

WELCOME

Welcome to the final newsletter of 2023.

By all accounts, it has been another busy end to the year. The usual demands on business for the supply of equipment, completion and sign off of jobs and the like seems to increase each year, despite the supposed slow down in consents and general downturn that has been talked about. This time of year is also busy for the association, especially as we have just conducted our end-of-year processes to retain our not-for-profit status.

Scott Lawson

Association Updates

Nominations for and voting on positions has concluded, with the following positions confirmed:

- › Justin McEntyre – elected as FPANZ president
- › David Prosser – elected back to the FPANZ council
- › Bryce Donaldson – elected back to the FPANZ council
- › Ben Bakker – elected as passive special interest group chair.

Other formalities will include the formation of the FPANZ board in the new year, when vacant positions are filled by the elected council members.

The association's constitution and rules were updated before the AGM and put to members to vote on. They were accepted, with 98% of all eligible votes in favour. The updated constitution will go through the next phase to bring it into effect. Most of these changes were to ensure the association remains compliant with the changes to the Charities Act, and some minor changes were made to ensure smooth operation of FPANZ and its board.

We also bid farewell to Liza, who has been on a temporary contract with us. I would like to thank Liza for her help as we transitioned from a work-from-home model to our 2024 model, which includes a new office and training facility. ►

Alarms Product Register

We are about to release another update (issue 5, revision 10, December 2023) of the alarms product register. The main changes are as follows:

The following suppliers have updated compatibility listings and/or new products: Ampac, Bensan, Fire Protection Technologies, Johnson Controls, Pertronic, Siemens, Xtralis.

This can be downloaded from our website <https://www.fpanz.org/docs/product-registers>

FireNZ 2024

Our next FireNZ will be held from 23 to 25 October at Tākina Wellington Convention and Exhibition Centre, located in the heart of New Zealand's capital city. We have started work on plans for the next conference and trade show, with a continued focus on improving it and delivering even better continual professional development and value for our stakeholders.

We already have great speakers planned and some networking opportunities that will be significantly different from in previous conferences. Note that Wellington is a small and compact city, so we do encourage you to book your travel and accommodation early. Why not turn up the day before or stay for the weekend afterwards and enjoy some of the great opportunities available in our capital city.

Sprinkler and Fire Alarm Contractors' Training

I am pleased to let you know that a small group of dedicated fixed fire contractors are helping develop some short introduction training content. We have some formats and structure planned and will provide more information in the new year. We are seeking subject matter experts to help, so if that is you, or you know someone who is looking to give back to the industry, please get in touch with us.

New Members

I would like to welcome the following new provisional member:

- » TM Consultants

In closing, I wish everyone who helps our association, the board and council members, special interest group attendees, and, obviously, our valued members, a happy and safe holiday break. We will be closed from 22 December 2023 until 15 January 2024 but will check for urgent messages online. Our next newsletter will be in February 2024.

Until then, all the best to you.

Scott Lawson
Chief Executive Officer, FPANZ

Evacuation Consultants SIG Update

» Author **Phil Jackson** – Evacuation Consultants SIG Chair

This will be my last article written as the Evacuation SIG Chair. I would like to extend my gratitude to those that have supported me throughout this time and contributed to our meetings. I look forward to being part of our meetings next year and continuing to work with the association.

A note from FENZ - The Regulatory Compliance Group will be closed over the Christmas and New Year's holiday period from Midday Friday 22nd December 2023, returning Wednesday 3rd January 2024 for evac scheme processing and scheme-related enquiries, however, will operate at reduced capacity until Monday 8th of January. The Permit and Hazard team will continue to operate as usual.

Work continues to work through the backlog of evacuation scheme applications, your ongoing patience is appreciated.

Wishing you all a happy new year and a safe Christmas break.

Phil Jackson

Evacuation Consultants SIG Chair 2022/2023

HOFFE SIG Update

› Authors **Steve Smith & Lance Hunt** – HOFFE SIG Chairs

Well another year is effectively gone and now we can look forward to having a bit of a break and some time with family and friends.

We would like to thank Chris Mak for his time at the helm, his leadership and his direction of the Fire Protection Association, we wish him all the best for the future.

