

Industry Update

MAY 2025

WELCOME

Welcome to May's newsletter,

It's been a busy time, with lots of seminars, standards reviews, member management system upgrades, and planning for a great conference.

It can be surprising for us to receive emails and calls that indicate field staff, in particular, are not reading this newsletter and receiving the information relevant to them. Once again, I do strongly recommend that you make sure your staff read the newsletter each month so they stay current with what's going on in the industry. Read on to learn about the new system that will mean this will be easier to facilitate.

Scott Lawson

“Get it Right” Seminars and Webinars

We are currently running many seminars and webinars and are adding new opportunities each month. So do review the flyers that can be found in the newsletter's covering email and on our website. Several topics are on offer, including in the sprinkler, alarms, and HR areas, and many more will be offered soon. It is quick and easy for your staff to attend these, and many are also free for members. They are a superb opportunity to undertake the required continued professional development.

Member Management Portal

In the coming week or so, you will receive an invitation from our new member management and engagement portal as we migrate our members' services to this platform. We are really looking forward to this going live because it will provide even better service to our members. Membership renewals will happen first, at the start of next month. After that, you will be able to register yourself and your staff for seminars, update communication preferences, and manage the communications and registrations your staff can access. We will send more specific details as we go live.

NZS4512:2021

COMMENTARY cont.

have received numerous inquiries regarding the handling of transitional provisions set to conclude by 14 May 2025. Please read the update on page 6 for information about the current situation. We will also continue to provide information to members and industry as we receive it from suppliers. We strongly suggest that, for new jobs, you contact your suppliers for the current status of panels complying with the new standard.

Proposed Review of Joint Standard AS/NZS 1850:2009 and AS/NZS 1841.1:2007

Several of you will be aware that we are in discussions with Standards NZ, the Fire Protection Charitable Trust, HOFFE members, and other stakeholders in relation to this proposed review. We hope to be able to provide an update in next month's newsletter once these discussions have concluded. These are very important standards here in New Zealand, and a dedicated group of people have been exploring how to ensure we are involved.

FireNZ 2025 Updates

FireNZ 2025 is shaping up to be a great event. We have just about sold out of all exhibition space and sponsorship options. After the great feedback about our FIRENZ app last year, we will be using it again this year to enhance the experience for exhibitors and delegates alike.

FireNZ Call for Papers

There is only a short amount of time left to get your submission in for FireNZ. We have some great submissions and new and current topics, but the wider the range of topics the better FireNZ will be. If you haven't spoken at FireNZ before and are looking for a bit of self-promotion, then seize this opportunity. This is a great forum to introduce yourself to your industry peers.

FireNZ Industry Awards

Sponsorships have been announced, and nominations for our industry awards will be open as you read this. This year we have streamlined the selection process and are using a simple online tool. The following link will take you to the nomination section: <https://firenz.awardsplatform.com/> 

Award categories

- › **Mt Hutt E-Learning** Project Excellence in Fire Protection and/or Engineering Award (under \$5M)
- › **Onestaff** Project Excellence in Fire Protection and/or Engineering Award (over \$5M)
- › **Korok** Unsung Hero Award
- › **Contego** Emerging Fire Professional/Technician Award
- › **Ryanfire** Emerging Fire Engineer Award
- › **Comfortech** Sustainability Award
- › **Carboline | Altex Coatings** Innovative Product Award

Membership

I warmly welcome the following provisional members.

- › Active Electrical Dunedin
- › Halt Fire Ltd.

Until next month

Scott Lawson
Chief Executive Officer, FPANZ

AWARD CATEGORIES:

Mt Hutt E-Learning Project Excellence in Fire Protection &/or Engineering Award (Under \$5M)

HOFFE SIG Update

› Authors **Steve Smith & Lance Hunt** – HOFFE SIG Chairs

Well, another month has gone and as we approach the middle of the year and the winter months, we are left to ponder the important issues like how come the Crusaders and Moana Pacific have improved their rugby teams and others like the Blues and Highlanders are having seasons to forget???

Another important issue that was also in our article last month is the Lithium-Ion battery fire issue. There are so many safety issues to consider when dealing with a class of fire where byproducts from the rapidly decomposing materials involved in the fire include Hydrogen Fluoride, Hydrogen Cyanide, Methane, Carbon Monoxide, Sulphur Dioxide and Formaldehyde, amongst others??? With these byproducts involved, it is easy to see why this fire can be deadly – especially if they happen in an enclosed environment such as an apartment, office, garage etc.

As mentioned last month, this is very much a live topic at present both here and in Australia with efforts underway to develop a standards approval framework suitable for the fire suppressing products.

We also encourage those fire protection technicians who are dealing with clients to make them aware that the 3rd December 2025 deadline for AFFF foam products is fast approaching. This means fire appliances that use AFFF as their fire suppressing agent (including fire extinguishers) cannot be certified after the 3rd of December 2025, we continue to get queries regarding the ongoing use of AFFF and imagine we aren't the only ones?

