

## WELCOME

*Welcome to May's newsletter.*

We have had a great month and have plenty to update you on.

### Get it Right Seminars in Auckland and Wellington

We have just completed the Passive and Seismic seminars in Auckland and the Seismic seminars in Wellington. These have been well attended and the feedback very positive. I would like to thank FDG for sponsoring the seismic seminars in both Auckland and Wellington. We are also pleased to announce that we will hold morning and afternoon Seismic seminars in Christchurch on Thursday 16 June and a morning Seismic seminar in Dunedin on Friday 17 June.

Scott Lawson

### Disposal of Firefighting Foams

This is becoming more of a hot topic, so I want to provide a brief update on what the association is doing to help members in this area. As many of you know, we ran a very successful halon recovery programme over 5 years to phase out and collect some 4.5 or more tons of Halon 1211 and 1301 for safe disposal. This was done in conjunction with the Ministry for the Environment and the Environmental Protection Agency. We are working on collecting data to see whether we can offer a similar programme for the safe disposal of fire-fighting foams and possibly extinguisher powder too. I'm not yet able to give timeframes on this as considerable work and meetings are required to get a significant project like this approved. We will also be engaging with our members to determine the types and quantities that will need to be disposed of over the coming years. We are working with several key stakeholders and government departments to try and get this initiative off the ground as soon as possible.

### Qualifications

Hanga-Aro-Rau is the Workforce Development Council for the Manufacturing, Engineering, and Logistics industries and works to ensure the sectors they represent have a greater leadership role and influence across the vocational education system and its transformation. They also create industry qualifications and set industry standards and assess training provisions against these industry standards. They have recently announced the appointment of the founding ►

## COMMENTARY cont.

members of the industry stakeholder group, and I am pleased to report that, even though we are one of the smaller sectors, we were successful in obtaining representation in this group. Further details can be found here: <https://hangaarorau.nz/latest-news/founding-members-of-industry-stakeholder-group-appointed/>.

I am also pleased to announce that the level 4 passive qualification is under review and redevelopment. This is one of the oldest qualifications and has been in need of updating for some time according to feedback from our members.

### FireNZ Update

We are well underway with planning for FireNZ, and I am pleased to say that we have now sold well over 80% of our stands for this year. Exhibitors who have not already got in will need to do so quickly as it is apparent we will sell out this year. We are also working through the list of speakers and confirming the programme for delegates. We are going to have a great line-up for you this year. We expect to launch the delegates' brochure in the next 2 weeks, so keep an eye out for it.

### End of Financial Year

As you read this, we will be coming to the end of our membership year. Renewal information will be sent to the primary contact for each company. Renewal includes signing a code of ethical conduct and confirmation of current Public Liability (PL) insurance. If your company is a certified contractor, we will already have this on file, and you won't need to provide it again. The membership year expires on 30 June, and the 2022–2023 membership year starts on 1 July. Please let us know if your company size has changed so we can update your membership profile to accurately reflect the size of your company.

Until next month,

**Scott Lawson**

*Chief Executive Officer, FPANZ*

# WANTED

## FIRE ALARM AND SPRINKLER TECHNICIANS

**ARGUS FIRE PROTECTION** provides essential services to commercial and industrial clients throughout the major centres of New Zealand including Auckland, Hamilton, the Bay of Plenty, Wellington and Christchurch. We have been New Zealand owned and operated for three generations, and we invest heavily in our people and clients, in providing innovative solutions, and in the latest technology. We are big enough to cope with large projects and small enough to care for our people and clients.

### THE ROLES

Opportunities exist within Argus Fire in the roles of Fire Alarm and Sprinkler Technicians. The roles install, service, maintain and repair/replace fire safety and electrical systems as part of regular fire protection services for our clients.

### BENEFITS

- Company maintained **vehicle**
- Latest **phone** (digital platforms used for jobs, timesheets, leave applications)
- All **uniforms** and **PPE** provided
- All **hand tools** and **equipment**
- **Career progression** available
- **Overtime** available and time ½ payment over 40 hrs
- Regular **toolbox talks** to update your knowledge of industry and company
- Staff **incentives**
- **Excellent remuneration** and **supportive work environment**
- **Paid training leave**, and course fees paid by Argus
- **Flexible** working hours
- **Above market pay rates**, depending on capabilities and experience.

