

## WELCOME

*Welcome to September's newsletter*

As this year speeds towards December, we are in the full swing of the final stages of planning for the annual FireNZ conference, preparing for the annual general meeting (AGM) and working on continued professional development (CPD) offerings.

Scott Lawson

### FireNZ Update

As you read this, FireNZ 2023 will be just a couple of days away. This is always a busy and exciting opportunity for our industry to gather from across New Zealand and the South Pacific and to invite others from around the world to our country to celebrate, learn, share, and grow.

### TRADESHOW

The FireNZ tradeshow has over 50 booths booked. Even if you are not attending the conference presentations, the tradeshow is the perfect chance to see all the main industry suppliers in one location. I have on good authority that new products are being launched and showcased there this year. The tradeshow is always free for those in our industry and is a great networking opportunity and chance to see the products on offer.

### SPEAKERS

We always have a great line-up of speakers, and this year is no exception, with way too many to list here. Topics include lessons learned from and analysis of local and international fires; best practice; insurance, regulations, compliance, and reporting; and AI in fire engineering applications, among many others. Our international keynote speakers will give us a feel for international trends and topics. If you haven't yet checked out the list of speakers, go to [www.firenz.org](http://www.firenz.org) to download the latest brochure.

### SOCIAL MEDIA

If you are unable to attend, you can follow what's going on via our LinkedIn page. We will be ►

## COMMENTARY cont.

posting regular updates on our activities, awards nominations, presentation information, and the like, so follow here to stay up to date: <https://www.linkedin.com/company/firenz/>.

In conjunction with our FireNZ partners – the Institution of Fire Engineers and the Society of Fire Protection Engineers – we look forward to welcoming you to another amazing conference.

### Industry training and CPD

As an industry body, we are always looking for ways to improve standards and highlight what separates our members from others. Train and upskilling your workforce comes at a cost, but our industry protects the community from the devastating effects of fire, so it is important that we remain at the top of our game. We are working hard on new projects to offer more industry training, and this will involve launching a new training facility owned and run by our industry. We will be providing further updates in the coming months.

We are also working on the CPD requirements for our industry, and we do need to push this further. Most professional industries require CPD, and clients expect to see us do this. The renewal process for current certifications will soon include a requirement for a fixed amount of CPD.

It is worth noting that all FireNZ conference sessions come with relevant CPD hours and certificates, as required by many of you.

Expect more in the space of training offerings from FPANZ as we work to improve and upskill our workforce and to attract the next generation into it.

### AGM

After FireNZ, the next milestone is our AGM in November. This is an important event during which we update members on our performance results and our audit and vote on council and board positions. As a membership organisation, it is important for members to be part of the process, so we will send information to each key member contact before the meeting so you can review it and plan ahead.

We hope to see you at FireNZ 2023.

Until next month,

**Scott Lawson**  
Chief Executive Officer, FPANZ

# fire NZ 2023

CONFERENCE & EXHIBITION

[WWW.FIRENZ.ORG](http://WWW.FIRENZ.ORG)

FREE TO ATTEND • 50 INDUSTRY SUPPLIERS IN ONE LOCATION

## FIRENZ TRADE SHOW

**ATTENTION ALL Field Staff,  
Technicians, Supervisors,  
Project Managers, Building  
Owners etc...**

**NOT TO BE MISSED!** The Annual Premier Event for the Fire Protection Industry will be open to the public and trade on Tuesday 3rd to Thursday 5th October 2023

Come along to the FireNZ Trade Show Exhibition and learn about the latest developments in the fire protection industry from the leading suppliers.

**OPEN TO THE PUBLIC  
& TRADE:**

**TUESDAY 3rd October**  
8.30am – 5.00pm

**WEDNESDAY 4th October**  
8.30am – 5.00pm

**THURSDAY 5th October**  
8.30am – 1.30pm

**3-5 OCTOBER 2023 • SHED 10, QUEENS WHARF, AUCKLAND**

THE FORUM OF FIRE PROTECTION, FIRE SAFETY AND FIRE ENGINEERING PROFESSIONALS

# Evacuation Consultants SIG Update

› Author **Phil Jackson** – Evacuation Consultants SIG Chair

The updated version of the online scheme application has been running for about a month now. I expect many of you will have had a chance to experience the new system. As with any new operating environment, there have been some teething issues, which has led to processing delays. The team are working hard to update and fix system bugs, while maintaining their business as usual functions, such as processing schemes and drill reports. The team thanks you for your ongoing understanding and continued patience.

