

WELCOME

Welcome to the July newsletter.

We have several projects going on at present. This newsletter will give you a brief update on some of these.

FireNZ Conference 2022

The first FireNZ conference since 2019 is full steam ahead, and it's fair to say there is a strong appetite for this event. The trade show is sold out, with some 50 booths snapped up in record time. There are a couple of sponsorship options left if you want some brand recognition at this 3-day event.

The latest delegates' prospectus can be downloaded from [our website](#). There have been some recent updates, and we still have a few workshop options to update in the coming weeks.

Bookings for the awards/gala dinner have been staggering, and it is set to be the largest event ever. If you are planning to attend, you'd best book quickly as we are already approaching our maximum capacity for the dinner.

The early bird special was due to close 31 July but we are extending this for one more week, to 8 August. So, if you're coming to FireNZ, save yourself some money and book today! The trade show is free to attend over all 3 days – just register at the door on arrival.

We are looking forward to reconnecting with our industry at this great event, and to welcoming all our South Island peers who have a lot less distance to travel this year as this is the first FireNZ conference in Christchurch in more than 10 years.

FPA Product Registers

A new version of the register is about to be released on our website in the next couple of weeks. There have been several suppliers adding new products as well as some minor changes to the document. As always, we include a change log so it's easy to understand the changes in each version. The new version will be Issue 5 Revision 9 and will be available from the following link in due course [Product Registers | FPANZ](#)

The new online passive register has completed the final user testing and 4 suppliers have now converted their data to work in the online register. We will be soft launching this to our passive SIG members in the next week or so. ▶

COMMENTARY cont.

NZS4503 Update

We have booked in a project meeting to revisit this standard, the first since 2005. The aim of this meeting is to figure out the scope of changes required. We want to work with industry as much as possible to ensure that any changes reflect what is needed by our members, end clients and other stakeholders. If you are in the sale and servicing of handheld fire extinguishers and want to be involved, please drop us an email. As this is a workshop-style meeting, we must limit numbers to make things manageable.

Auckland Water Supplies

Those in our sprinkler fraternity will know the pain this issue has caused. It has become more difficult to work with Watercare to address concerns around water supplies and capacity. The implications to this sector are substantial, and we have been engaging with both Watercare and Fire and Emergency New Zealand to see what improvements can be made. Unfortunately, there will be no overnight fix; however, a combined approach from FENZ, FPA and the Sprinkler System Certifier will at least table the concerns, possible implications and requests for improvements. We will keep you updated as this develops.

Membership

We would like to welcome the following as a provisional member of the association.

› Crossroads Fire

We would also like to welcome the following members that have now completed their provisional period to become full members of the association.

- › Delta Fire – Bronze
- › RH Fire – Bronze
- › Wormald – Gold

Until next month,
Scott Lawson
Chief Executive Officer, FPANZ

WANTED

FIRE ALARM AND SPRINKLER TECHNICIANS

ARGUS FIRE PROTECTION provides essential services to commercial and industrial clients throughout the major centres of New Zealand including Auckland, Hamilton, the Bay of Plenty, Wellington and Christchurch. We have been New Zealand owned and operated for three generations, and we invest heavily in our people and clients, in providing innovative solutions, and in the latest technology. We are big enough to cope with large projects and small enough to care for our people and clients.

THE ROLES

Opportunities exist within Argus Fire in the roles of Fire Alarm and Sprinkler Technicians. The roles install, service, maintain and repair/replace fire safety and electrical systems as part of regular fire protection services for our clients.

BENEFITS

- Company maintained **vehicle**
- Latest **phone** (digital platforms used for jobs, timesheets, leave applications)
- All **uniforms** and **PPE** provided
- All **hand tools** and **equipment**
- **Career progression** available
- **Overtime** available and time ½ payment over 40 hrs
- Regular **toolbox talks** to update your knowledge of industry and company
- Staff **incentives**
- **Excellent remuneration** and **supportive work environment**
- **Paid training leave**, and course fees paid by Argus
- **Flexible** working hours
- **Above market pay rates**, depending on capabilities and experience.

ESSENTIAL CRITERIA

- Proof of eligibility to work in New Zealand in a permanent, full-time role
- Current New Zealand driver's licence
- Five plus years' experience in Fire Protection is desirable
- Demonstrable ability to service and repair various types and brands of fire panels and fire safety systems.

DESIRABLE SKILLS & EXPERIENCE

- Written and verbal communication skills, time management, problem-solving, interpreting technical data, and teamwork
- NZQA levels 3 or 4 fire protection qualifications desirable
- Current valid Police and Working with Children Check (or be willing to obtain).

Argus Fire is known for our progressive company culture that fosters well-being and camaraderie amongst our people. We listen to our people and encourage their engagement and development for their job satisfaction and the good of the business and our clients. We have a community focus and are an equal opportunity employer.

If you are interested in these roles, please visit our careers page at www.argusfire.co.nz or contact us on **08004ARGUS**

HOFFE SIG Update

› Author **Steve Smith** – HOFFE SIG Chair

Well after seeing the All Blacks lose a home series, albeit to a good Irish side who deserved the victory, it signals that as in other areas of life things are once again changing. Let's just hope the loss is just a blip for the AB's and not a sign of things to come for our national side.

