business support and pastoral care so the employer and apprentice can successfully maintain the apprenticeship.
What period does it cover?	1 July 2020 to 31 December 2022 (30 months)	From August 2020 to March 2022 (20 months)	From August 2020, programme support will be extended from 12 up to 24 months.	More information to come
What are the employer's/ apprentice's eligibility criteria?	All apprentices are eligible – new and currently enrolled All traineeships in targeted areas are eligible – new and currently enrolled, if they are enrolled in a L3-L7 qualification. This does not currently cover pan-sector skills such as OSH, Sales, Distribution, Leadership, Business Administration. All learners enrolling into a Competenz qualification must meet the entry requirements, with the aim of completing the full qualification, with the full support of their employer.	Employers of first and second year apprentices who are currently in, or newly enrolled in, a Tertiary Education Commission approved New Zealand Apprenticeship or a Managed Apprenticeship	Need to have a Mana in Mahi candidate through Work and Income employed as a first or second year apprentice, who is in a Tertiary Education Commission approved New Zealand Apprenticeship or a Managed Apprenticeship. Otherwise need to employ a new apprentice through the Mana in Mahi scheme.	Need to employ a worker displaced by the effects of COVID-19 as well as be a person of Māori or Pacific descent. More information to come.
What do I do next?	Nothing – Competenz will automatically apply the free fees to invoices for eligible learners, or credit enrolled learners based on their pro-rated fees post 1 July 2020. Any questions, please email freetraining@competenz.org.nz	Apply through WINZ workandincome.govt.nz/work/apprentice-support	Apply through WINZ workandincome.govt.nz/work/apprentice-support	Go to the WINZ website workandincome.govt.nz/work/apprentice-support

Over the last two weeks, we have seen the construction industry get in and do the right thing during these trying times. Particularly in Auckland, our people have quickly reverted to the procedures put in place to protect us all when chances of COVID-19 community transmission are higher.

The recent cluster outbreak has reminded us just how quickly this disease can spread and that we can't drop our guard. It is also a timely reminder that we can't get complacent about our Covid-19 health and safety controls either. We need the whole industry to pull together and do the right thing to maintain public and government confidence in our ability to work safely during these heightened risk levels.

The Alert level protocols and tools and resources, developed by our industry and available on www.chasnz.org/covid19, provide a standard way of managing COVID-19 in our construction related businesses. The establishment of these protocols were a key part of getting Government support for our industry to work at Alert Level 3.

We know that most businesses have been doing a good job in applying the protocols but we are aware that it is a constant challenge to maintain them over time, especially if workers see other businesses or even members of the public not applying a similar high standard.

To better help construction businesses understand and apply the protocols, we have developed some simple check sheets that you can use on site or when going to a workplace. These will help you to be confident you are doing the right thing.

You can use these check sheets when explaining how you are controlled COVID-19 to clients, visitors, building inspectors or even WorkSafe. They do not replace the protocols but help make it easier to check you are doing it right every day.

You can access these check online sheets [here](#)

We have also had questions from clients around what they should be expecting from their builder or tradesperson. We have developed this one-page guide for clients you can use when asked questions about COVID-19 and what controls should be in place.

Clients can access further information online about what to expect during Alert Levels 3 and 2 from my builder or tradesperson [here](#)

If you do have concerns about protocols not being followed you can forward these issues to <https://covid19.govt.nz/covid-19/covid-19-compliance/>
