

WELCOME

Welcome to April's newsletter.

Fires in lodge-style accommodation have made the headlines in the past month, with two in the space of just two weeks in Auckland. It is concerning and a reminder that, as an industry, we must make sure we are doing the best we can to ensure building safety. There is increasing scrutiny of the independent qualified person (IQP) space and on the testing, servicing, and maintenance of fire protection systems in buildings. This is a timely reminder to ensure you and your staff are completing all required works and that correct documentation is being collected and filed. It is also worth noting that, as mentioned in previous updates, there will be more investigation into training of staff and continued professional development (CPD), so now is a great time to ensure you can show that your staff are compliant and keeping up with current developments.

Scott Lawson

City Garden Apartments

Another significant headline this month has been the widespread publicity regarding the City Garden Apartments in Albert St, Auckland, which underscores the critical importance of diligent fire safety management in our industry.

On Wednesday 17 April, the residents of City Garden Apartments were understandably alarmed when a 'dangerous building notice' was issued because of significant defects in the fire safety systems supposed to be protecting the 16-storey tower. This notice caused concern and disruption among residents, who were initially instructed to vacate the premises by Monday.

Due to the efforts of some of our members, including a fire protection service and a fire engineering consultancy, the building has now been deemed safe once again.

Some of the key issues that were identified and resolved included:

- › lack of an audible alert tone in all apartments in the building
- › insufficient smoke detector coverage, particularly in common areas
- › inadequate evacuation procedures.

It is very concerning that the building had been left non-compliant since some time in 2017, primarily because of inadequate servicing and maintenance of the fire systems by ▶

a non-FPANZ-member company. This case should serve as a stark reminder of the grave consequences of neglecting fire safety protocols and the importance of entrusting such crucial responsibilities to competent and experienced professionals. The moral and legal obligations that we sign up for when providing services must not be underestimated. Luckily, there was no loss of life in this situation.

As members of FPANZ, it is incumbent upon us all to prioritise the safety and wellbeing of occupants in all buildings under our purview. FPANZ urges each of you and your staff to remain diligent to ensure that fire safety systems are regularly inspected, serviced, and maintained to all relevant standards and codes to prevent such incidents from occurring in the future. Where owners are unwilling or uncooperative, these matters should be clearly documented and reported to the territorial authority, Fire and Emergency New Zealand, and other appropriate organisations.

Let us all take this opportunity to reaffirm our commitment to excellence in fire safety management and to continue working collaboratively to uphold the highest standards of safety within our communities. It goes without saying that FPANZ members have a duty of care and commitment to the code of ethical conduct all members are bound by. Let's ensure that we all meet our obligations and continue to protect our communities and those most vulnerable who rely on us doing the right thing.

Alan Blackler

Those of us who have been in the fire protection industry for many years will know of Alan Blackler who resided in Christchurch and worked for Wormald. It is with a heavy heart that we found out Alan passed away on the 21st of April. I was fortunate to meet and work with Alan in one of my previous roles in the industry and can say he was one of the good guys and dedicated many years of his life to our industry. To our members in the South Island, Alan was very well known and admired in equal measure, including by his competitors. I wish to offer my sincere condolences to Alan's family and friends. Please see our full tribute to Alan on page 4.

Fire Safety Regulation Stakeholder Reference Group

I am pleased to announce that FPANZ has been invited to participate in the Fire Safety Regulation Stakeholder Reference Group. At the time of writing, we don't yet have any information to share with members, but rest assured that we will be active participants and will consult with our members and seek input where appropriate based on what is actually going to be covered in this process. Further updates will follow once we have seen the terms of reference and what will be included in this project.

Halon Collection

We are in the process of seeking information on any Halon 1211 and 1301 still being stored in New Zealand. If you have Halon to dispose of, please email us with the following information: quantity and type of Halon, photos of the cylinders, and serial numbers and other identifying tags. We can then get in touch to let you know what disposal costs will be; we aim for a collection to start in quarter 3 of this year.

FireNZ Update

Exhibitor space went on sale just three weeks ago, and we have already sold over 75% of our booths and sponsorship options. I would strongly encourage you to get in touch if ►

COMMENTARY cont.

you want a presence at FireNZ. We have a great programme in development and will be announcing our second batch of international keynote speakers in the next month. If you will be coming to FireNZ and don't want to wait for the full programme, we have a presale option. This will be the best price available for attending FireNZ, and we expect to sell out as we continue to announce our full programme in the coming months. Don't miss out – this is going to be a good one.