### ESSENTIAL CRITERIA

- Proof of eligibility to work in New Zealand in a permanent, full-time role
- Current New Zealand driver's licence
- Five plus years' experience in Fire Protection is desirable
- Demonstrable ability to service and repair various types and brands of fire panels and fire safety systems.

### DESIRABLE SKILLS & EXPERIENCE

- Written and verbal communication skills, time management, problem-solving, interpreting technical data, and teamwork
- NZQA levels 3 or 4 fire protection qualifications desirable
- Current valid Police and Working with Children Check (or be willing to obtain).

**Argus Fire is known for our progressive company culture that fosters well-being and camaraderie amongst our people. We listen to our people and encourage their engagement and development for their job satisfaction and the good of the business and our clients. We have a community focus and are an equal opportunity employer.**

**If you are interested in these roles, please visit our careers page at [www.argusfire.co.nz](http://www.argusfire.co.nz) or contact us on **08004ARGUS****

## HOFFE SIG Update

› Author **Steve Smith** – HOFFE SIG Chair

As we say goodbye to May I can't help feeling that this year is flying by way to quickly! On the plus side we have returned to some "normalish" conditions which allow for businesses to resume trading in some capacity and keep the money-go-round operating.

Our HOFFE group meeting in May was quite an interesting one as not only could some of us attend in person but we had quite a few interesting topics to cover, here are some examples of the items covered.

- a) NZS4503 review: we were joined by David Prosser of the Charitable Trust who outlined the requirements and undertakings required for using the funding model that we as a group have agreed to implement.
- b) A HOFFE subgroup will meet to ensure that we progress the requirements of the Charitable Trust so we don't lose momentum.
- c) A letter has been sent to the CEO of Worksafe by FEMA with the endorsement of the FPA to discuss various issues relating to cylinder approvals, importation, improved access to fire suppression products and solutions, as well as barriers to trade. We are ever hopeful that we might get a positive response, time will tell??
- d) Concern has been raised that people are purchasing fire extinguishers both from directly and indirectly from social media sites where claims are made, yet critical information and guidance is either not available or not given. Examples have been tabled at our meetings of fire extinguishers that for various reasons don't meet the requirements of the Hazardous Substances Regulations or manufacturing standards, are due for a hydro-test yet advertised as new etc. Well intentioned people could potentially put themselves and others at risk by putting their faith in a fire extinguisher that may not work or may not be suited to the risk. Professional advice coupled with products manufactured to an accepted and approved standard is better than buying dubiously sourced products off a social media platform and gambling with people's lives and livelihoods.

Have a great month, our next scheduled meeting is on the 15th July at 1pm.

Kind regards,

**Steve Smith,**  
HOFFE SIG Chair 2021/2022

# Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

Recently we have received an increase in enquiries from third parties about the certified evacuation qualification and persons enquiring have been pointed to the FPA website so they can make contact.

It is important that the qualification remains relevant to our industry, and that the criteria for maintaining the qualification are robust and in line with other sectors. We are currently carrying out a review, and strongly considering a continuing professional development (CPD) approach. This will require a number of hours across different disciplines to be documented and assessed on an annual basis.

We are currently seeking feedback from anyone who has an interest in this area, especially around hours per annum. We welcome feedback from within and outside the fire industry.

We have invited a guest speaker to our next meeting to present ‘ Information Mapping methods’ These can be used to improve the way information is processed to write procedures.

Regards,

**Phil Jackson**

Evacuation Consultants SIG Chair 2021/2022

## Use of FPANZ Logo

**Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo.** This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <http://www.fireprotection.org.nz/about-us/logos>.

If you are using an incorrect logo and would like to request a membership logo for use, please email [info@fpanz.org](mailto:info@fpanz.org) 

**If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.**

# Passive Fire Protection SIG Update

» Author **Justin McEntyre** – Passive Fire Protection SIG Chair

## Get it Right Seminar Feedback:

On Tuesday 17th May we presented the first Passive Get it Right Seminar of 2022. Presenting to a room of over 75 in Auckland and over 40 on the wait list, and an even bigger room for Wellington coming up on 1st June.