The next HOFFE Group meeting is on Wednesday 18th June at 1pm online.

Regards,
Steve Smith & Lance Hunt,
 HOFFE SIG Chair 2024/2025

Inspectorate SIG Update

» Author **Jason Godsmark** – Inspectorate SIG Chair

Many of you will remember me as the previous chair of the FPA Inspectorate SIG, I have stepped back into the role and am excited to be working with both the FPANZ and inspectorates and other SIGs again.

As we move into 2025, efforts are underway to revitalize the Inspectorate Special Interest Group (SIG) within the Fire Protection Association of New Zealand (FPANZ). This initiative aims to foster a collaborative environment where inspectorates can share technical knowledge and ensure consistent inspection practices across the industry.

With the adoption of NZS4512:2021 as the standard referenced in the building code, FPANZ, Inspectorates, and the New Zealand Fire Equipment Manufacturers Association (NZFEMA) have received numerous inquiries regarding the handling of transitional provisions set to conclude by May 14, 2025. These organizations have collectively interpreted that the Building Consent date serves as the compliance trigger point. Consequently, systems consented from May 14, 2025, onwards must incorporate equipment that fully meets the new standard.

Currently, due to a bottleneck at laboratories, only two panels have been fully approved to meet the requirements. To address this issue, an interim measure has been established. NZFEMA members may elect to provide FPANZ with a list of panels modified to meet the provisional requirements of NZS4512:2021 as an interim measure. This list will be accompanied by declarations affirming that the panels comply with transitional provisions, are scheduled for laboratory testing, and that manufacturers will maintain records of where unlisted panels are sold. Additionally, manufacturers are committed to performing any necessary remedial work to ensure compliance with the final listing requirements.

Installers and designers please ensure that you work with your equipment supplier and check the dates of consent to ensure that equipment installed meets the correct standard and can be correctly certified.

Regards,
Jason Godsmark,
Inspectorate SIG Chair 2024/2025

Join our webinar on pathways for overseas building products

Tēnā koe

MBIE is developing three new pathways in which overseas building products can be recognised in Aotearoa New Zealand following the passing of The Building (Overseas Building Products, Standards, and Certification Schemes) Amendment Act 2025.

The Building Performance team is hosting a webinar on Monday 9 June 2025 at 11am to discuss what these pathways will look like and to answer your questions.

The webinar will be hosted by Clare Botha, Principal Advisor Building System Delivery and Assurance, who will be joined by:

- Katie Symons, Principal Advisor Engineering, who will discuss the new Building Product Specifications and how you can give your feedback on what product standards and specifications are proposed to be in this pathway.
- Amanda Macauley, Principal Advisor System Performance and Implementation, and Lisa Clephane, Technical Lead Building Regulatory Services, who will discuss the recognition of products certified overseas and Minister Endorsed Standards.

[Register for our webinar here](#)

The Building Performance team

fire NZ 2025

Our annual FireNZ national conference has established a reputation as the premier fire industry event for keeping abreast of advancements in all aspects of fire safety in NZ.

ATTEND as a delegate or speaker.

FireNZ provides a comprehensive national forum for fire industry professionals. It draws delegates from countries throughout the Pacific and keynote speakers from around the world.

The conference programme is designed to provide insight and learning, to extend current thoughts on the various presentation topics, and to provide robust debate around key industry issues. FireNZ delegates are industry professionals with a strong interest in the latest developments across fire protection and related products and services.

EXHIBIT or SPONSOR at FireNZ.

This is an opportunity to showcase advanced cutting edge practices in fire protection engineering that are used to protect people, property and the environment from fire.

The FireNZ Conference and Tradeshow 2025 will provide you with the opportunity to create valuable connections and new business opportunities with key industry buyers, suppliers, stakeholders and leading international experts. Once again the tradeshow hours will suit our exhibitors and maximise the time spent with our delegates.

The conference will provide information for, amongst others:

- Fire Protection Contractors
- Fire Consultants
- Fire Engineers
- Architects
- Building Surveyors
- Property Developers
- Distributors and Installers
- Insurance Professionals
- Fire Equipment Manufacturers
- Fire Survey Personnel
- Regulatory Authorities
- Territorial Authorities
- Fire Risk-Management Personnel
- Fire and Emergency Operational and Volunteer Personnel
- Property and Facilities Managers
- System Designers HVAC/Fire

AUCKLAND, NEW ZEALAND • TUESDAY 7TH - THURSDAY 9TH OCTOBER 2025

HANGA-ARO-RAU
**Manufacturing, Engineering
and Logistics**
Workforce Development Council

The Government has decided to disestablish the current Workforce Development Councils and establish new Industry Skills Boards (ISBs).

The ISBs will take on some of the WDC functions from January 2026. There will be differences between WDCs and ISBs. ISBs will have a role strongly focused around their standard setting function with a lower level of government funding available. It is also expected that the number and coverage of ISBs could be different from the WDC model.

