

WELCOME

Welcome to April's newsletter.

The next couple of months are busy for us, with seminars and conference planning ramping up. We are also coming to the end of our financial year (30 June), and this brings with it our annual requirement to prepare for our accounts audit as well as membership renewals for the new membership year starting 1 July 2022.

Scott Lawson

Seminars in May and June

We are running two half-day sprinkler seismic bracing seminars on Tuesday 17 May in Auckland. These are aimed at field staff, supervisors, project managers, and anyone who works on the tools in this area. With the changes to the sprinkler standard in 2020 and the increased requirements in this area, this is a vital follow-up session covering the do's and don'ts. These sessions will also be run in Wellington on 25th May and in other locations around the rest of the country in August/September. We will confirm these dates and locations as soon as we can.

We are also running a seminar covering the basics of passive products, the test lab process, and intumescent coatings. This is aimed at members who want a general overview of the passive sector as well as councils, engineers, and those new to the fire sector. This seminar is being held in Auckland on Tuesday 17 May and in Wellington on 1st June.

We encourage our members to send their staff to these events; they are valuable for industry networking and also provide continued professional development (CPD). As you will see below, customers who visit our website want to be able to see members who develop and keep their staff current with relevant industry training. Further details of these seminars can be found on pages 8–11.

Certified Service Providers

The association is increasingly being asked to validate or recommend members who provide services in our industry. As many of you will see, we have changed the way in which customers can search for our members on the website. Rather than a big list of members, our new search ►

function enables the public to find members who provide a certain type of service in an area near them. We are receiving feedback that this is easier and far more useful.

We were also being asked how to differentiate member companies according to the quality of work or qualifications and skills of their staff. The first step is the ability to search for member companies that are certified, so we have now integrated this into the search function page, enabling the public to see only companies that are certified in a certain field. As many of you will know, sprinkler, fire alarms, and evacuation have separate certification programmes that show whether a company meets minimum requirements. We are also close to launching a similar certification scheme for the passive sector.

Certified companies meet minimum requirements, such as having a certain percentage of staff who hold NZQA-recognised qualifications, having staff who undertake CPD, having quality and health and safety policies, having minimum levels of insurance, and other areas that are audited either annually or biannually. As the association grows, it is becoming more important for the public to be able to pick service providers based on more meaningful criteria than simply whether they are a financial member of the industry body. We will continue to make it easier for those needing service providers to seek out members who go the extra distance to become certified in their respective fields.

We have also updated the page that outlines the membership levels and explains what they mean; this can be found here: <https://www.fpanz.org/membership/about-membership>. This page also explains the types of certifications for our industry in more detail.

FPANZ Strategy and Direction

The board and management are meeting mid May for a strategy and planning session. Our association has a constitution that largely dictates our purpose and activities, and we need to regularly assess whether we are meeting those objectives and what we can do to continue to grow and provide more to our members and the wider public. The association has grown considerably in the past 4–5 years and is now in a very good position: our reputation and brand is well recognised, we are consulted in key areas, our members get far greater visibility than non-members, and we are in a solid financial position to leverage our future growth. With all of this in mind, and considering the feedback I regularly receive from members when I get to speak with them, this strategy session will be looking at areas to focus on in the next few financial years. I look forward to reporting back once this has taken place and relaying some of the plans we will be working on.

FireNZ Conference 2022

Just a reminder to make sure FireNZ 2022 is in your calendar. As this will be the first time our industry will have been able to get together for over 2 years, many of us are really looking forward to reconnecting with our colleagues and peers in this learning and networking environment. For many of us, the requirement for CPD is also a driving factor for attending. So, do keep an eye on the FireNZ webpage for dates and more details, as we are about to launch the exhibitors' prospectus, which will be followed by the delegates' programme in the next month or so.

Membership

The following applicants have completed their provisional period and been reviewed and accepted as full members of the association. Provisional applicants that have completed their provisional period and are now welcomed into FPANZ as full members:

- › Mitch Buckley - Personal
- › No 8 Fire Ltd – Bronze

I would like to welcome them as full members and look forward to their contributions to our association.