Hosting these seminars has reinforced the fact that FPANZ Passive SIG and the industry are delivering some great work across the board. The feedback on the day was exceptionally positive and continued through social media and emails throughout the week.

The speaker panel did a fantastic job of getting across the current state of Passive Fire, Intumescent paint and what “right looks like”. Thank you very much to these people for giving up their time. Speaker panel included:

- » **Philip La Trobe** – Metspray
- » **Garth Moran** – Carboline
- » **George Hare** – BRANZ
- » **Akshat Malhotra/ Henrique Neto** – Beca

This has reinvigorated our energy to host more of these Get it Right seminars and the feedback and thought is that we could easily fill more rooms in Auckland and other regions. It would be great to also attract attendees from the Councils, Architectural fraternity and other trades.

Kind Regards,

**Justin McEntyre**

Passive Fire Protection SIG Chair 2021/2022

# Inspectorate SIG Update

» Author **Stephen Ridder** – Inspectorate SIG Chair

We are seeing an increasing number of projects being carried out to NZS4541:2020. The numbers will only increase if MBIE cite NZS4541:2020 in the C clauses as they propose in their current request for public submissions.

As one knows there are many changes from 2013 to 2020. One of the main areas of change has been the degree and detail to which seismic bracketing and pipe supports must be formally documented in the completion documentation. Additionally, there are changes within section 4 of the Standard which impose a need for gravity hangers and brace components to be listed. Aon is working with FPANZ on the publication of a register of listed hardware.

All of this results in a greater dearth of detail for sprinkler system designers to detail on the drawings and supporting documentation, more precise procurement by project manager, control of site activates by site supervisors, closer reading of plans by the installers, and greater cross referencing by inspectors of the for-construction drawings with what they are seeing physically installed.

By the Standard details of the hanger and bracing design only have to be provided as part of the completion documentation package. That is no different to the process of detailed sprinkler head layouts and pipe plans which are only provided at completion stage. This is predicated on the assumption that component system designers aren't making major mistakes with the processes of hydraulic calculation and general sprinkler set out, and there is little evidence of that. However, the same cannot be said for hanger and bracing design. We are unfortunately seeing examples of bracketing and bracing being poorly executed on projects and that is an alarming situation. It is in no one's interest that after a sprinkler system is installed its only when the as-built package is provided to the SSC that deep and widespread issues are discovered with the hanging and bracing system.

Our experience to date has been the more successful projects are distinguished by one key feature: early and detailed engagement by the designer with the SSC. On these jobs any wrinkles in loading calculations, hanger and bracing set out, and material selections are ironed out during the design phase. As such Aon is asking for hanger and bracing design be submitted with the initial application. This allows Aon to check and confirm the detail of the design is being completed correctly; not just the boarder design inputs such as the seismic design coefficient. The result of this early engagement is that the drawings issued to site contain all the necessary detail for the correct materials to be procured, the site installers to install the right hangers and braces at the right locations and spacings, and the inspector to confirm the physical installation matches what the designer required. These measures help reduce risk for contactors and projects.

No doubt as system designers, contractors and other parties gains familiarity and confidence with NZS4541:2020 the need for early engagement will disappear. FPANZ Getting it Right seminars are one tool for developing the knowledge and skill needed to deliver successful projects. Elsewhere in this newsletter there is information about an upcoming seminar on hanging and bracing to the 2020 edition. In the fullness of time, we will be able to revert to only presenting the broad design inputs at the application stage and leave the detailed drawing and design submission until the completion stage. But until that day arrives, I encourage designers to take advantage of early review by the SSC and any formal training opportunities that arise.