As many of you will be aware Scott Lawson (FPA) and Peter Gallagher (FENZ) are having a meeting in Wellington with Standards New Zealand on behalf of our HOFFE Group to further progress our NZS 4503 project. We are also well into finalizing the details of our funding initiatives for this project with great support from the major fire equipment wholesalers.

Our next HOFFE Group meeting is scheduled for Wednesday 14th February 2024.

In closing we wish everyone a Merry Christmas and Happy New Year, stay safe, enjoy some time with family and friends and we look forward to a great 2024,

Have a great month.

Regards,

Steve Smith & Lance Hunt,
HOFFE SIG Chair 2023/2024

Passive Fire Protection SIG Update

» Author **Ben Bakker** – Passive Fire Protection SIG Chair

As we reflect on the accomplishments of 2023, it is with great pleasure that I extend my sincere congratulations and appreciation to Justin McEntyre, our outgoing Chairman, for his remarkable achievements over the past three years. Justin, your dedication has truly set a high standard for our organization, and we are thrilled to witness your new role as our President.

As the incoming Chair, I am enthusiastic about the prospect of building upon the successes of the Passive SIG. I eagerly anticipate embracing new challenges and advancing the initiatives we have worked diligently on throughout this exceptional year. A warm welcome is also extended to Loren Olsen, who has taken on the pivotal role of Training & Technical Manager.

Looking ahead, my commitment lies in contributing to the progress and development of key aspects within our industry, namely:

1. Fire & Smoke Stopping Code of Practice
2. “Get it Right” seminars conducted across the countryside.

The Passive Industry has rightfully become a priority in building projects, influencing design, construction, and compliance phases. Together, as part of the FPANZ Passive SIG, we can uphold the crucial role we play in elevating industry standards.

A significant milestone for our industry is the introduction of the New Level 4 Passive qualification by Competenz. This qualification marks a crucial step forward, and I strongly encourage your business to embrace this opportunity by engaging your staff in this valuable initiative.

As we approach the festive season, I extend my warmest wishes to each and every one of you.

May you have a Merry Christmas and a Happy New Year.

Here’s to a prosperous and collaborative 2024!

Kind Regards,

Ben Bakker

Passive Fire Protection SIG Chair 2023/2024

Recording and Reporting on the amount of Diesel Fuel Consumed:

Climate Change factors are quite rightly gaining more focus in everything that we do, be it at home or in the workplace. Over the years New Zealand has made several international commitments such as the Kyoto, Montreal, and Paris protocols. In recent times there has been a focus on Greenhouse Gas (GHG) emissions. As a result of such initiatives, some members will have already experienced customers seeking data on the quantity of diesel fuel that we typically consume during the testing of diesel fire pumps on an annual basis. Some organisations are forced to provide GHG emissions reporting statements such as a Carbon Related Disclosure Statement or as part of the Carbon Neutral Government Program Reporting. In addition to this there are organisations that just want to do the right thing and be good corporate citizens and report their GHG emissions on a voluntary basis. To assist with this task the Ministry for the Environment has published a document titled “Measuring Emissions: A guideline for Organisations”. This contains practical steps as to how to estimate and report GHG emissions.

As an example, if we consider that a medium sized diesel driven fire pump (i.e., 100kW power draw at the pump) is run every week for a period of 15 minutes and has a further 2 hours run as part of its annual requirement this equates to approximately 390 litres of diesel used annually. This estimate has been based on the assumption, that the pump test return has been sized correctly, if this is not the case the fuel used per year may be higher. This quantity of fuel, in turn produces the following estimated quantity of emissions based on the emission factors published in the above-mentioned document and the assumption that in this example a fire pump is deemed to be used for commercial use as opposed to industrial use.