And I would also like to welcome to the following new provisional applicant:

- › SunbuildNZ Ltd

Until next month,

Scott Lawson

Chief Executive Officer, FPANZ

WANTED

FIRE ALARM AND SPRINKLER TECHNICIANS

ARGUS FIRE PROTECTION provides essential services to commercial and industrial clients throughout the major centres of New Zealand including Auckland, Hamilton, the Bay of Plenty, Wellington and Christchurch. We have been New Zealand owned and operated for three generations, and we invest heavily in our people and clients, in providing innovative solutions, and in the latest technology. We are big enough to cope with large projects and small enough to care for our people and clients.

THE ROLES

Opportunities exist within Argus Fire in the roles of Fire Alarm and Sprinkler Technicians. The roles install, service, maintain and repair/replace fire safety and electrical systems as part of regular fire protection services for our clients.

BENEFITS

- Company maintained **vehicle**
- Latest **phone** (digital platforms used for jobs, timesheets, leave applications)
- All **uniforms** and **PPE** provided
- All **hand tools** and **equipment**
- **Career progression** available
- **Overtime** available and time ½ payment over 40 hrs
- Regular **toolbox talks** to update your knowledge of industry and company
- Staff **incentives**
- **Excellent remuneration** and **supportive work environment**
- **Paid training leave**, and course fees paid by Argus
- **Flexible** working hours
- **Above market pay rates**, depending on capabilities and experience.

ESSENTIAL CRITERIA

- Proof of eligibility to work in New Zealand in a permanent, full-time role
- Current New Zealand driver's licence
- Five plus years' experience in Fire Protection is desirable
- Demonstrable ability to service and repair various types and brands of fire panels and fire safety systems.

DESIRABLE SKILLS & EXPERIENCE

- Written and verbal communication skills, time management, problem-solving, interpreting technical data, and teamwork
- NZQA levels 3 or 4 fire protection qualifications desirable
- Current valid Police and Working with Children Check (or be willing to obtain).

Argus Fire is known for our progressive company culture that fosters well-being and camaraderie amongst our people. We listen to our people and encourage their engagement and development for their job satisfaction and the good of the business and our clients. We have a community focus and are an equal opportunity employer.

If you are interested in these roles, please visit our careers page at www.argusfire.co.nz or contact us on **08004ARGUS**

HOFFE SIG Update

› Author **Steve Smith** – HOFFE SIG Chair

We are slowly getting more of our freedoms back, ironically this is as news breaks of yet another COVID variant arriving on the international stage and in New Zealand. We are certainly in unsettling times both here and overseas. As we can see from both the pricing and the problems with the availability of some products, these situations impact us all personally and professionally, that said it is also hard for businesses when they are trying to plan ahead in this environment.

An FPA member company brought a situation to our attention which, while not a new concern it does make you wonder about how some of our authorities see their role in policing/enforcing the established standards and regulations which we in the fire equipment industry are told we must abide by.

When we are bringing HOFFE into the country we are told to bring in equipment compliant with the regulations and to abide by the published protocols when doing so. In the case of our fire extinguishers, as they are Class 2.2 Dangerous Goods, they are subject to a test/clearance certificate as required by the Hazardous Substances (Compressed Gases) Regulations 2004 clause 19 where it states “A person who imports a cylinder or a batch of cylinders into New Zealand must apply for and obtain a test certificate from a test certifier.” While with mandatory words like “must” being used it seems fairly straight forward, there is mounting evidence that while some are following the advice/requirements contained in the regulation, some are not following these protocols and obtaining these certificates . The effect of this is that it creates a potential price point advantage in the marketplace for those who are not complying with this requirement.

The next part to this puzzle is that if you have a regulatory requirement with penalties attached, then is there not an expectation that if the requirements aren’t followed then there would be a penalty applied to those aren’t abiding by the requirements of the regulation? Given that companies which are abiding by the regulations and obtaining the required certificates are incurring considerable expense in doing so, not enforcing the regulations means there can be considerable reward for non-compliance!

Some of these products are openly offered for sale at prices that, on the face of it, would seem fairly tempting. Unfortunately, it has the potential to trap companies and people who are trying to do the right thing in order to comply with other regulatory requirements such as DG, marine, Fire Safety and Evacuation etc. They will purchase these FE products from companies not realizing they haven’t put their products through the same required checks and processes as other equivalent FE products have. *Some food for thought?*

Our next HOFFE group meeting is on Friday the 20th May at the Royal NZ Yacht Squadron, however you can still log on via Zoom.