Kind Regards,

**Stephen Ridder**

Inspectorate SIG Chair 2021/2022

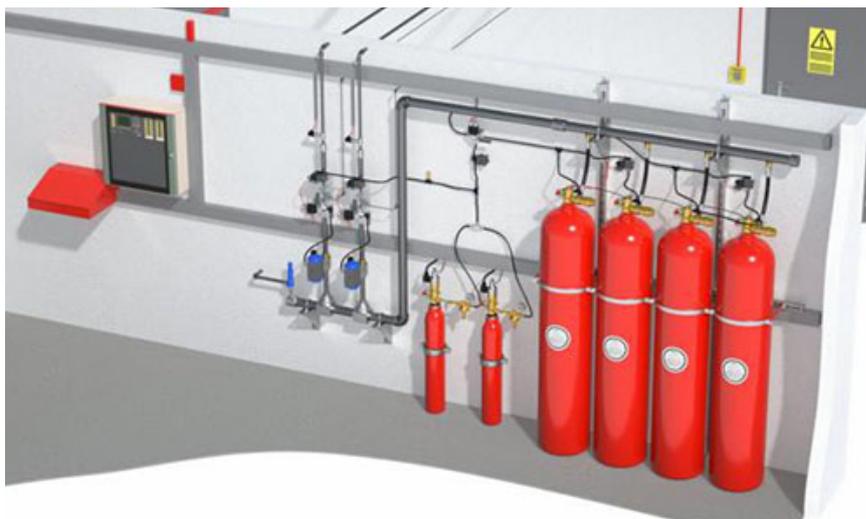

# Safety Alert – Fire Suppression System Cylinder and Manifold Monitoring

Author **FPANZ Team**

*There are many ways that fire suppression systems and their components can cause severe injury, or even kill you.*

*Gaseous Suppression ('Gas flood') systems utilise highly pressurised cylinders and suppression agent delivery networks, with mixtures of various pressurised gases or liquids.*

This article is yet another timely reminder about just one of those aspects that make fire suppression systems so dangerous to work on if they are incorrectly installed, or if you are not fully trained and competent...

## Background:

Single-zone gaseous suppression systems typically discharge the suppression agent directly from the pressurised cylinder(s) into the protected area through open pipework.

Zoned gaseous suppression systems, however, discharge the pressurised agent from the cylinder(s) into a manifold. Directional zone selection valves, under the command of a control panel, then direct the suppression agent to the zone/area with the fire.

Under normal circumstances, the cylinder(s) alone are pressurised. However, if a cylinder release valve leaks when there is no fire to trigger the opening of a directional valve, the manifold can also become pressurised.

## Local 'near miss', Discussion, and Recommendation:

An FPANZ member recently had a situation where a cylinder released pressure into the closed manifold of a zoned gaseous suppression system, but no indication or warning was triggered. This left the system in a dangerous state, with potential for serious harm if work were to be conducted on the system following the release.

As well as being dangerous, the system performance was potentially compromised due to a drop in suppression agent quantity.

Such leakage can happen overnight, or over months, and would typically only be picked up during monthly checks of cylinder pressure. Our member was fortunate on this particular site that their client checks the cylinder pressure gauges daily. ►

## Safety Alert – Fire Suppression System Cylinder and Manifold Monitoring *continued...*

The remedy for this issue is to install pressure monitoring so that the suppression system control panel generates a defect signal automatically for cylinder low pressure. And, on zoned systems, to ensure that the manifold between the cylinder(s) and the zone selection valves is also monitored for any unexpected pressure rise. **FPANZ recommends, in the interests of safety, that this be done retrospectively for any installed systems.**

This event also underlines the importance of checking cylinder pressure regularly. Cylinder release valves have been known to open spontaneously if the cylinder pressure drops too low.

### Summary of Lessons to take away:

- 】 Gaseous suppression cylinder low pressure should be monitored for defect by the suppression control panel.
- 】 In the absence of such monitoring, cylinder pressure (gauge readings) should be checked by the client between monthly tests.
- 】 On zoned suppression systems, ensure that the manifold between the cylinder(s) and the zone selection valves is defect monitored by the control panel for any unexpected pressure rise. If absent, install such monitoring retrospectively.
- 】 There are many ways that fire suppression system components can cause severe injury or harm if incorrectly handled. Staff working on such systems need to be fully trained to identify these hazards and take appropriate measures to avoid them.
- 】 Assumptions are risky and potentially dangerous. If in doubt, ask.
- 】 If you are not trained in the installation or servicing of the specific system you are asked to work on, then do not work on it and seek advice.
- 】 The *FPA Code of Practice for Gaseous Suppression Systems* should be reviewed by all staff working on such systems.
- 】 Training on fire suppression systems is specific and varies from manufacturer to manufacturer.