Membership

I would like to welcome two new members this month:

- › Twelvea Ltd
- › Logic Group

Until next month,

Scott Lawson
Chief Executive Officer, FPANZ

THE FORUM OF FIRE PROTECTION, FIRE SAFETY AND FIRE ENGINEERING PROFESSIONALS

Alan Blackler

Alan was a long serving Wormald employee who was well recognised in the fire protection industry in the South Island and throughout New Zealand.

Alan had a long history with Wormald in the South Island being involved many large and iconic projects throughout both the South and North Islands.

Alan started in the industry in 1978 as a designer and progressed through the business to be Wormald's South Island Regional Manager.

Alan will be remembered as one of the "good guys" and was a special character who was often described as one of the few managers in the Industry who could play with the best of them, but was always respected by his peers and his staff. He was seen as an honest, ethical and driven manager, who supported his team.

Alan always had time for his staff and was responsible for training many of the Industry leaders of today.

A huge number of people considered Alan to have been their mentor and professional role model. He had a massive impact on the professional and personal lives of a lot of people. Bevin Davis, Wormald's South Island Regional Manager reports that he has lost

count of the number of people who have commented over the last week or so on how he helped them professionally and personally with his sage advice and willingness to 'jump into the trenches with you' when required. He also had a very mischievous sense of humour and loved to instigate situations, and then sit back to watch the hilarity unfold! The best comment he says he could add for Alan, was that he brought out the best in his workmates and friends, and occasionally in social situations he could bring out the 'mischievous teenagers' in us too!

Alan led the contracts team at Wormald with efficiency and awareness of costs, the least number of sprinklers, the best way of running the pipe, the most economic hangers and the most efficient way of installing the system. But there was no corner-cutting, the systems had to comply and be signed off.

Alan will be sadly missed, but his memory will live on with all of those who trained, worked with and for over his 40-plus years in the Fire Protection Industry.

We wish to offer our sincere condolences to Alan's family.

Dame Judith Hackitt FEng FICHEM

Independent Adviser to the UK Government on Fire Safety

A chemical engineer who has spent more than 20 years in the chemical industry. A former President of The Institution of Chemical Engineers and a Fellow of the Royal Academy of Engineering.

Throughout her career she has championed the importance of engineering in delivering solutions which benefit society. She cares deeply about safety in the workplace and more broadly.

From 2007 to 2016 she was Chair of the UK Health & Safety Executive and in 2017 conducted an independent review for the UK government into building regulations and fire safety in the wake of the Grenfell Tower tragedy. Her recommendations for radical reform received Royal Assent in the Building Safety Act 2022. In January 2024 she was appointed interim Chair of the UK Office for Nuclear Regulation.

Dr Wojciech Węgrzyński Prof. ITB

Head of Fire Automation, Smoke Control and Signalling,
Building Research Institute (ITB)

Dr Wojciech Węgrzyński is with ITB, that is the Polish Building Research Institute in Warsaw. He currently holds the position of the Deputy Head of Fire Research Department and the Professor of the Institute, and a Director at SFPE Europe.

He is an Author of 40 peer-reviewed papers published in all of the primary FSE journals. His main area of interest is the fundamentals of compartment fire dynamics and standardized fire testing, and also: use of computational fluid dynamics in fire, wind and fire interaction and evaluation of the effects of the spread of smoke in buildings. His research is focused on the impact of the architectural context of the building on the smoke control performance, as well as finding solutions to make the smoke exhaust systems cheaper and more efficient.

Member of the MAC and Vice-Chair of Sub-committee for Research of the IAFSS. 2018 NFPA Harry C. Bigglestone Award Recipient; 2019 Jack Watts Award Recipient; 2020 SFPE 5 Under 35 Award Recipient. Member of Editorial Board of 'Fire Technology'. Hosts a fire podcast at www.firescienceshow.com

INTERNATIONAL KEYNOTE SPEAKERS

First Release

Hayley Burgess CFIOSH MIFireE C.BuildE MCABE MSc Managing Director, HSBC Ltd

Hayley Burgess is a distinguished leader in fire safety and health, currently serving as the Managing Director of HSBC Ltd. Notably, she holds the esteemed position of being the first woman elected as the International President of the Institution of Fire Engineers.

