

Industry Update

» NOVEMBER 2021 ISSUE

WELCOME

Welcome to November's newsletter.

This is our second-to-last update for the year, and I have to say that I'm not sure where this month has gone. We have had plenty on the go and wrapped up last week with our final special interest group (SIG) meetings of the year, board and council meetings, voting and election of council members, and an AGM thrown in for good measure.

Scott Lawson

On the election of council members, it was really pleasing to see such interest from people wanting to join the council and be part of the leadership team representing our members. I would like to thank all of the candidates who came forward and were nominated. This year, based on rotation of council members, we had four positions to fill and six candidates. The voting response was good and proved for very tight results. As there was in fact a tie for the fourth position, Gim Tan graciously stepped aside to support the election of Garth Moran to the council to represent the coatings/passive sector and to ensure there was a good mix of all sectors on the council. The following candidates are now appointed to the national council for a term of three years and will take their position at the first meeting in 2022.

- » Garth Moran
- » Glenn Thompson
- » Nicky Marshall
- » Phil Lacey

I would like to thank Gim Tan and Simon Hemmings for throwing their hats in the ring for council too. I would also like to thank Nicky Marshall, who has already been on the council for a term, for deciding to run again.

Paul Ryan was unanimously elected for the role of vice president. Many of you will know that Paul has now been both the passive SIG chair and a board member and is passionate about not just the passive sector but also the wider industry and helping the association to grow.

Our AGM was well attended, something many organisations struggle to achieve. The switch to Zoom enabled attendance from, and therefore representation of, our geographically diverse membership.

Website Update

As some of you will have noticed, we took our website down recently. This was because the platform was outdated and had a number of security vulnerabilities. The good news is that we used this opportunity to completely redesign and update the services we will offer on the website. Last week, the board signed off on the design and we presented a demonstration to the national council and several of the SIGs. We are in the final stages of testing and will be launching this in the next week or two after a few tweaks.

NZS 4510 2nd round of public comment

A second draft of DZ NZS 4510 has been released for a 2-week comment period. Over 522 comments were received on the first draft, resulting in significant changes being made to DZ NZS 4510. As such, Standards New Zealand requires further consultation, and the committee is seeking submissions on (only the) changes that have been made to the draft since the last consultation, which are summarised at the start of the second draft document. The following link provides more information. Note that comments close Monday 6 December.

Regards, **Scott Lawson**
Chief Executive Officer, FPANZ

Use of FPANZ Logo

Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo. This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email info@fpanz.org 

If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.

FPANZ Position on the new “Traffic Light” Covid Protection Framework

As we know, New Zealand is moving to a new “Traffic Light” Covid Protection Framework at midnight on December 2nd. This new system will replace the existing “Covid-19 Alert Level” system that has been in place since early 2020.

While some parameters have been announced, there is not currently enough detail (legislation, regulations, health orders) to determine what, if any, Position Statements might need to be issued by FPANZ in respect of the new system.

This situation will be reviewed as more information comes to hand, however the following key points should be noted:

- › As always, members should follow all official guidance and legal requirements.
- › FPANZ strongly encourages members and their staff to wear face masks, and to make a point of scanning in using the *NZ COVID Tracer App* wherever they are on the job in public. Both of these actions send a visible message that our industry sector cares about the health and safety of clients and the public.
- › FPANZ endorses vaccination as a primary defence against the threat of Covid-19. We encourage all members and their staff to be vaccinated, and to proactively communicate this status to their clients. Some clients will insist on fire protection workers being vaccinated before entering their premises.
- › Members are further encouraged to require all their contractors and subcontractors to be vaccinated, to wear masks, and to scan.
- › FPANZ endorses and expects its members to follow the *NZ COVID-19 Construction Protocols* published by SiteSafe at <https://www.sitesafe.org.nz/guides--resources/covid-19-protocols/>. These protocols are a practical implementation of the unified construction sector CHASNZ (Construction Health and Safety NZ) *COVID-19 Standard for Construction Operations* found at <https://www.chasnz.org/covid19>. It should be noted that these protocols currently apply to the old Alert Level system and are under review.
- › Evacuation drills have the potential to create uncontrolled crowd “gatherings” where the vaccinated and unvaccinated can mingle in excess of permitted numbers. Careful planning will be necessary to avoid this situation.
- › FPANZ members and their staff should continue to work collaboratively with clients to ensure that health and safety risks are managed and minimised as much as practicable.