The working group for the evacuation scheme platform are actively seeking feedback, so they can improve the user experience. If you have any suggestions about how the system can be enhanced please forward it to [rcg@fireandemergency.nz](mailto:rcg@fireandemergency.nz)

FireNZ is fast approaching! The line up is varied this year, with something to appeal to everyone in the fire industry, and any roles that are impacted by fire designs, systems and evacuation management. Check out the final delegates prospectus [here](#). 🙌

As previously mentioned, this will be my final year working in the role of SIG Evacuation chair, with my last meeting being held in November. I look forward to seeing many of you at FireNZ next month.

**Phil Jackson**  
Evacuation Consultants SIG Chair 2022/2023

# HOFFE SIG Update

› Authors **Steve Smith & Lance Hunt** – HOFFE SIG Chairs

Another month has gone by, we have seen some really entertaining and sometimes frustrating sporting action and we are now heading into another load of accusations and false promises ahead of another election.

It has also been surprising to hear reports that some people are out there marketing their fire extinguishers as being N.Z. compliant fire protection equipment that doesn't require any servicing and certifying! Given that the N.Z. standard for Hand Operated Fire Fighting Equipment (HOFFE) specifically including fire extinguishers is NZS4503:2005, and it stipulates in section 1.1.1 © "requirements for the regular inspection, testing and recharging and general servicing of hand operated fire-fighting equipment". Additionally in section 2 it states that for fire extinguishers to be compliant, service inspections shall be carried out by a "Competent Person" (definition in NZS4503:2005 section 1.4) within a 12-month timeframe and hydro-test five yearly, the claims of no servicing requirement seem false!

It is also worth noting that in what are deemed "Aggressive Environments" (definitions in NZS4503:2005 sections 2.3.1 & 6.2.2) the service inspection requirement becomes 6-monthly and the hydro-test becomes due after three years.

Guidelines/inspection schedules for the monthly, yearly and five yearly maintenance requirements are also contained within NZS4503:2005 on tables 6.1, 6.2, 6.3 & 6.4 - they are in tick box form and are pretty user friendly. It is also worth noting that if you use the inspection schedules it also picks up the requirement for the location sign aka "For Use" signs (NZS4503:2005 6.1.2 and 6.2.1) which are a valuable tool when locating the fire equipment and assessing what fires it can be used on. When you are servicing and certifying the fire equipment it is important to realise that you are also certifying that it is correctly installed and located appropriately to the risk (NZS4503:2005 6.1.1 7 6.4.5.).

All this of course doesn't mean much if it is not enforced, that said we do know that this standard has been used in recent times as part of the reference material by the Commerce Commission in a prosecution against the owners of a fire equipment company. I am also sure that most Insurance Companies would take a dim view of companies that do not maintain their fire-fighting equipment?

With a variety of companies distributing different types of fire extinguishers onto the N.Z. market, in recent times this type of activity has prompted discussion around whether or not a fire extinguisher register is warranted?

Have a great month and we hope to see you at the FIRENZ Conference & Exhibition at Shed 10 in Auckland from 3-5 October (entrance to the trade show is free of charge), our next HOFFE group meeting is on the 27th October.

Regards,

**Steve Smith & Lance Hunt,**  
HOFFE SIG Chair 2022/2023

# Passive Fire Protection SIG Update

» Author **Justin McEntyre** – Passive Fire Protection SIG Chair

## **ANARP – Cost Assessment:**

The challenge is upon the industry to raise the bar when it comes to ANARP assessments of buildings. In my opinion the weak point to date has been regarding Cost assessment of Pain vs Gain. Seldom do we see or hear of sufficient cost assessment to provide justification for the decisions made by Fire Engineers when it comes to ANARP considerations. Simply stating that a full compliance upgrade is cost prohibitive isn't really a suitable effort. I bravely say that very few Fire Engineers ever pick up the phone to a specialist contractor or Quantity Surveyor to seek advice regarding cost when making ANARP considerations & I would hedge my bets that very few Fire Engineers have up to date & accurate cost data at their fingertips to make these educated guesses. I do acknowledge there are some that do make this effort.

The questions I pose to the industry is:

1. What is being done regarding cost assessment?
2. What conversations are being had between parties, industries & with other disciplines, contractors & consultants such as QS & the like?
3. How can we work together for better outcomes?