With extensive credentials as a Chartered Health & Safety Practitioner and Chartered Building Engineer, Hayley boasts over a decade of pivotal experience in consultancy.

Over her illustrious career, spanning 12 years as a Principal Fire Safety & Health and Safety Consultant, Hayley has refined her expertise through engagements in both private consultancy and local government sectors. Her early work conducting Fire Risk Assessments for government-occupied buildings laid a solid foundation for her subsequent endeavors.

Presently, Hayley leads projects with a diverse clientele, specializing in the development of Fire Strategy Designs, comprehensive Fire Risk Assessments, and Fire Safety Inspections. Her consultancy services cover a broad range of fire safety aspects, reflecting her unwavering commitment to upholding stringent safety standards. Hayley's particular focus lies within the Social Care Sector, where she offers invaluable guidance to clients in navigating complex Fire Safety Standards, including the NIHTM 84 framework. Her keen understanding of the sector's nuances has positioned her as a trusted advisor in fortifying fire safety protocols.

In her capacity as a Chartered Safety and Health Professional (CFIOSH), Hayley brings a wealth of knowledge to her role as the Chair of the Northern Ireland IOSH Branch. Her leadership underscores her dedication to advancing safety practices and fostering professional collaboration within the community.

Beyond her organizational commitments, Hayley actively contributes to the field as a member of the Fire Expert Panel for Collaborative Reporting for Safer Structures UK (CROSS UK). Her involvement underscores her commitment to promoting safer structures and sharing insights for the benefit of the broader safety community.

DISCLAIMER: All FireNZ schedules, timings, speakers, and program content are subject to possible changes. We reserve the right to change, delete or modify due to operational and/or speaker availability. The most recent details will be on our website should any changes be required.

HOFFE SIG Update

› Authors **Steve Smith & Lance Hunt** – HOFFE SIG Chairs

It's funny how it seems that as soon as daylight savings stops we get brighter mornings but it feels like winter has begun. That said our work goes on so we continue to pursue topics of interest to our HOFFE group, while we have our main ongoing project that is the NZS4503 review, we also have other current topics that may be of relevance/interest to our members & their clients, these include:

- a) **Non-Compliant products:** Please report detailed examples of non-compliant HOFFE product that is being imported & sold onto the New Zealand market. There are a number of companies distributing products into our marketplace with claims that cannot be substantiated or are at best misleading. It is worth remembering that in order to get action from the relevant authorities we need good factual information that includes information on what the non-compliance(s) is & how it may affect people &/or property. Please send this information including contacts, any supporting documents &/or images to info@fpanz.org.
- b) **Halon:** The FPA has been able to secure a commitment to dispose of another shipment of Halon, while the majority of the Halon out there has gone now should you or your clients have some Halon 1211 or 1301 that they need to dispose of please contact the FPA directly.
- c) **AFFF:** another item that is gaining attention at present is the fact that, before the 3rd December 2025, AFFF fire extinguishers must be removed from service. There are now a number of Synthetic Fluorine Free Foams (SFFF) alternatives available on the market to replace these AFFF units – although care should be taken to ensure equivalency in ratings, etc. One issue that remains challenging is the disposal of the AFFF. New Zealand does not have a local disposal facility and the AFFF must be exported for destruction (just like Halon). A number of waste management companies are currently working through the permitting process and expect to be able to collect AFFF for disposal in the second half of this year. Current advice is to responsibly store the AFFF pending the disposal pathways becoming available. We understand that some waste management companies, such as EnviroNZ (formally ChemWaste), are providing IBC's to their clients for this purpose. The FPA NZ are monitoring developments regarding disposal options and will update members as things progress.

Our next online HOFFE group meeting is on the 19th June.

Regards,

Steve Smith & Lance Hunt,
HOFFE SIG Chair 2023/2024

Passive Fire Protection SIG Update

› Author **Ben Bakker** – Passive Fire Protection SIG Chair

Strategic Planning and New Initiatives at FPANZ SIG Passive Fire

I hope this newsletter finds you all well. As part of our ongoing commitment to improving safety standards within the passive fire industry, we are excited to share some important updates and future plans for our Special Interest Group. We are also announcing a change to our meeting schedule that will better accommodate our growing membership.