The team here at FPANZ will continue to monitor the official guidance, and update you as new information comes to light.

URGENT NOTICE

FOR AUCKLAND SPRINKLER SYSTEMS

Important information has been supplied by one of our members indicating another round of thefts of Fire Sprinkler Inlets (FSI) couplings is happening in Auckland. At this stage, thefts have been identified in Penrose and South Auckland. Please ensure that when your staff are visiting any buildings protected by Sprinkler and/or Hydrant Systems, they carry out a visual check on the status to identify any theft or tampering with the couplings.

The theft of these is a serious safety concern as in the event of a fire, Fire Fighters will not be able to boost these systems.

We are also compiling details to forward to the NZ Police to assist with their investigations. **If you come across any of these thefts, please send the details so we can add this to our database and notify FENZ and Police.**

ACKNOWLEDGEMENT:

FPANZ acknowledges, with gratitude, the management and staff of the company that identified these incidents.

HOFFE SIG Update

Author **Steve Smith** – HOFFE SIG Chair

As I write this article Auckland has surpassed 100 days in lockdown and we are hoping that the promised freedoms don't bring with them an increase in COVID case numbers and hospitalisations. In line with this we are seeing that for those who aren't double vaccinated it is getting more difficult to access some premises and participate in many activities.

I was recently made aware of a fire that occurred in an industrial rubbish bin at a printing company in Auckland. The fire that occurred was not massive, though it could potentially have become a large fire as the bin was beside a truck which in turn was beside the printing building. Various solvents, vinyl film, rags and other goods had been thrown into the bin which combined to cause an after-hours fire that burnt through the plastic of the bin and neighbouring trees. In trying to extinguish the fire, various fire extinguishers were used to contain the fire along with a hose, resulting in the fire being extinguished before Fire & Emergency arrived on the scene.

This raises questions regarding the refilling of these fire extinguishers and in particular the foam units where, when tested, AFFF concentrates were used. Now that these are out of favour, many are being refilled using Fluorine Free Concentrates whose performance capabilities will not have been quantified in these fire extinguishers.

As an example, in the scenario above the most effective fire extinguishers used in extinguishing the fire were the foam units. The flammable liquids would likely require a 30B rated unit that will put out and keep out the fire. Most, if not all of the Fluorine Free Foam (FFF) fire extinguishers currently available cannot achieve a 30B rating under the testing criteria contained in AS/NZS1850. This would mean that with a refill of FFF it may no longer be suited to the risk it was installed to cater for.

Further to this, those who may be dealing with partially discharged or hydro-testing fully charged fire extinguishers will find themselves unable to responsibly dispose of the diluted foam from the fire extinguisher if it is an AFFF because there is no disposal facility currently available in New Zealand.

Regards, **Steve Smith**,
HOFFE SIG Chair 2021/2022

How to sell your beautiful fire protection stuff to the architects... #2

NOTE: Although these are great creative ideas, these pictures are from overseas and are not compliant within New Zealand

Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

As we prepare to enter the latest Covid-19 response framework, dubbed “*The traffic light system*”, there are many questions around managing occupants during evacuation. Whilst guidance is being developed, it is recommended to take a risk-based approach, as part of discussions with building owners.

With active Covid-19 cases now part of everyday life in the community, it is important to remember that if there is an immediate threat to life, then the need to social distance and take precautions is overridden by the immediate emergency. Usual protocols should be reinstated after the event, and an assessment of the event carried out as part of the debriefing process.

It is recognised that building design and evacuation from buildings in the healthcare environment, is complex, particularly in hospital and aged care settings. We have recently established a subcommittee to focus on healthcare evacuation. This committee will enable those working in these settings to access and discuss best practice within their specialist environments, at the same time enabling the fire industry to further understand the operational challenges that exist within healthcare.