**ACKNOWLEDGEMENT:** *FPANZ acknowledges, with gratitude, the management and staff of the member company that experienced this incident. Rather than keeping it quiet, they voluntarily supplied this detail so that the wider industry can benefit from their experience. Thank you.*

# SPRINKLER SEISMIC SYSTEMS

## Get it Right Seminar

We resume our Get it right Sprinkler Seminar series that were cut short by lockdown restrictions. This new series is driven by the ongoing changes we face as an industry and the importance of selecting the right products to meet the seismic design and installation requirements of NZS4541:2020.

FPANZ is running a series of half day workshops throughout the country – our aim is to ensure that the industry is continuing to get the latest information and support. These half day workshops will focus on the seismic bracing of sprinkler systems, their components and associated approved hardware. We will be you showing examples that do not meet the requirements of NZS4541:2020. There will be an emphasis on the need to plan and install seismic bracing that meets the requirements of these standards.

The workshops will not work through how to calculate loads and select components – it is more on the emphasis on why and when to do so. A follow-up seminar will refresh how to calculate in the near future.

NZS4541:2020 was published in March 2020 and places much greater emphasis on new seismic resilience requirements of the standard.

The changes to the seismic provisions are ground-breaking, and require a new approach to how the designs are carried out, documented, and installed. These half day will be interactive and there will be lots of ability to ask questions and to participate in discussing solutions and problems in the seismic areas of sprinkler systems under the new standard. We strongly encourage the attendance of site supervisory staff who will benefit from this seminar.

## EARTHQUAKES

Following recent earthquakes events in NZ (Christchurch and Kaikoura) the building industry is facing increasing pressure to design to protect the building and occupants against earthquake damage.

Generally, sprinkler systems have performed admirably in these events, however there has been some criticism of how we are designing our seismic bracing systems. The playing field has changed, and the construction sector is expecting more from the fire industry.

The presenters will outline what will now be expected to ensure that systems can be certified as compliant with the new provisions of the standards.

## PRESENTER:

- **Chris Mak** BE FEngNZ, CPEng, PM.SFPE, CPEng, IntPE(NZ), RPEQ  
– Technical Services Manager, Aon New Zealand

### CHRISTCHURCH: 16 JUNE 2022

MORNING 7.30am – 12.00pm  
AFTERNOON 12.30pm – 5.00pm

### DUNEDIN: 17 JUNE 2022

MORNING 7.30am – 12.00pm

## WHO SHOULD ATTEND

The seminar/workshops are particularly aimed at those involved in design, fabrication, supply, specification, installation and testing of Sprinkler Systems. Those who should attend include:

Sprinkler system designers

Sprinkler system installation supervisors and charge-hands

Sprinkler system installers/technicians

Installation inspectors

Maintenance technicians

Fire system surveyors

Insurance risk managers and surveyors

Sprinkler system component manufacturers and suppliers

Designers and estimators

Council inspectors

## INVESTMENT:

- MEMBERS (single) \$130 each\* +GST
- MEMBERS (multiple) \$115 each\* +GST
- NON-MEMBERS \$200 each +GST

\*Available to FPANZ Financial Members who are fully paid-up.

Morning or afternoon tea is included in these half day seminars.

## SEMINAR CONTENT

The workshop will be presented in a series of parts covering the following timing and topics:

### MORNING SESSION

7.30am	Registration (tea & coffee)
8.00am	Welcome/Introductions. Sponsor Presentation
9.00am	Seismic for Site Staff
10.00am	Morning tea
10.30am	Seismic for Site Staff. An Introduction to NZS4541:2020 (if time allows.)
12.00pm	Close

### AFTERNOON SESSION

12.30pm	Registration (tea & coffee)
1.00pm	Welcome/Introductions. Sponsor Presentation
1.30pm	Seismic for Site Staff
3.00pm	Afternoon tea
3.30pm	Seismic for Site Staff. An Introduction to NZS4541:2020 (if time allows.)
5.00pm	Close

## PRESENTER

### CHRIS MAK BE FEngNZ, CPEng, PM.SFPE, CPEng, IntPE(NZ), RPEQ

Chris has over 35 years' experience in the fire protection industry in engineering and management positions. He currently manages Aon's Fire Protection business unit, which certifies and inspects fire protection installations.