Meeting Time Change to 10 AM

To ensure that all members have the opportunity to participate actively in our discussions and initiatives, we have decided to adjust our meeting time. Starting from our next meeting, we will convene at 10:00 AM. This change is based on member feedback and aims to facilitate broader participation.

Identifying and Prioritizing Industry Issues

As part of our commitment to enhancing the field of passive fire protection, we recognize the need to systematically address the challenges we face. To this end, we are currently compiling a comprehensive list of issues prevalent in the industry. Our goal is to develop a strategic plan to prioritize and tackle these challenges effectively.

Focus Areas Under Review:

- › **Compliance and Standardization:** Identifying gaps in the current standards and how they are enforced.
- › **Material Quality and Certification:** Ensuring that all materials used in passive fire protection meet high quality and safety standards.
- › **Training and Skills Development:** Addressing the need for improved training programs to ensure that personnel are well-equipped to implement passive fire protection measures.
- › **Technological Advancements:** Incorporating new technologies and practices to enhance the effectiveness of passive fire systems.

Developing a Strategic Plan

In our upcoming meetings, we will delve into these issues, assessing their impact and urgency. This will help us develop a structured approach to address each concern based on its priority. Our discussions will lead to the formation of task forces or committees focused on specific areas, aiming to propose solutions and advocate for necessary changes within the industry.

Kind Regards,

Ben Bakker

Passive Fire Protection SIG Chair 2023/2024

Passive Fire Training & Technical

» Author **Loren Olsen** – Training & Technical Manager

The year is passing swiftly as we close off April and head into May already.

Progress is happening on a couple of key documents with the Certified Passive Fire Contractor Application document almost complete and the new Code of Practice for Fire & Smoke also underway with the established working group.

For the Certified Evacuation Consultants, the renewal process will start from next month as the annual rollover happens on 30th June 2024. We will be sending emails to the current Certified Consultants approx. mid May to allow time to process renewal applications. Congratulations to our two new Certified Consultants that came through the vigorous application process earlier this year.

We are pleased to announce we are now an approved NZIA CPD Provider and will continue to provide opportunities to upskill knowledge and continue to raise the bar for our industry.

We have a Get it Right seminar coming up in late May titled ‘Passive Fire for the Duplex Home/Multi-Tenanted Dwelling’. This seminar covers the basic principles of Passive Fire and provides an insight into the types of challenges that may arise for residential contractors where standard house services such as plumbing pipes and electrical cables are now involved with fire walls and require firestopping to complete the fire cell integrity.

This seminar will be well targeted towards – Plumbers, Electricians, HVAC Contractors, Service Contractors, Group Home Builders, Architectural Designers, Council Officers/ Inspectors, Builders, Project Managers.

For more information on this seminar or to register, please use the link that was provided in the email you received with this newsletter.

Kind Regards,

Loren Olsen

Training & Technical Manager, FPANZ

New Zealand

Field Advisory Bulletin – Pertronic Evacuation Amplifier EVAC50W24 – LED Address misconfiguration.

We have received advice that sites have been found where the “LED Address” has been incorrectly set on the Pertronic EVAC50W24 Evacuation Amplifier. This is a serious issue as it may prevent the evacuation signal from operating in the affected area.

It appears in at least one case that the rotary switch LED address settings were changed as a means of resetting the defect history on the amplifiers and then were not set back to the correct address. Although changing & restoring the address setting is an effective way of resetting an amplifier, there are inherent risks in that procedure. For this reason we are no longer recommending the use of this procedure after commissioning has been completed. All Pertronic manuals & documentation will be updated to incorporate this recommendation.

It should also be noted that the key operated external “Trial Evacuation” switch and the internal evacuation button directly trigger the operation of the evacuation signal and override all amplifier LED address settings. Amplifiers with an incorrect LED address setting will not give any adverse indication on the control panel. If there is any suggestion that amplifier evacuation tone addresses have been changed, we recommend that the panel programming is verified by operating a detector(s) or manual callpoint(s) in the affected area(s).