I look forward to providing updates about our position on working with the ‘*Traffic Light System*’ and our Healthcare Subcommittee. Please check the FPANZ website for the 2022 meeting dates.

Regards, **Phil Jackson**
Evacuation Consultants SIG Chair 2021/2022

SFPE ONLINE WEBINAR INVITE

TIME & DATE: Wednesday December 1st 12:00 PM-1:00 PM

SUBJECT: Evacuation Schemes - the benefits of early considerations

PRESENTATION DETAILS: Phil Jackson from Evacuation Now Ltd will present about the benefits of developing evacuation procedures at the project design stage and involving Fire and Emergency NZ during this process. He will also discuss how ongoing staff training and the use of scenario based evacuation drills helps to ensure staff perform as expected during a real event.

Phil began working in the fire industry 7 years ago. He brought with him several years of experience gained in the public and private security sectors. He has a particular interest in using his operational experience to further develop best practice in the fire evacuation industry.

Following this presentation, we'll have a Q&A session.

PRESENTER: Phil Jackson, Certified Evacuation Consultant

WEBINAR LINK: Microsoft Teams meeting. Join on your computer or mobile app

Passive Fire Protection SIG Update

▶ Author **Justin McEntyre** – Passive Fire Protection SIG Chair

Over the past month I've begun reaching out to our wider construction and property industry related participants to spread the latest workings of the FPANZ Passive SIG including the initiatives that have been achieved.

This has included a presentation to approximately 100 Fire Engineers and BCA staff through SFPE updating them all on the Register, Intumescent Code of Practice, Fire & Smoke stopping code of practice, Position Statement and Level 3 & Level 4 NZQA qualifications. This was a great opportunity to present and reminded me that we need to keep spreading the word once we do achieve great things such as this noting that we can't assume they've all been advised of tools such as these.

Following on from this I've been reaching out to the trades through the likes of Master Plumbers, Builders, Electrical and HVAC associations. I'm confident this will lead to positive conversations and interactions with these groups in 2022. We've been fortunate to have Placemarkers, ITM & Carters all issuing their latest newsletters with an article on the FPANZ Passive SIG. I'm hopeful that this will reach out to their Builder audience and let those builders know where help is available, what right looks like and that there is capable help through the likes of specialist Contractors in all corners of New Zealand now.

In 2022 I'm keen to continue conversations and interactions with groups such as NZIA, NZIOB and the like along with large clients such as Government departments, large clients, Healthboards and the like to advise them of the tools that are available and what our industry has achieved by working collaboratively and positively for change.

If anyone has connections or suggestions to reach out to the wider industry then please send me a message at passive@fpanz.org

I firmly believe the Passive Fire sector will be more successful with input and collaboration across all related industry parties.

Kind Regards,

Justin McEntyre

Passive Fire Protection SIG Chair 2021/2022

Changes to Regulations on Trial Evacuations and Training Programmes

(Fire and Emergency New Zealand (COVID-19—Fire Safety, Evacuation Procedures, and Evacuation Schemes) Amendment Regulations (No 2) 2020)

The requirement for building owners to conduct trial evacuations or evacuation training programmes will be reinstated from next Monday, 1 February 2021, provided there are no physical distancing requirements in place for the area in which the building is located. Specific exclusions have been included in the changes to accommodate those buildings which are in use as Managed Isolation and Quarantine Facilities.

Building owners are not expected to resume trial evacuations or evacuation training programmes immediately the changes come into force. To work out when the next trial evacuation or training programme notification is due, you calculate a 6-month period that excludes the time from 25 March 2020 to 31 January 2021.

This means, for example, if a building was due to have a trial evacuation conducted by 10 April, 17 days after the suspension began, there will be a requirement to conduct a trial 17 days after the changes take effect which will mean 17 February 2021. This is provided there are no physical distancing requirements in force.

If you have any questions, please contact the Fire Information Unit on 0800 347 346 or email fireinfo@fireandemergency.nz