The following are all key considerations that should be taken into account when ANARP considerations are being made:

1. What are the Investment gains from the project – i.e if it is a commercially lead project there will be investment gains by undertaking the work, therefore there should be a consideration & question regarding the investment returns. Seldom do developers undertake work without having first completed feasibility studies or at least know their intended return therefore there is a baseline to consider the cost of the upgrades against. If the investment returns are significant, is it reasonable to ANARP Fire upgrade costs out?
2. Are all upgrade options considered & all new Technologies considered? There is several ways to skin a cat particularly when it comes to Passive Fire Protection & remedial works or upgrades. In fact as Technology has advanced over the past 5 years there are new upgrade systems that are specifically targeted at ANARP situations such as Naked Wall, Paint Upgrade systems to plasterboard or the like, Wireless smoke alarm systems, topside vs underside methodologies – therefore cost of disruption & the like are coming down
3. Can the work be staged? – i.e could the work be completed over several stages or a period of time, therefore making the work fit within budgets &/ or access limitations without making too much disruptions.
4. What is the cost of doing the work now vs at a later date? – i.e ceilings are down for other works & it will therefore never be cheaper or easier to complete other upgrade aspects.
5. FENZ Levy offsets
6. In the other direction if the Costs prove that the project would be a Go/ No go due to the upgrade work was to be enforced then there is clear evidence backed up by costs that this is the case. ►

## PASSIVE SIG Update *cont.*

It would be easy for standard rates to be applied across simple & standard elements of Fire Safety works, but there will be tricks & challenges with every building. But this need not be a showstopper. I am yet to come across a contractor that isn't prepared to do ECI Cost advice at high level or deep level for good clients & consultants. Therefore, these ANARP cost questions can be obtained quickly & cheaply by way of engaging with good contractors. Better questions, better relationships will deliver better results for buildings & the occupants.

Kind Regards,

**Justin McEntyre**

Passive Fire Protection SIG Chair 2022/2023

*Announcing the inaugural launch of the*

# **FireNZ PRESIDENTS CLUB**

This invitation-only event is the chance for our Sponsors, Keynote speakers, and representatives from each of the three FireNZ partner organisations (FPA, IFE, SPFE) to get together for an exclusive networking event.

This event will be held on the conclusion of day one of FireNZ 3rd of October in a spectacular venue close to FireNZ and is intended to recognise and thank our generous sponsors for helping FireNZ become such a great event for our industry. The exclusive dinner will provide an opportunity for invited guests to meet with key industry spokespeople.

The dinner will be on  
Tuesday 3rd October at 6.30pm

# FIRENZ INDUSTRY AWARDS AND GALA DINNER

4<sup>TH</sup> OCTOBER 2023

LEVEL ONE, SHED 10, QUEENS WHARF, AUCKLAND

The FireNZ committee wish to present the annual awards that become recognised as being representative of the entire New Zealand fire industry and create a legacy that becomes an aspiration for achievement.

For more information please visit [www.firenz.org](http://www.firenz.org) or our LinkedIn page for the latest release information <https://www.linkedin.com/company/firenz/>

## FEATURING GUEST SPEAKER LAURA ANDREWS

*Emergency Services  
Officer & Antarctic  
Cross-country Skier*

## 2023 AWARD NOMINEES

### OUTSTANDING ENGINEERING ACHIEVEMENT AWARD

- › Kevin Thompson – Argus Fire
- › Sherry Wang – Origin Fire

### EMERGING PROFESSIONAL AWARD

- › Shabs Zareei – Holmes NZ LP
- › Vincent Selvakumar – Origin Fire
- › Sherry Wang – Origin Fire

### INNOVATIVE PRODUCT AWARD

- › Ryanmesh – Ryanfire
- › FireQA – Clarinspect
- › Mass Timber Construction Systems – Tech Coatings

### COMPETENZ LEARNER OF THE YEAR

- › Teck Chan – Fire Security Services Ltd, Wellington
- › Melissa Eveleigh – Firetech Services Ltd, Napier
- › Corey White – Alliance Fire & Security, Wellington
- › Jodie Spence-Ord – Fire Fighting Pacific, Canterbury
- › Shiraiwi Toshiyuki – Alliance Fire and Security

# Building (Building Product Information) Regulations 2022

Organisations supply equipment into the fire protection industry will need to be cognisant of the requirements of the above referenced regulations. We have an informal opinion that this will apply to equipment used in fire protection systems, such as sprinklers, valves, fire alarm panels and smoke detectors. These regulations come into force on 11 December 2023.

Further information can be found at [Step-by-step guide – building product information requirements | Building Performance](#)

The Regulations can be downloaded from [New Zealand Legislation](#)

## Use of FPANZ Logo

**Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo.**

This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <https://www.fpanz.org/about/logo-guidelines>

If you are using an incorrect logo and would like to request a membership logo for use, please email [info@fpanz.org](mailto:info@fpanz.org)

**If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.**