Almost all fire alarm control panels have DIP switches or similar for setting up the configuration of the panels. If any changes are made to panel or amplifier configuration settings it is essential that the system is appropriately re-tested to confirm correct operation. This is required by clause 5.1.4 of NZS 4512:2021

If you require any information regarding programming of Pertronic fire alarm control panels, please contact our technical support teams in either Auckland, Wellington or Christchurch.

Auckland Contact; phone 09 633 0226, email auckland@pertronic.co.nz

Wellington Contact, phone 04 567 3229, email tech@pertronic.co.nz

Christchurch Contact, phone 022 532 8112, email christchurch@pertronic.co.nz

Technical Services Manager

BUILDING PERFORMANCE

Kia ora

The Government has laid out its priorities for building and construction for the coming year, with reforming the building consent system and increasing competition for building products earmarked as key measures to encourage housing growth. The Government has also put a spotlight on building consent delays by requiring councils to submit data for building consents and code compliance certificates every quarter.

As part of this commitment, the Government has announced a package of initiatives that will increase housing supply by reducing barriers, improving competition in the building system and lowering costs. This package of changes to the Building Act will be made at each level of the building system including standards, certification schemes and compliance pathways.

As some of you will be aware there are a number of formal change processes underway that impact MBIE's building regulatory system teams, including the Building System Performance branch and the Information and Education area. The proposal would mean changes to the structure of some teams, and the disestablishment of roles. Consultation with our people on these changes is underway and final decisions are expected in mid to late May. We'll be able to provide further information once final decisions have been made.

Our events schedule has picked up for 2024, with our team at both the New Zealand Society for Earthquake Engineering conference and the Master Plumbers conference last week. Next month, we'll be at the Building Officials Institute of New Zealand Annual Conference and Expo in Wellington. Look out for us and feel free to come and have a chat!

Fire Fighting Operations For Fire Engineers

The Institution of Fire Engineers will be hosting a one-day live fire programme for fire engineers and people who work in fire related industries or who have an interest in the fire safety design of buildings. This programme has been developed to give participants the opportunity to gain a better understanding of fire and smoke behaviour and fire fighting techniques by involving them in a series of real fire simulations. All participants will be able to gain first hand experience of real fires in building enclosures, including fire initiation and development, fire and smoke spread, flashover, the use of fire fighting equipment, fire fighting and search and rescue techniques, and more.

The programme will be conducted by experienced firefighters / officers using various enclosures, props and scenarios and has been designed to offer participants an experience that is as close to the real thing as possible. Don't just read about it in textbooks - feel the heat and see the smoke for yourself!

National Training Centre—City Street

Fire Engineer completing a S&R exercise

A statement of attendance will be issued to the participants on completion of the programme, for the purposes of recording continuing professional development (CPD) undertaken.

FIRE DETECTION AND ALARM SYSTEMS IN BUILDINGS NZS 4512:2021 Get it Right Seminar

FIRE DETECTION AND ALARM SYSTEMS IN BUILDINGS NZS 4512:2021 SEMINAR

This seminar series is driven by the ongoing changes we face as an industry and the importance of selecting the right products and installing and maintaining them correctly to meet performance, design, and standards requirements.

FPANZ is hosting a series of three-quarter day workshops throughout the country to continue its plan of education and information to ensure that the industry is continuing to get the latest information and support.

This seminar is a refresher/repeat of the seminars presented in 2021 when the new Standard was released. Please note that NZS 4512:2021 also now cited by MBIE in the Acceptable Solutions.

NZS 4512:2021 is a substantial revision of the 2010 edition. While the basics remain, technology and practice have marched on. Previous requirements have changed and substantial new provisions have been added. To ensure ongoing competence, it is critical for all industry participants to get up to speed with the changes.

Key changes which will be covered include:

- › Wireless Detection Technologies - new
- › Visual Alerting Devices (VADs) - new
- › Networked systems - new
- › Power Supplies - enhanced requirements
- › Changes to Zones, Sectors, and MCP locations
- › New Commissioning, Inspection, and Certification procedures & forms
- › Expanded Documentation and Reporting requirements
- › Changes to Monthly and Annual Testing
- › Updated Isolation procedures and forms
- › Seismic resistance requirements
- › Additional 'Type 5' system requirements
- › New requirements for Labelling and Marking
- › New Installation and Cabling requirements
- › New requirements for Detector installation
- › New equipment functionality and testing requirements

...And a myriad of other small, but significant changes you need to be aware of...