Previously, he was the engineering manager for the NZ branch of a major global Fire Protection Contracting and Servicing company.

He has been involved in the preparation of numerous fire protection standards, including chairing the committees that drafted the last three revisions of NZS4541 "Automatic Fire Sprinkler Systems".

### CHRISTCHURCH: 16 JUNE 2022

MORNING 7.30am – 12.00pm

AFTERNOON 12.30pm – 5.00pm

ADDINGTON RACEWAY

75 Jack Hinton Drive, Addington, Christchurch

### DUNEDIN: 17 JUNE 2022

With over 40 years' experience, FDG is your 'Go-To' supplier for support products and fixings used in the Building Services sector.

Supplying to the mechanical (HVAC) electrical plumbing and fire markets, FDG understands what is involved from design to completion of a project. Our product range takes into account that each job is unique, so we have consolidated a complete range of support products to eliminate the need for multiple suppliers.

As a NZ owned and operated family business, we strive to keep our customers moving and making, bringing an energetic and proactive approach to every job.

FDG's products include strut channel, seismic rated anchors, AON listed bracketing and clamps, and the full range of fixings. The hero product is our German manufactured modular support system (ModFrame), which supports heavy-duty pipework and equipment. Framing design services and seismic design are also part of the FDG offering to keep you moving and making. We understand that time is money so having product direct to site and at the right time for your project is important, which is why our customer service team and fleet of delivery vehicles are ready to serve.

The FDG team is focused on providing effective solutions, not just selling products, which is why we have been a partner to many building services contractors, on projects such as; NZICC, The Pacifica, Christchurch Convention Centre and Commercial Bay.

Our engineering background gives us the confidence to engage at the planning stage, advising and guiding you on the best approach and the right products to optimise time, space and cost.

Think of FDG as a partner offering knowledge and advice plus supplying you the right product that is compliant, safe, and cost-effective.

# URGENT NOTICE

## FOR AUCKLAND SPRINKLER SYSTEMS

**Important information has been supplied by one of our members indicating another round of thefts of Fire Sprinkler Inlets (FSI) couplings is happening in Auckland.** At this stage, thefts have been identified in Penrose and South Auckland. Please ensure that when your staff are visiting any buildings protected by Sprinkler and/or Hydrant Systems, they carry out a visual check on the status to identify any theft or tampering with the couplings.

The theft of these is a serious safety concern as in the event of a fire, Fire Fighters will not be able to boost these systems.

We are also compiling details to forward to the NZ Police to assist with their investigations. **If you come across any of these thefts, please send the details so we can add this to our database and notify FENZ and Police.**

### **ACKNOWLEDGEMENT:**

FPANZ acknowledges, with gratitude, the management and staff of the company that identified these incidents.

# fire NZ 2022

CONFERENCE & EXHIBITION

[WWW.FIRENZ.ORG](http://WWW.FIRENZ.ORG)

REGISTRATIONS NOW OPEN

## EXHIBITOR PROSPECTUS

**21-23 SEPTEMBER 2022**

TE PAE CONVENTION CENTRE, CHRISTCHURCH, NZ

THE FORUM OF FIRE PROTECTION, FIRE SAFETY AND FIRE ENGINEERING PROFESSIONALS

# FIRE INDUSTRY AWARDS

## CALL FOR NOMINATIONS

**This year the FireNZ committee wish to initiate a number of annual awards that become recognised as being representative of the entire fire industry and create a legacy that becomes an aspiration for achievement.**

***“The fire industry awards represent the best of the fire industry and recognise those that contribute to achieving a safer New Zealand”***

We are delighted to announce that nominations are now sought for several awards to be presented at this year’s FireNZ conference and exhibition, 21st – 23rd September 2022 being held at the Te Pae Convention Centre, Christchurch. On the following pages a summary of awards, nomination deadlines, and submission requirements are provided.