- 】 CO_2 emissions = $390\text{L} \times 2.67 = 1,041.30 \text{ kg CO}_2$
- 】 CH_4 emissions = $390\text{L} \times 0.0102 = 3.978 \text{ kg CO}_{2-e}$
- 】 N_2O emissions = $390\text{L} \times 0.00581 = 2.266 \text{ kg CO}_{2-e}$
- 】 Total CO_2 emissions = $390\text{L} \times 2.69 = 1049.1 \text{ kg CO}_{2-e}$

(Note- as per the note in the Ministry’s publication, derived quantities may not add up due to rounding)

The Fire Protection Association supports environmental initiatives and would therefore encourage all of its members to actively assist and cooperate with their customers with the collection and reporting of such valuable data. Ideally this data collection could be undertaken electronically i.e., to show that as an industry, we are also serious about reducing our carbon footprint and emissions. This could be as simple to achieve as keeping an electronic record of billing quantities i.e., how much diesel fuel was purchased for that customer within a given year. Alternatively, a “Diesel Fire Pump Fuel Consumption Record Sheet” could be established on site to record the likes of, how much fuel was added on a given date and the total annual quantity used in a given calendar year.

For those members that want to undertake further reading on emissions reporting for NZ organisations, the Ministry for the Environment has published the “Measuring Emissions: A guideline for Organisations”.

BUILDING PERFORMANCE

Kia ora

The next set of Determinations 2023/019 – 2023/030 are available on the Building Performance website.

The latest upload includes the following determinations that may be of wider interest:

[2023/019](#): Regarding the proposed refusals to issue two code compliance certificates for building work to construct and alter a dwelling.

[2023/020](#): Regarding compliance of the depositing and collection of solid waste.

[2023/021](#): The refusal to issue a code compliance certificate for a 21-year-old dwelling.

[2023/022](#): Regarding the compliance of an existing pool barrier with section 162C and consideration of a waiver or modification.

[2023/023](#): Regarding the failure to issue a notice to fix for a concrete slab foundation.

[2023/024](#): Regarding the authority's proposed decision to refuse to issue a building consent in respect of the location of a pool barrier.

[2023/025](#): The authority's decision to issue a notice to fix for a container arch structure that was constructed without building consent.

[2023/026](#): Regarding the compliance of a pool barrier with section 162C of the Building Act 2004.

[2023/027](#): The compliance with clause E2 of a proposed direct-fixed plywood cladding system on a building.

[2023/028](#): Regarding the compliance of a pool barrier with section 162C of the Building Act 2004.

[2023/029](#): An authority's refusal of an application for a discretionary exemption from the requirement to obtain a building consent.

[2023/030](#): The issue of a building consent, specifically in regard to three cladding details.

[View previous determinations](#)

BUILDING PERFORMANCE

BUILDING PERFORMANCE

Kia ora

Updated documents have now been published as a result of the Building Code 2022 consultation.

New published documents

- **Plumbing and drainage**

We have amended the acceptable solutions and verification methods to support plumbing and drainage work in Aotearoa New Zealand. This includes changes to Acceptable Solutions E1, G12 and G13.

- **Protection from fire**

We have amended Acceptable Solutions C/AS1, C/AS2, F7/AS1 and Verification Method C/VM2 to improve the safety of people from fire. This update includes the introduction of interconnected smoke alarms into residential units.

- **Structure**

We have removed Clause 18.7.4.4 of NZS 3101.1:2006 from the citation in Verification Method B1/VM1. As part of this change, precast hollow-core floor assemblies can no longer be designed using this verification method. This change has no transition period and is effective from 2 November 2023.

- **Energy efficiency**

The staged implementation process for window and door insulation requirements for new residential buildings has now ended. All areas of the country now have similar levels of window performance in H1/AS1 and H1/VM1.

Building (Building Product Information) Regulations 2022

Organisations supply equipment into the fire protection industry will need to be cognisant of the requirements of the above referenced regulations. We have an informal opinion that this will apply to equipment used in fire protection systems, such as sprinklers, valves, fire alarm panels and smoke detectors. These regulations come into force on 11 December 2023.

Further information can be found at [Step-by-step guide – building product information requirements | Building Performance](#)

The Regulations can be downloaded from [New Zealand Legislation](#)

Use of FPANZ Logo

Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo.

This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <https://www.fpanz.org/about/logo-guidelines>

If you are using an incorrect logo and would like to request a membership logo for use, please email info@fpanz.org

If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.