FPANZ is fortunate to have secured key members of the P4512 revision committee to present these seminars, so they come with in-depth familiarity with all the changes.

Time will be allocated to Q&A, so please review the document (available as a free download) beforehand and bring your questions.

AUCKLAND: 11 JULY 2024
RNZ YACHT SQUADRON
8.00am – 2.45pm

TAURANGA: 10 JULY 2024
MERCURY BAYPARK STADIUM
8.00am – 2.45pm

WHO SHOULD ATTEND

The seminars are particularly aimed at those involved in design, manufacture, supply, specification, consenting, installation, inspection, maintenance, and testing of Fire Alarm Systems.

Those who should attend include:

Fire Alarm system engineers, designers, and estimators

Fire Alarm system installation supervisors and charge-hands

Fire Alarm system installers and maintenance technicians

Fire Alarm Installation inspectors

Fire Alarm system surveyors and IQPs

Fire Alarm system component manufacturers and suppliers

Consent and compliance officers

Fire safety officers

INVESTMENT:

- MEMBERS (single) \$300 each* +GST
- MEMBERS (multiple) \$250 each* +GST
- NON-MEMBERS \$400 each +GST

**Available to FPANZ Financial Members who are fully paid-up.*

Catering is provided for this full day seminar consisting of morning tea & lunch.

PASSIVE FIRE FOR THE DUPLEX HOME/ MULTI-TENANTED DWELLING

Get it Right Seminar

PASSIVE FIRE FOR THE DUPLEX HOME/ MULTI-TENANTED DWELLING SEMINAR

Specifically in the commercial building sector, Passive Fire has become a known integral part of the project. Duplex housing or multi-tenanted housing has become a common and growing part of the residential market in recent years.

This brings residential contractors into the commercial sector where standard house services such as plumbing pipes and electrical cables are now involved with fire walls and require firestopping to complete the fire cell integrity.

This seminar covers the basic principles of Passive Fire and provides an insight into the type of challenges that may arise for residential plumbers/electricians etc.

AGENDA INCLUDES:

- › Brief History of Fire
- › Understanding Passive Fire Protection
 - Life Safety
 - What is Passive Fire
 - Fire Resistance Rating
- › Evidence of suitability and Test Standards in NZ
- › Following tested details from Manufacturers
- › Passive Fire in the Design of medium density housing
- › Passive Fire in Construction of medium density housing
- › Examples of co-ordination for service contractors
- › Industry Guidance
- › Q&A opportunities throughout the seminar

PRESENTED BY:

Loren Olsen,
FPANZ Training & Technical Manager

CHRISTCHURCH: 27 MAY 2024

Commodore Airport Hotel
8.00am – 12.20pm

Sky Stadium
8.00am – 12.20pm

AUCKLAND: 29 MAY 2024

Waipuna Hotel & Conference Centre
8.00am – 12.20pm

WHO SHOULD ATTEND

This Seminar will be ideally suited toward:

- Plumbers
- Electricians
- HVAC Contractors
- Service Contractors
- Group Home Builders
- Architects/Architectural Designers
- Council Building Control Officers/Inspectors
- Main Contractors/ Builders

INVESTMENT:

- MEMBERS (single) \$130 each* +GST
- MEMBERS (multiple) \$115 each* +GST
- NON-MEMBERS \$200 each +GST

**Available to FPANZ Financial Members who are fully paid-up.*

Catering is provided for this half day seminar consisting of tea & coffee at registration and morning tea.

No Elev8 fees for non-Fees Free eligible learners

Intended programmes:

- Fire – Elev8 fee.

What is provided free:

- Elev8 annual fee (**only**).

What is **not** included:

- CANVAS online learning fees

Eligible enrolments:

- Sign-up **must** be between 1 October – 30 June 2024.

Period of free Elev8 offer:

- 12 months from start date.

General information:

- Eligible Elev8 learners returning a 'Maybe' or a 'No' for Fees Free will be credited the Elev8 fee covering the agreed period.
- Fees Free eligibility returning a 'Maybe' will still require a statutory declaration to be completed.

If you would like any further information, please contact your training advisor or email fire@competenz.org.nz.