**21-23 SEPTEMBER 2022**

TE PAE CONVENTION CENTRE, CHRISTCHURCH  
NEW ZEALAND

All award nominations can be submitted to [info@fpanz.org](mailto:info@fpanz.org)

## Outstanding Engineering Achievement

The FireNZ award aims to recognise contributions made by the candidate to the promotion of the engineering profession. This could be in recognition of:

- Significant contributions to the advancement of the professional recognition of the fire protection engineer.
- A fire design that represents a novel, artistic and imaginative solution to a problem
- A project that has delivered enormous value and impact to either a community, country or organisation
- An outstanding collaboration between an engineering organisation and one or more other organisations, that results in a better project outcome or has a significant positive impact on a workforce, customers or community
- A breathtakingly clever engineering project or product launched or completed in the past two years that has solved an age-old problem or shifted from the 'always done this way' mentality
- An individual or team for inspiring engineering education or a significant initiative. It may include student or peer support, teaching, research or other significant initiatives that result in an enduring positive impact

## Lifetime Achievement Award

The Lifetime achievement / outstanding contribution award is a prestigious recognition of life-long contributions to and career achievements in the field of fire safety in New Zealand.

## Young Professionals Award

The Young Professionals award is for a young person who has demonstrated outstanding leadership qualities, excellence in their career, academic excellence and/or has provided a contribution to the fire safety community.

Candidates must be within five years from completion of their most recent qualification at the time of nomination or start of employment in the fire industry. The maximum age of the candidate is 35 years at the date of the award.

## Competenz Learner of the Year Award

The Competenz Learner of the Year Award celebrates excellence among learners and highlights trades careers in the fire protection industry. The Award acknowledges learners whose skills, drive, commitment and work ethic has helped them to achieve outstanding outcomes. It's open to anyone who has completed a Level 3 or 4 programme through Competenz between 1 January 2021 and 31 May 2022. Entry details will be available shortly and will be advertised through Competenz.

### NOMINATION PROCESS

A nomination from any person or organisation within the fire industry will be accepted and membership of the three FireNZ organisations is not required.

Self-nominations are not accepted

### FIRENZ AWARDING COMMITTEE

The nominations will be considered and recipients chosen by the FireNZ Awarding Committee which is made up of representatives of the FPA, SFPE and IFE.

The judges decisions are final and no correspondence will be entered into.

**21-23 SEPTEMBER 2022**

TE PAE CONVENTION CENTRE, CHRISTCHURCH  
NEW ZEALAND

# National Council 2022

**Chief Executive Officer:** Scott Lawson

**President:** Chris Mak

**Vice President:** Paul Ryan

---

## **ELECTED FPANZ MEMBERS REPRESENTATIVES:**

Bryce Donaldson	Argus
David Prosser	Lifetime Member
Glenn Thompson	IceFire Protection
Garth Moran	Altex
Nicky Marshall	Protech Design
Phil Lacey	GHD

---

## **CHAIRS, SPECIAL INTEREST GROUPS:**

Justin McEntyre	Passive Fire Protection SIG Chair
Llewellyn Mudrovcic (Mud)	Contractors SIG Chair
Phil Jackson	Evacuation Consultants SIG Chair
Steve Smith	HOFFE SIG Chair
Stephen Ridder	Inspectorate SIG Chair

---

## **ASSOCIATED INDUSTRY GROUP REPRESENTATIVES:**

Mathew Vandy	Competenz - HangaArorau
Ed Claridge	Auckland City Council
Todd O'Donoghue	Fire and Emergency New Zealand
Jason Hill	Institute of Fire Engineers NZ Branch
Carol Caldwell	Society of Fire Protection Engineers (NZ Chapter)
Rob Scott	New Zealand Fire Equipment Manufacturers Association

---

## **BOARD OF DIRECTORS**

**President:** Chris Mak

**Vice President:** Paul Ryan

**Member Appointments to the Board:**

- Keith Blind
- Bryce Donaldson
- Justin McEntyre
- Samantha McNaughton
- Nicky Marshall
- David Prosser