Our recent HOFFE meeting covered a bit of ground with diverse subjects such as the breaking strain of the safety seals on fire extinguishers and the HOFFE position statements through to our current main topic of the NZS4503 review. I think a good indication of the mood of the HOFFE group was the agreement to have extra meetings outside of those scheduled in the published FPA calendar, this is to ensure ongoing progress with the NZS4503 review.

Another recent change which has been pleasing to see is that more Fire Equipment companies with a HOFFE service focus are getting involved with the group. As I am sure we are all aware, while Fire Equipment importers are also important to this exercise NZS4503 has a strong service focus throughout the document. This means that input from the service sector of our industry is vitally important in order for us to get balance so we all get value out of this document review.

With September being the month of our FIRENZ conference in Christchurch the next HOFFE group meeting is scheduled to be on Friday 7th October at 1pm.

Kind regards,
Steve Smith,
HOFFE SIG Chair 2021/2022

Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

As we move through the winter months, it is acknowledged that there are a significant number of cases of Covid-19 and flu. This is resulting in many areas operating with minimal staff, and in some cases, businesses temporarily closing or going into voluntary lockdown. Currently under the CPF: Orange there is still a requirement for us to be completing drills or training for scheme maintenance. Whilst this may be difficult to achieve, it is important to keep communicating with building occupants about fire risk reduction, maintaining means of escape etc, and when possible, record training and drills, and reporting them through to FENZ.

Part of the scheme approval process where a building has an internal place of safety as part of the evacuation philosophy often involves a site visit by FENZ. As part of this inspection, they assess the proposed procedure against the hardware and evacuation routes / travel to adjacent places of safety available for use in the event of a real emergency. It is essential that when writing procedures, they align with this assessment. A site visit, with a focus on the mobility and ability of the occupants to move through the building is often essential to ensure we get this process correct. This will help ensure the evacuation scheme application meets approval sooner.

Regards,

Phil Jackson

Evacuation Consultants SIG Chair 2021/2022

Passive Fire Protection SIG Update

» Author **Justin McEntyre** – Passive Fire Protection SIG Chair

Assessments – ask the extra questions:

As most of us are aware AS1530.4 & AS4072.1 assessments satisfy compliance with NZBC and Acceptable solutions. However, when utilising an AS4072.1 assessment I would urge a little extra caution.

Assessments are great & they fill a needed gap in the market whereby not every single scenario can be tested or it may not be commercially viable to do so.

Too many times I've been given an Assessment that has a better rating or easier installation than a tested solution – This makes life very easy when specifying, installing or signing off to rely on something. However, it is possible that the assessment has made an assumption that a test wasn't able to assume or proved a wrong assumption. Or with all respect the lab assessor may have overlooked a particular element.

This is because tested is a higher threshold than assessments.

There are entire product lines available that are more or less based on AS4072.1 assessments. This is perfectly fine under our building code – however is it actually, right?

When reading through AS4072.1 it is clear that an AS4072.1 assessment is written hand in hand with AS1530.4 tests only – however there are proposed AS4072.1 assessments written based on tests other than AS1530.4. There are even assessments based on other assessments.

AS4072.1 is very specific on what can be assessed & what can't – for instance you can't assess anything larger than what has been tested, nor can you assess different separations (other than superior substrates). Yet we find assessments in the market that have assessed entire new sizes of products.

I have witnessed multiple specifications this year from consultants that appear to have taken an easy path with assessments when in fact there are better tested solutions available.

Here is a few check lists items:

1. Recommend tested takes precedence over assessed when both are an option – many consultants state this in their specs
2. Check if it is actually an official AS4072.1 assessment – the wording in the report will state if it is or isn't – other closely worded reports such as opinions do occur
3. Is the report valid – AS4072.1 assessments must have a validity period less than 10 years
4. Has the assessment report been superseded – all assessment reports have a caveat that if any additional information becomes known, or future tests finds this assessment wrong then the assessment is not valid
5. Is the assessment report silent on any critical information? For instance a test report it is very easy to see exact installation, fixings, mastics and the like – However, an assessment report may not actually state the exact fixing method or the like. Most lab technicians will confirm that often the fixing method is the critical failure point, yet there are assessment reports available that don't state how a certain device is fixed, what embedment, what flanges, where mastic seals etc are or aren't.
6. Does it pass the smell test?

Ask yourself this – if an assessment report is later proven to be wrong, or a test proves it wrong or needed additional installation or product have you done a thorough effort in due diligence in checking?

Kind Regards, **Justin McEntyre**

DELEGATES BROCHURE

RELEASE 2

21-23 SEPTEMBER 2022 • TE PAE CONVENTION CENTRE, CHRISTCHURCH, NZ

THE FORUM OF FIRE PROTECTION, FIRE SAFETY AND FIRE ENGINEERING PROFESSIONALS

FIRE INDUSTRY AWARDS DINNER

22ND SEPTEMBER 2022
TE PAE, CHRISTCHURCH

“The fire industry awards represent the best of the fire industry and recognise those that contribute to achieving a safer New Zealand”

This year the FireNZ committee wish to initiate a number of annual awards that become recognised as being representative of the entire fire industry and create a legacy that becomes an aspiration for achievement.

We are delighted to announce that nominations are now sought for several awards to be presented at this year's FIRENZ Gala Dinner, 22nd September being held at Te Pae, Christchurch.

For more information please visit www.firenz.org