Kind regards,

Steve Smith,
HOFFE SIG Chair 2021/2022

Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

As you are most likely aware, the country is now operating at the Covid Protection Framework, orange setting. This means that we can now resume fire drills throughout the country. If, following a suitable assessment that you deem there are genuine covid-19 risks associated with running a fire drill you should speak with FENZ, or your evacuation consultant for advice.

Recently there has been some further discussion about unwanted alarm activations. The debriefing phase of a fire drill, or part of a training session can be used to help occupants understand how their alarm hardware functions. It provides a good environment to offer suggestions about reducing unwanted alarms and FENZ call outs. This would include training on the proper use of systems that can be reset by occupants.

Don't forget that if you are responsible for planning fire drill, and evacuation exercises you are able to access our good practice guide to running drills [here](#) .

We look forward to seeing you at the next SIG meeting.

Regards,

Phil Jackson

Evacuation Consultants SIG Chair 2021/2022

Use of FPANZ Logo

Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo. This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email info@fpanz.org 

If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.

Passive Fire Protection SIG Update

There's no update from Justin this month... but in the mean time, check out the upcoming **PASSIVE FIRE Get it Right Seminar** on page 9.

WORKSHOP
FPA NZ "GET IT RIGHT" SEMINAR SERIES

PASSIVE FIRE Get it Right Seminar

After much demand, FPANZ is please to present this full day seminar in Auckland on Tuesday 17 May 2022 at the Royal New Zealand Yacht Squadron and in Wellington on 1 June at the Sky Stadium from 8.00am - 4.20pm.

This seminar is a great opportunity for industry participants to learn about the latest initiatives and Codes of Practice related to Passive Fire Protection.
CPD hours available for those applicable.

AGENDA INCLUDES:

- **FPANZ Introduction**
- FPANZ Passive SIG
- **FPANZ Intumescent Coatings Code of Practice**
- Walk through content & putting into action
- **FPANZ Passive Products Register**
- Upcoming developments for users
- **FPANZ Fire & Smoke Stopping Code of Practice**
- Currently in development
- **NZQA Level 3 Passive Fire Installers qualification (Competenz)**
- **Fire Test Lab/ Tested details**
- AS1530.4/ AS4072.1
- Test process
- Reasons for needing to follow test details
- **Passive Fire in Design phase**
- Specifications, tendering & building consent
- **Passive Fire in Construction phase**
- Quality Control
- **Q&A**

SPEAKERS INCLUDE:

- **Justin McEntyre** - FPANZ Passive Fire SIG Chair
- Cortego Owner/ Operator
- **Akshat Malhotra** - Associate: Mechanical Engineering (Building Services), Beca
- **Philip La Trobe** - General Manager, Metspray
- **George Hare** - Fire Research Engineer, BRANZ
- **Garth Moran** - Technical Services Manager, Altex Coatings Ltd

AUCKLAND: 17 MAY 2022
RNZ YACHT SQUADRON
8.00am - 4.20pm

WELLINGTON: 1 JUNE 2022
SKY STADIUM
8.00am - 4.20pm

WHO SHOULD ATTEND
This Seminar will be ideally suited toward:

- Architects/
Architectural Designers
- Fire Engineers
- Structural Engineers
- IQP's
- Council Building Control Officers/
Inspectors
- Main Contractors/ Builders
- Services Trades
- Passive Fire Specialists
- Manufacturers and
Distributors

INVESTMENT:

- MEMBERS (single) \$300 each* +GST
- MEMBERS (multiple) \$250 each* +GST
- NON-MEMBERS \$400 each +GST

*Available to FPANZ Financial Members who are fully paid-up.

Catering is provided for this full day seminar consisting of morning/afternoon tea & lunch.

Fire Protection Association New Zealand
Private Box 302-372, North Harbour, Auckland. Ph: 0800 037 269 | Email: info@fpanz.org | www.fpanz.org

BUILDING PERFORMANCE

MBIE's 2022 consultation on proposed changes to the building code will open soon

Tēnā koe

I wanted to let you know that consultation is opening on Monday 2 May 2022 for the 2022 Building Code update process. The consultation will run until Friday 1 July 2022.

MBIE updates selected Building Code acceptable solutions and verification methods annually to ensure it is keeping pace with new methods of construction, products and technologies.

This year's proposed changes aim to make new buildings better protect the safety and wellbeing of New Zealanders, and focus on plumbing and drainage, protection from fire and structural stability of hollow-core floors.