Included below are details on;

- **The current ISB Industry Consultation process,**
- **The Minister's decision on the work-based learning model,**
- **A call for nominations for the new Establishment Advisory Groups for the ISBs.**

As well as how all of this applies to the services you rely on from the team at Hanga-Aro-Rau.

Consultation on the number and coverage of Industry Skills Boards opens.

TEC has commenced consultation on the number and coverage of Industry Skills Boards. The proposals also include some sectors where standards setting is proposed to transition to NZQA.

The consultation document can be found here. [Consultation on Industry Skills Boards' coverage | Tertiary Education Commission](#)

TEC will be running webinars on the proposals set out in the consultation document in the next two weeks.

You can register for a webinar [here](#).

Consultation runs from 28 April until 5.00pm Tuesday 20 May 2025.

Minister announces Government's decision on future work-based learning model.

Last Thursday 24th April, the Minister for Vocational Education announced the government's decision to introduce an industry-led, independent work-based learning model.

See Minister Simmonds' full press release here: [A better path for apprentices and trainees | Beehive.govt.nz](#).

The key aspects are:

- Any qualified provider (institutes of technology and polytechnics, private training establishments, wānanga) can offer work-based learning, managing all aspects of apprenticeships and traineeships.
- Industry Skills Boards (ISBs) will be established from 1 January 2026 to develop qualifications and standards, endorse programmes, and provide workforce analysis.

The transition of this model will see Te Pūkenga's work-based learning divisions transfer to ISBs for up to two years, ensuring continuity in training.

For more information, see the TEC page: [New work-based learning model](#).

This decision reflects the Government's commitment to ensuring the vocational education system is more responsive to industry needs. It follows the targeted consultation earlier this year and confirms that WDCs will still be disestablished on 31 December 2025 and Industry Skills Boards (ISBs) will be operational from 1 January 2026.

Nominations for Establishment Advisory Groups for Industry Skills Boards

The TEC is also inviting industries to nominate representatives to help establish the Industry Skills Boards.

Each Industry Skills Board will have an Establishment Advisory Group with three members from industry. Establishment Advisory Groups will be responsible for ensuring each Industry Skills Board can successfully stand up on day one. The role of the Establishment Advisory Groups is focused on governance rather than industry advocacy.

Candidates will need strong governance and change management skills, an industry background and an understanding of education and training.

Nominations received **before 13 June 2025** will be considered for the Establishment Advisory Groups which will operate through 2025. However, industry nominations after this date are still welcomed. Later nominations will be considered for any unfilled positions on Establishment Advisory Groups or for additional members of the first boards of Industry Skills Boards.

Industry bodies are encouraged to get involved to ensure Industry Skills Board are industry-led from the very beginning.

Further information on the Establishment Advisory Groups and the nomination process can be found here [Help establish Industry Skills Boards | Tertiary Education Commission](#)

What does this mean for Hanga-Aro-Rau and the services you rely on?

Right now, this means that Hanga-Aro-Rau are continuing with their current 2024-25 work programme and don't anticipate changes until 30 June 2025.

They are working with TEC to develop an amended work plan to ensure they can deliver their functions and wind-up Hanga-Aro-Rau by 31 December 2025. This amended plan will cover the period 1 July 2025 to 31 December 2025.

Hanga-Aro-Rau is committed to advocating for industry to have a strong voice in the new system and also want to ensure the needs of current and future workforces are met, particularly Māori, Pacific People, disabled people, and other underrepresented groups.

Hanga-Aro-Rau believe that the redesign process is best supported by robust evidence and policies that have been proven to work well, and have developed **three white papers**, focusing respectively on Māori, Pacific Peoples and disabled people. The success of these groups is essential to the success of the VET system as a whole. They can be downloaded from their website on the links below.

1. [Redesigning Vocational Education and Training system to unlock the potential of Māori and the Māori economy through workforce development: Strategies to inform vocational training design.](#)
2. [Redesigning the Vocational Education and Training system to unlock the potential of Pacific Peoples through workforce development: Strategies to inform vocational training design.](#)
3. [Unlocking the potential of the disabled: Strategies to inform redesign of the Vocational Education and Training system, and its link to employment support and recruitment,](#)

Use of FPANZ Logo

Recently we have noticed that some of our FPANZ members (and even non-members) have been incorrectly using our FPA trademarked corporate logo.

This logo is not to be used by any entity without the written permission of the Chief Executive Officer and/or FPANZ Board. The purpose of this logo is to provide a corporate identity for the Association in its general course of business activities.

The FPANZ membership tier status logos shown below are licensed to be used by any financial member of FPANZ who has signed up to the FPANZ Code of Ethical Conduct and is fully compliant with all its requirements.

For a list of logo guidelines please visit our website <https://www.fpanz.org/about/logo-guidelines>

If you are using an incorrect logo and would like to request a membership logo for use, please email info@fpanz.org

If you are not an FPANZ member and have not gained written permission to use the FPA logo, then we ask that you remove it from your website, email signature or anywhere else that it is currently being used.