Plumbing and drainage

We are proposing changes to improve the safety and reliability of plumbing and drainage systems.

Hollow-core floors

We are proposing changes to the compliance pathway for the use of hollow-core floor systems in new buildings

Protection from fire for residential homes

We are proposing to improve the level of fire safety for homes and garages.

Find out more

We will be in touch when the consultation opens with details of how to find out more about the proposed changes.

Register for our webinar

We're also running a webinar on 5 May 2022 to provide more details on the proposed changes, and answer any questions. If you, or anyone you know, would like to attend, please register below.

The webinar will be split into different sessions for the three proposals and the programme will be provided on registration. [Register here.](#)

Ngā mihi,

SPRINKLER SEISMIC SYSTEMS

Get it Right Seminar

We resume our Get it right Sprinkler Seminar series that were cut short by lockdown restrictions. This new series is driven by the ongoing changes we face as an industry and the importance of selecting the right products to meet the seismic design and installation requirements of NZS4541:2020.

FPANZ is running a series of half day workshops throughout the country – our aim is to ensure that the industry is continuing to get the latest information and support. These half day workshops will focus on the seismic bracing of sprinkler systems, their components and associated approved hardware. We will be you showing examples that do not meet the requirements of NZS4541:2020. There will be an emphasis on the need to plan and install seismic bracing that meets the requirements of these standards.

The workshops will not work through how to calculate loads and select components – it is more on the emphasis on why and when to do so. A follow-up seminar will refresh how to calculate in the near future.

NZS4541:2020 was published in March 2020 and places much greater emphasis on new seismic resilience requirements of the standard.

The changes to the seismic provisions are ground-breaking, and require a new approach to how the designs are carried out, documented, and installed. These half day will be interactive and there will be lots of ability to ask questions and to participate in discussing solutions and problems in the seismic areas of sprinkler systems under the new standard. We strongly encourage the attendance of site supervisory staff who will benefit from this seminar.

EARTHQUAKES

Following recent earthquakes events in NZ (Christchurch and Kaikoura) the building industry is facing increasing pressure to design to protect the building and occupants against earthquake damage.

Generally, sprinkler systems have performed admirably in these events, however there has been some criticism of how we are designing our seismic bracing systems. The playing field has changed, and the construction sector is expecting more from the fire industry.

The presenters will outline what will now be expected to ensure that systems can be certified as compliant with the new provisions of the standards.

PRESENTER:

- **Chris Mak** BE FEngNZ, CPEng, PM.SFPE, CPEng, IntPE(NZ), RPEQ
– Technical Services Manager, Aon New Zealand

AUCKLAND: 17 MAY 2022

MORNING 7.30am – 12.00pm
AFTERNOON 12.30pm – 5.00pm

WHO SHOULD ATTEND

The seminar/workshops are particularly aimed at those involved in design, fabrication, supply, specification, installation and testing of Sprinkler Systems. Those who should attend include:

Sprinkler system designers

Sprinkler system installation supervisors and charge-hands

Sprinkler system installers/technicians

Installation inspectors

Maintenance technicians

Fire system surveyors

Insurance risk managers and surveyors

Sprinkler system component manufacturers and suppliers

Designers and estimators

Council inspectors

INVESTMENT:

- MEMBERS (single) \$130 each* +GST
- MEMBERS (multiple) \$115 each* +GST
- NON-MEMBERS \$200 each +GST

*Available to FPANZ Financial Members who are fully paid-up.

Morning or afternoon tea is included in these half day seminars.

URGENT NOTICE

FOR AUCKLAND SPRINKLER SYSTEMS

Important information has been supplied by one of our members indicating another round of thefts of Fire Sprinkler Inlets (FSI) couplings is happening in Auckland. At this stage, thefts have been identified in Penrose and South Auckland. Please ensure that when your staff are visiting any buildings protected by Sprinkler and/or Hydrant Systems, they carry out a visual check on the status to identify any theft or tampering with the couplings.

The theft of these is a serious safety concern as in the event of a fire, Fire Fighters will not be able to boost these systems.

We are also compiling details to forward to the NZ Police to assist with their investigations. **If you come across any of these thefts, please send the details so we can add this to our database and notify FENZ and Police.**

ACKNOWLEDGEMENT:

FPANZ acknowledges, with gratitude, the management and staff of the company that identified these incidents.
